Transform your classroom with Classware from Cambridge!

Classware is the perfect tool for teachers using technology in the classroom. This cutting edge software brings the whole package of book, audio and video* together in one disc, providing the perfect bridge between teacher-led instruction and student-focused learning. There is no easier way to transform your lessons, encouraging students to interact even more with each other and their learning material – and, it's all instantly accessible in just one click.

Classware is available for a range of age groups including Primary (*Kid's Box*), Secondary (*MORE!*) and Adult (*face2face*).

You'll like Classware because you can:

- **Feel at home with technology.** Classware is so simple and convenient teachers feel immediately comfortable using it.
- **Be sure Classware is always up-to-date.** Automatic updates give you access to new features and tools as they become available.
- **Save time** by having all your teaching resources available at your fingertips.
- **Play all of the class audio** quickly and easily, with or without the script.
- **Watch video** in full screen, with or without subtitles.
- **Focus students' attention** by zooming in on individual activities.
- **Personalise the material on display** by highlighting, hiding and revealing sections, making and saving your own notes, and attaching or linking to your own files.

So, whether you're an experienced whiteboard user or a teacher exploring technology for the first time, Classware is the perfect tool to transform your classroom!

* Video is currently available for *face2face* Classware only.

classware

Simple and convenient

Classware opens up new ways of presenting and using the Student's Book material in class. Plus, you don't need lots of equipment or training. Classware can be used with interactive whiteboards and portable whiteboard devices or simply with a computer and projector. That means, with a minimum of equipment you can display the pages of the course and use the tools to annotate the material and work with the content – nothing could be easier.

Here's how it works...

The tools are easy to find and easy to use. Everything you need from adding text, hiding and showing sections, writing, highlighting, erasing and zooming in, are together on one side of the screen.

Tools at the top of the screen enable you to add your own files, access the online dictionary or phonemic chart, and switch between displaying one page at a time or two.

Three different tabs in the contents panel – 'Contents', 'Audio' and 'Video'* provide access to the material.

Clicking on each shows a list of the pages, audio or video clips available in that book or session.

*where available

Annotate, highlight and mark up the book pictures and text.

Use the zoom tool to foreground any exercise or picture.

Kid's Box Classware Level 1

To turn the pages simply click on the arrows at the bottom of the page.

To jump quickly from one part of the book or session to another use the contents panel.

Switches the tool bar to the other side of the screen depending on your preference.

Up-to-date

Classware is constantly updated, so as technology develops your Classware develops with it. Automatic updates are available via the Internet, ensuring you always have the perfect tool to transform your classroom.

Integrated audio and video

Users can view video* in full-screen, with or without the subtitles. Or you can hide the picture so students guess what is going on.

Audio is accessible via links next to the relevant exercises. As the audio plays, the text being spoken is highlighted and users can also highlight and play specific parts of the text.

*where available

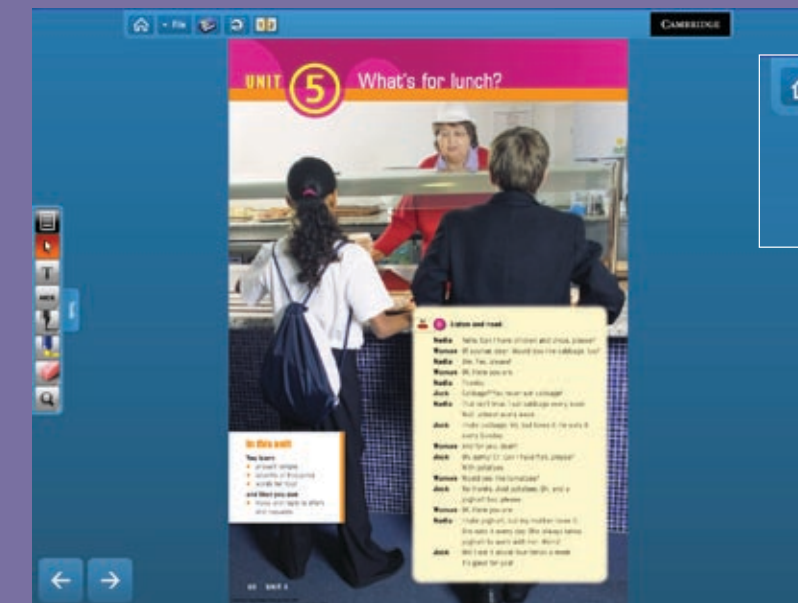

face2face video full-screen

Personalised

Teachers like to be creative. Classware gives you the freedom to explore the core material of the coursebook and mix it with files and material of your own.

This brings variety and flexibility to learning materials in a way that is both innovative and reassuringly familiar. Whether it's adding your own notes, attaching or linking to your own files, a couple of clicks is all it takes. Simply click on 'File' at the top of the screen and then click on 'Attach file from my computer' and browse for the file you need.

You can then save what you have done and access it for use later. Teachers have their own profile, so each user's session is unique and can be found immediately.
