Volume 27  Number 1
April 1998
The Agricultural and Resource Economics Review (ISSN 1068-2805) (formerly the Northeastern Journal of Agricultural and Resource Economics, ISSN 0899-367X) is the official publication of the Northeastern Agricultural and Resource Economics Association (NAREA). The purpose of the Review is to foster and disseminate professional thought and literature relating to the economics of agriculture, natural resources, and community development. It is the editorial policy of the ARER to encourage manuscript submission without regard to author affiliation and/or location. The ARER is published in April and October. In addition to normal refereed articles, it also publishes invited papers presented at the annual meetings of the NAREA as well as abstracts of selected papers presented at those meetings. It periodically calls for articles written on a specific topic. Membership in the NAREA is open to all persons having an interest in agricultural and resource economics. Membership dues include subscription to the Review and are $15.00 per year for regular membership and $5.00 per year for students. Single copy prices are $7.50 per issue.

Address all manuscripts and editorial material after May 31, 1998, to:

Harry M. Kaiser
Incoming Editor, ARER
Department of Agricultural, Resource, and Managerial Economics
349 Warren Hall
Cornell University
Ithaca, NY 14853-7801

CALL FOR PAPERS: Agricultural and Resource Economics Review (ARER)

THEME: Agricultural and Resource Dimensions of Global Environmental Change

The Agricultural and Resource Economics Review will publish papers on the theme “Agricultural and Resource Dimensions of Global Environmental Change” as a special section of its Spring 1999 issue. The agricultural and natural resource sectors of the economy will be impacted by and will contribute to environmental change. Thus, both impact assessment and contribution papers are relevant. In the papers, authors are expected to identify and examine issues, policies, and/or research methods of interest to global environmental change. Idea papers are welcome, as is theoretical and empirical work. Papers will be subject to blind review. There will be page charges on published articles.

General areas that might be addressed by author(s) include identification and measurement of emerging environmental change issues, evaluation of mitigation policies, analysis of linkages and tradeoffs between environmental quality goals and international, national, regional, state, or community economic growth and development.

Specific paper topics on environmental change could include (but are not limited to) climate change issues; air, water, and soil quality issues; land use change; ecosystem preservation; waste disposal; international environmental treaties; transportation and energy use policies; and economics of crop distribution and yield changes.

Four copies of each manuscript should be submitted with a postmark on or before October 1, 1998, to:

Harry M. Kaiser, Incoming Editor, ARER
Department of Agricultural Economics
349 Warren Hall
Cornell University
Ithaca, NY 14853-7801

Submissions by electronic mail to hmk2@cornell.edu on or before October 1, 1998, will also be accepted. Manuscripts should be sent as an attachment in either Microsoft Word or WordPerfect format.
