We had a fantastic day when we went to visit Stonehenge! It was the most amazing place I have ever been to already. Nobody really knows how it was built. My cousin thinks it must to have been built by aliens, but I think that's a silly idea. I don't understand why are aliens would do that. But it is hard to understand the reason those huge stones are there. Some people say they maybe might have been built as a kind of calendar. Others do think that they could have been used as a kind of church. Whatever the truth is, one thing is certain: the stones are very beautiful. If you haven't seen them yet, I very recommend that you pay them a visit. You will have never forget it!
