Table of Contents

Coefficient inequalities and Yamashita's conjecture for some classes of analytic functions
Ali, Md F. & Vasudevarao, A. 1

Elements of order four in the narrow class group of real quadratic fields
Benjamin, E. & Snyder, C. 21

Parametrizing elliptic curves by modular units
Brunault, F. 33

Certain generalized Mordell curves over the rational numbers are pointless
Dong Quan, N. N. 42

Coarse amenability and discreteness
Dydak, J. 65

Strong skew commutativity preserving maps on rings
Liu, L. 78

On a problem posed by Mahler
Marques, D. & Schicho, J. 86

Finitely constrained groups of maximal Hausdorff dimension
Penland, A. & Šunić, Z. 108

Additive dimension and a theorem of Sanders
Schoen, T. & Shkredov, I. D. 124
