CASE STUDY

The Peruvian anchoveta fishing industry

In the 1960s, Peru’s fishing industry was one of the most important in the world. In 1967, the Peruvian anchoveta population reached a peak, and the anchoveta catch was 13.1 million tonnes (Figure 3.10). The anchoveta population was so high that it could support a large fishing industry. However, within a few years, the anchoveta population started to decline. The reason for this decline is not fully understood, but it is likely to be due to overfishing and environmental factors. A decrease in the anchoveta population had a significant impact on the Peruvian fishing industry, as anchovies are a key food source for many predators, including seabirds and whales. As the anchoveta population declined, so did the anchoveta catch. In 1972, the anchoveta catch was just 1.1 million tonnes. The decline in the anchoveta population had a significant impact on the Peruvian economy, as anchovies were a major source of income for many people in Peru. Despite efforts to rebuild the anchoveta population, the anchoveta population has not fully recovered, and the anchoveta catch remains lower than it was in the 1960s. This has had a significant impact on the Peruvian fishing industry and the Peruvian economy.

Self-assessment questions – self-assessment questions throughout each chapter allow students to quickly check their knowledge and track their own progress, they also help students to become independent learners.

Key terms – key terms boxes contain clear and straightforward definitions of the most important terms in each topic.

This is a sample spread of the Cambridge School Shakespeare Series: King Lear (third edition)

Kneel and the Gentleman separate to find Lear. Lear rages furiously with the storm, demanding that it destroy humankind. He ignores the Fool’s request for shelter, and accuses the storm of joining forces with his daughters.

Characters
Lear in the storm (in small groups)
Lear is an old man in an exposed place facing a terrible storm. Although he seems to be a vulnerable victim of the weather, his words in lines 1–9 are actually a defiant sequence of commands. He is telling the storm to become even more violent, and encouraging the elements to bring about mass destruction. In your groups, take turns to read Lear’s lines in the script opposite one sentence at a time.

- Emphasise the words you think are the most important in conveying Lear’s anger.
- Think about how your performance might be enhanced by movement and actions.
- Do you think this is the point at which Lear begins his descent into madness? Change your tone to indicate where you think this might be happening.

Features
- photography taken from Shakespeare productions around the world.

Student activities
- focused on stagecraft, language, themes, characters and writing for every page of the script.

Page by page
- line by line glossaries to enable easy reading.

Page by page plot synopsis.
A clean, clear play script taken from the New Cambridge Shakespeare editions with plenty of space for annotation.

**Act 3 Scene 2**
The heath near Gloucester's castle

*Storm still. Enter Lear and Fool.*

**LEAR**
Blow, winds, and crack your cheeks! Rage, blow,
You cataracts and hurricanoes, spout
Till you have drenched our steeples, drowned the cocks!
You sulph'rous and thought-executing fires,
Vaunt-couriers of oak-cleaving thunderbolts,
Sing to my white head; and thou all-shaking thunder,
Strike flat the thick rotundity o'er world,
Crack nature's moulds, all germs spill at once
That makes ingratitude a man.

**FOOL**
O nuncle, court holy water in a dry house is better than this rain-water out o'door. Good nuncle, in, ask thy daughters blessing. Here's a night pities neither wise men nor fools.

**LEAR**
Rumble thy bellyful; spit, fire; spout, rain!
Nor rain, wind, thunder, fire are my daughters.
I tax not you, you elements, with unkindness.
I never gave you kingdom, called you children.
You owe me no subscription. Then let fall
Your horrible pleasure. Here I stand your slave,
A poor, infirm, weak, and despised old man;
But yet I call you servile ministers,
That will with two pernicious daughters join
Your high-engendered battles 'gainst a head
So old and white as this. O, how 'tis foul.

Mathematical Thinking in the lower secondary classroom

Mathematical Thinking is for teachers and educators who want to develop their maths teaching skills where English is the language of instruction. It has been written by the international group of educators based at AIMSSEC, The African Institute for Mathematical Sciences Schools Enrichment Centre.

The book provides practical classroom activities underpinned by sound pedagogy and recent research findings. The activities are designed for teachers working alone or in ‘self-help’ teachers’ workshops. They are designed to develop mathematical thinking and offer immediate practical tools to help deliver this approach.

The content also draws on the activities on the NRICH website (www.nrich.maths.org), which has been built up over the last 18 years.

“I discovered that mathematics is not only about numbers, it is a language in itself. Expressions and equations are a short way of narrating a story, they are not just numbers and symbols without meaning.”

Mammudi Malatji, Lower Secondary Teacher

Teaching Probability

David Spiegelhalter and Jenny Gage

Understanding probability is a key part in the development of knowledge of risk and chance. Teaching Probability is designed to support teaching concepts in probability by providing a new approach to this difficult subject from a perspective not limited by a syllabus. This gives teachers both theoretical and practical knowledge of an innovative way of teaching probability.

• Written by a renowned and experienced author team specialising in mathematics pedagogy.
• An alternative approach to teaching probability - focusing on using experimentation to develop skills as opposed to approaching the subject from a theoretical method.
• Provides lesson materials that can be adapted according to the age and ability of pupils.
