116 titles (16 new)

ISBN: **9780511587238**

Key Features of Cambridge Collections:

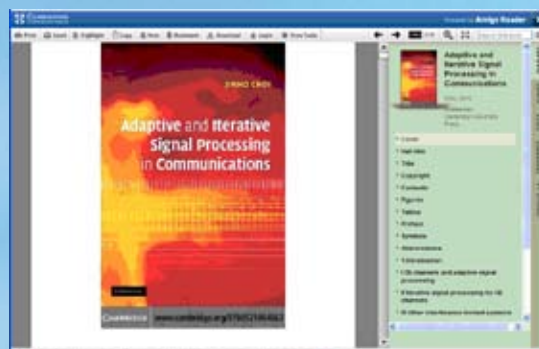

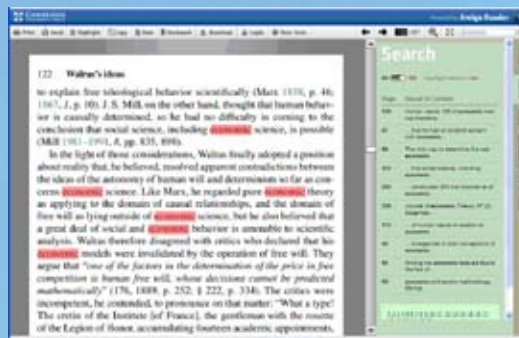

All Cambridge Collections are hosted by Cambridge University Press and sold to institutions on a perpetual access basis with no limits on its number of concurrent users. There are no annual maintenance charges! All our Collections have been selected by our Editors who are experts in their field.

NEW Functionality for 2009:

- Authorized remote access by username and password
- Ability to save Bookmarks and searches by user

Plus existing features:

- Easy to use interface
- Quick and advanced searching on every page and book
- Copy and paste 20% per session
- Printing 5% per session
- Personal bookmarking and annotation
- Email page facility
- Online access solutions for best user experience
- Adobe eBook Reader format

For Librarians

Librarians benefit from comprehensive support through the set up and post sale process, including technical support and material for promotional activities.

- Library branding -- **new in 2009**
- MARC records
- COUNTER compliant usage statistics to the title level now available directly to the Library
- Technical support from ebooks@cambridge.org

Pricing

Collection Prices offer up to 35% off the printed book price and are available on application

Free trials available

Free trials are available to institutions. To register for your free trial, please contact asiamktg@cambridge.org

The New Collections

Literature

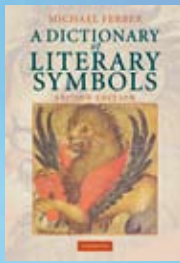

Cambridge is one of the world's largest and leading publishers in English Literature. There are two Collections covering selected from the full range of recent Cambridge publishing.

Collection 1 comprising Literature up to 1830 includes important studies drawn from the Cambridge series on Renaissance Literature and Drama and on Romanticism. There are also many studies on Medieval Literature, Old English and Anglo-Saxon.

Collection 2 covering English & Comparative Literature Since 1830 and Literary Theory. This collection is very strong on Victorian Literature and the Novel. In the 20th century the work of James Joyce is strongly represented as are studies on modernism and literary theory. There are also works on Afro-American; European, Russian and Korean literature and the Dictionary of Literary Symbols.

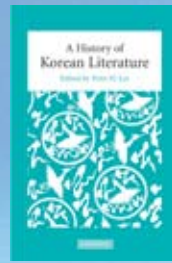

Literature Collection 1

ISBN: **9780511587054** 117 titles

Literature Collection 2

ISBN: **9780511587078** 113 titles

Politics

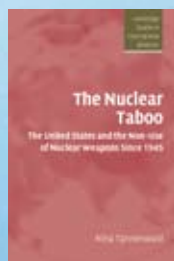

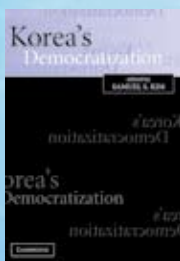

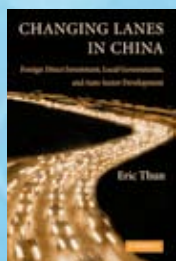

Cambridge has been regularly voted as the world's leading publisher in Politics. The breadth of the list is considerable ranging from Political theory to modern comparative politics. There are therefore two collections.

Collection 1 comprises Political theory, History of political thought including titles in series such as Ideas in Context and also titles in International Relations, many from Cambridge Studies in International Relations series, and finally books on Research methods. Well known authors include Quentin Skinner, J G A Pocock, Fred Halliday, Jon Elster and Karen Greenberg

Collection 2 includes major studies on British, European and American government, many comparative studies, works on International organizations such as UN, NATO and the EU as well as studies on China, South America Africa and Russian politics.

Politics Collection 1

ISBN: **9780511587085** 193 titles

Politics Collection 2

ISBN: **9780511587108** 221 titles

Life Science

This is a large selection across the Plant Science and Zoology lists. It includes titles on ecology and conservation including tropical ecology, cell biology, biomedicine, bioinformatics, biophysics, genetics, microbiology and immunology and neurosciences. Also included are books on animal behavior, biological anthropology and primatology, and a number of books on statistics, data analysis and scientific research methods.

Life Science Collection

ISBN: **9780511587399** 209 titles

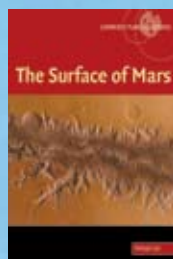

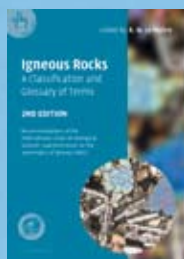

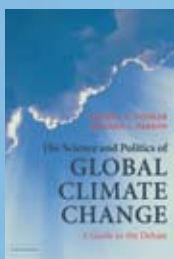

Environmental Science

Cambridge has pioneered studies on the impact of Global warming and climate change. This collection includes some of the most important studies in Atmospheric science, climatology, meteorology, oceanography and marine science, hydrology and environment and sustainable development studies. There are also contributions on, geochemistry, geophysics, Volcanoes, soil science and historical geography.

Environmental Science Collection

ISBN: **9780511587139** 71 titles

Engineering

The large Cambridge engineering list specializes in cutting edge books in Electrical and mechanical engineering and materials science for students, researchers and professional in industry. There are many titles here in communications: wireless and signal processing, optoelectronics, microwave engineering and devices. Also included are books on materials and polymers, solid mechanics and thermal fluid engineering; aerospace engineering, chemical and geotechnical engineering and finally books on technology management.

Engineering Collection

ISBN: **9780511587115** 94 titles
