International Teachers Programme
Challenging the Way Business Educators Teach

A Management Faculty-Development Programme organised by the International Schools of Business Management (ISBM), a group of 10 leading Business Schools located in Europe and North America

- HEC Paris
- IAE Aix en Provence
- IMD Lausanne
- INSEAD Fontainebleau
- Kellogg School of Management
- London Business School
- Manchester Business School
- SDA Bocconi School of Management
- Stern School of Business, New York University
- Stockholm School of Economics

ITP has been serving over 1,000 high calibre faculty and educators from many countries for more than 30 years. The SDA Bocconi School of Management hosts the Programme for the academic years 2007-2008 and 2008-2009, according to a rotation process involving all the ISBM Schools.

Can you Face Challenges as Business Educators? We can.

- Teaching in a wide range of contexts, from small groups to large audiences.
- Managing students' diversity in terms of educational background, culture, age, and experience.
- Coping with an increasingly competitive business education environment, and related expectations towards content quality, structure and delivery.
- Using new technologies as a set of opportunities for innovative and cutting edge educational solutions.

SDA Bocconi. Knowledge and imagination.

The Fidelity Research Institute℠ is now taking submissions for the Pyramid Prize. The Prize will be awarded later this year to the author or authors of published applied research that best helps advance the goal of improving life-long financial well-being for Americans.

Submissions for the 2007 Pyramid Prize are due by September 3, 2007. Details on the Prize and the application can be found on the Institute’s Web site at:

www.fidelityresearchinstitute.com
JFQA Style Requirements

Send manuscripts via e-mail in PDF, Word, or LaTeX. The cover page must show title, author name(s) and affiliation(s), e-mail address(es), and work phone number(s). The first page of text should include the title and a one-paragraph abstract of no more than 100 words. Manuscripts must be double-spaced on one side of the page. All sections of the paper, beginning with the introduction and ending with a conclusion or summary, must be numbered with Roman numerals. Subsection headings must be lettered A, B, C, etc.

The manuscript should explain its relation to other research in the field, especially recently published material. References cited in the text should be noted by the last name(s) of the author(s) followed by the publication year enclosed in parentheses without punctuation: Smith (1988). When a particular page, section, or equation is referred to, the reference also should be placed within parentheses: (Smith and Jones (1988), p. 222), (Green (1988a), eq. 3).

Lengthy mathematical proofs and extensive tables should be placed in an appendix or omitted from the manuscript entirely. In the latter case, the author may indicate in a footnote that proofs or tables are available on request. The author should make every effort to explain the meaning of mathematical proofs.

The author should check the manuscript for clarity, grammar, spelling, and punctuation to minimize editorial changes and the necessity of extensive corrections at the proof stage. All abbreviations must be defined.

Equations. All but very short mathematical expressions should be displayed on a separate line and centered. Important displayed equations must be identified by consecutive Arabic numerals in parentheses on the left. Expressions should be aligned and subscripts and superscripts clearly marked to avoid confusion.

Tables. Each table must be titled and numbered consecutively with Arabic numerals. Please check the text to make sure there is a reference to each table. General footnotes should be marked a, b, c, etc., for specific footnotes. Asterisks * or ** indicate significance at the 5% and 1% levels, respectively. The author should check tables to be sure that totals are correct and that the title, column headings, and footnotes clearly explain the content of the table. If tables are on separate pages at the end of the article, indicate approximate placement within the text.

Figures. Figures must be titled and numbered consecutively with Arabic numerals. Captions should present sufficient information to describe the purpose of the figure. Figures for accepted manuscripts must be of professional quality and ready for reproduction.

Footnotes. Footnotes must be double-spaced. Footnotes must not be used for the purpose of citation. Footnotes with extensive content should be avoided.

References. All works cited in the text must be alphabetically arranged in a double-spaced list at the end of the manuscript. Examples:

Journal of Financial and Quantitative Analysis

2007 Subscription Information

The Journal of Financial and Quantitative Analysis (JFQA) is published quarterly in March, June, September, and December by the School of Business Administration at the University of Washington in Seattle, Washington, U.S.A. Topics include corporate finance, investments, capital and security markets, and quantitative methods of particular relevance to financial researchers. With a circulation of 3000 libraries, firms, and individuals in 70 nations, the JFQA serves an international community of sophisticated finance scholars—academics and practitioners alike. The JFQA prints 10 to 12% of the more than 500 unsolicited manuscripts submitted annually. An intensive blind review process and exacting editorial standards contribute to the JFQA's reputation as a top finance journal.

Payment in advance is required. Checks or money orders must be payable to the JFQA in U.S. dollars for deposit in a U.S. bank. Subscriptions start with the next available issue unless otherwise requested. Upon request, electronic subscriptions are available in PDF files. Claims for missing issues must be made within six months of the publication date.

To inquire about permission to reprint or the availability of specific back issues (at a cost of $30 per copy), contact the JFQA office.
