

74% of plastic thermometer sheaths are perforated after use.,, significantly increasing the threat of infection.

Minimize this risk with the Tempa•DOT[®]
Single-Use Clinical Thermometer System

Sterile—
each Tempa•DOT
Thermometer is
used only once and
discarded, mini-
mizing the risk of
passing harmful
microorganisms
from patient to
patient.

Accurate—
innovative thermo-
metric technology
provides consis-
tently exact read-
ings. Proven on
patients of all ages.

Fast—
Tempa•DOT
Thermometers give
oral readings in just
60 seconds!

**Versatile and
Economical—**
suitable for oral,
axillary and rectal
use throughout the
institution, no back-
up system necessary.
Costs no more than
other systems.

ARE YOU READY FOR OSHA?

"Time Is Running Out"
Employee Training
deadline—June 4, 1992

Sherwood Medical can help your health care facility comply with the OSHA rules regarding occupational exposure to bloodborne pathogens. Our new Value Added Training™ program is designed to teach all levels of health care employees how to use

Universal Precautions for self-protection. It's comprehensive, easy to administer, and very effective. And most important, it meets the training, demonstration of mastery and documentation requirements of OSHA. Call Sherwood now and be ready for OSHA!

Caring
For Others...

Caring
For Yourself™
