

THE MATHEMATICAL ASSOCIATION

The fundamental aim of the Mathematical Association is to promote good methods of mathematical teaching. A member receives each issue of one or more of *The Mathematical Gazette*, *Mathematics in School*, *Primary Mathematics* (according to the class of membership chosen), together with Newsletters. Reports are published from time to time and these are normally available to members at a reduced rate. Those interested in becoming members should contact MA Headquarters for information and application forms. The address of the Association Headquarters is **Charnwood Building, Holywell Park, Loughborough University Science and Enterprise Park, Leicestershire LE11 3AQ, UK (telephone 0116 221 0013)**. The Association should be notified of any change of address. If copies of the Association periodicals fail to reach a member through lack of such notification, duplicate copies can only be supplied at the published price. If change of address is due to a change of appointment, the Association will be glad to be informed. Subscriptions should be submitted to the Treasurer via Headquarters. Correspondence relating to **Teaching Committee** should be addressed to TC Chair. The **Association's Library** is housed in the University Library, Leicester.

Views expressed in the *Mathematical Gazette* by authors or advertisers are not necessarily those of the Association.

THE MATHEMATICAL GAZETTE

Editor:

Dr Gerry Leversha,
15 Maunder Road,
Hanwell,
London W7 3PN
g.leversha@btinternet.com

Problem Corner:

Mr Nick Lord,
Tonbridge School,
Tonbridge,
Kent TN9 1JP
njl@tonbridge-school.org

Production Editor:

Mr Bill Richardson,
Kintail,
Longmorn,
Elgin IV30 8RJ
wpr3145@gmail.com

Reviews Editor:

Mr Owen Toller,
4 Caldwell House,
48 Trinity Church Road,
London SW13 8EJ
owen.toller@btinternet.com

Potential advertisers e-mail Charlotte Dyason at: charlotted@media-shed.co.uk

Material for publication should be sent to the Editor.

Books for review should be sent to the Reviews Editor.

Advice to authors of notes and articles.

Study the format of articles in the *Gazette*. Please note the format for references, which should be listed in their order of appearance in an article. MSS may be submitted electronically, preferably in pdf format, or, if sent by post, should be typed and two copies included. (Mathematical expressions may be hand written.) Please send electronic files by e-mail. This edition of the *Gazette* was produced on an Acorn machine using TechWriter and Draw. 10.1017/mag.2023.142

CONTENTS

Articles

Less is More: Improving by Removing (The 2023 Presidential Address)	<i>Colin Foster</i>	385
Sums of roots	<i>Peter Braza</i>	399
Some generalisations of Weitzenböck's inequality	<i>Quang Hung Tran</i>	405
Fourier coefficients of $\frac{1}{\sin \theta}$ and $\frac{\theta}{\sin \theta}$	<i>G. J. O. Jameson</i>	412
A clock model for planetary conjunctions	<i>Sunil K. Chebolu</i>	422
Various perspectives on a pair of simple inequalities for $\log x$	<i>G. J. O. Jameson</i>	430
Revisiting the general cubic: a simplification of Cardano's solution	<i>Hsin-Chieh Liao, Mark Saul, Peter J.-S Shiue</i>	438
A mathematical promenade along parallel paths	<i>Damjan Kobal</i>	445
Some triangle theorems by complex numbers	<i>John R. Silvester</i>	454
Computing indefinite integrals by difference equations	<i>Mehmed Nurkanović, Mirsad Trumić</i>	474

Notes 107.28 to 107.46

Sums, and sums of squares	<i>A. F. Beardon</i>	488
A cautionary example relating to the interpretation of numerical computations	<i>Jeffrey Uhlmann</i>	490
Remark on Cauchy–Schwarz inequality	<i>Reza Farhadian</i>	493

CONTENTS (continued)

Notes 107.28 to 107.46 (continued)

Obtaining a more general result from a functional equation by not differentiating	<i>Steven J. Kilner, David L. Farnsworth</i>	495
A new inductive proof of the AM - GM inequality	<i>Romeo Meštrović</i>	497
On the antiderivatives of a monotone function and its inverse	<i>Soheila Emamyari, Mehdi Hassani</i>	499
On a staircase function	<i>Nikolaos Roidos</i>	501
Two definite integrals that are (not surprisingly) equal	<i>Ulrich Abel</i>	503
Similarities and circle-preserving bijections of the plane	<i>A. F. Beardon</i>	508
PWW: trisecting a line across an angle does not trisect the angle	<i>Jessica E. Banks</i>	512
$c^2 = a^2 + bd$, a new proof of an extension of the Pythagorean theorem	<i>Francesco Laudano</i>	512
Enomoto's problem in Wasan geometry	<i>Hiroshi Okumura</i>	514
Four points, six distances	<i>Peter Giblin</i>	517
Langley's Problem: 100 years on	<i>Reinfried Bardelang, Bernard Murphy</i>	523
On the Lemoine line for the triangle	<i>J. A. Scott</i>	526
Generalised averages of polygons	<i>Francesco Laudano</i>	528
On converses of circle theorems	<i>John R. Silvester</i>	530
A surprising property of a tennis-like game	<i>Leonard M. Wapner</i>	533
Illustrating complex mappings with Excel	<i>Ole Anton Haugland</i>	537
Teaching Note		
An odd fact about Cayley tables	<i>Nick Lord</i>	543
