The Journal of Institutional Economics is an interdisciplinary journal that will be of interest to all academics working in the social sciences, including in economics, business studies, sociology, political geography, anthropology and philosophy. The journal is devoted to the study of the nature, role and evolution of institutions in the economy, including firms, states, markets, money, households and other social entities and organizations. It welcomes contributions by all schools of thought that can contribute to our understanding of the nature, development and function of real world economic institutions and organizations.

STATEMENT OF AIDS

Institutions are the stuff of social and economic life. The fascination of understanding the role of institutions in economic growth is now widely acknowledged. The Journal of Institutional Economics is devoted to the study of the nature, role and evolution of institutions in the economy, including firms, states, markets, money, households and other social entities and organizations. It welcomes contributions by all schools of thought that can contribute to our understanding of the nature, development and function of real world economic institutions and organizations.

European Association for Evolutionary Political Economy (EAREP) www.earep.org
Foundation for European Economic Development (FEED) www.fsd-charity.org
Society for the Advancement of Socio-Economics (SASE) www.sase.org
World Interdisciplinary Network for Institutional Research (WINIR) www.wiinir.org

SUBMISSION

All manuscripts must be submitted online via the website http://mc.manuscriptcentral.com/jioje. Following submission you will be notified by e-mail that your manuscript online can be found at the submission website by clicking on the ‘Submissions’ and ‘Form’ link in the top right of the screen; and then clicking on the ‘Author Submission forms’ icon on the following page. The authors will be required to upload an electronic file of the manuscript; provide it with a manuscript reference number and assign it to reviewers. The reference number should be quoted in all correspondence with JIE Office and Publisher.

ARTICLE

This must be an indication of the personal identity or institution of any author of the article within the article itself, or in the ‘provenance’ of the electronic file. Normally, articles (including footnotes and references) must be no longer than 9,000 words. In special cases, such as an extended or revised survey article, the limit may be extended to 12,000 words. A declaration of the total word count (including footnotes and references) must accompany or be within the article.

Papers with some formal content will be considered if it is fully explained for a general readership, the mathematics is consigned as much as possible to appendixes, the assumptions have sufficient grounding in reality, and the paper explains as well as multiple proofs, present, or feasible socio-economic institu-
tions. JIE is not interested in the advancement of formal or economic techniques for their own sake.

The front page of the electronic file of the article should include the following informa-
tion: the title, an abstract or article of up to 150 words, the Journal of Institutional Economics in the article (consisting of a single letter followed by two numeric digits, www.acm.org/journal/jcl_class_system.html); and up to six key words or phrases.

Footnotes should be kept to a minimum and the Harvard referencing system should be used. Submission of a paper will be held to imply that it contains original unpublished work and is not being submitted for publication elsewhere.

The JIE Editors will promptly assess all papers. A paper will be rejected at the first stage if it does not comply with the above guidelines, it evidences of insufficient academic quality or quantity, or is outside the scope of the journal. If a paper passes this preliminary assessment, then it will be sent out for refereing. The first Editors will make the final decision, taking account of the referee’s reports.

If the article is accepted, the author will be asked to comply with the front matter and house style of JIE, as exhibited in issues of the journal from June 2003.

AIMS

“‘Institutions are the stuff of social and eco-
nomic life. Many influential theories, in-
cluding the World Bank, have recognized the importance of institutions for economic development. The Nobel Prize has been awarded to Ronald Coase, Douglass North, Gary Becker for their pioneering work in institutional economics.’” The Journal of Institutional Economics is devoted to the study of the nature, role and evolu-
tion of institutions in the economy, including firms, states, markets, money, households and other social entities and organizations. It will welcome contributions by all schools of thought that can contribute to our understanding of the role of institutions in economic life. The importance of institutional economics to understanding the role of institutions in economics, business studies, sociology, political geography, anthropology and philosophy. The Journal of Institutional Economics is an interdisciplinary journal that will be of interest to all academics working in the social sciences, including in economics, business studies, sociology, political geography, anthropology and philosophy. The Journal of Institutional Economics is devoted to the study of the nature, role and evolution of institutions in the economy, including firms, states, markets, money, households and other social entities and organizations.
