JOURNAL OF MATERIALS RESEARCH (JMR) is an interdisciplinary journal serving the materials research community through publication of original research articles and invited reviews encompassing the synthesis, processing, characterization, properties, and theoretical description of materials. JMR publishes new research that demonstrates a significant impact or advance of scientific understanding of interest to the materials research community. Engineering studies and applications to commercial products are beyond the scope of JMR and should be submitted elsewhere. Manuscripts that report data without giving an analysis, interpretation, or discussion are only acceptable if the data are sufficiently important that publication is expected to lead to significant new studies or advancements in science or technology.

Manuscripts must be submitted to the Journal of Materials Research electronically via ScholarOne manuscripts, at the following website address: http://mc.manuscriptcentral.com/jmr. Electronic submission expedites the review process and also allows authors to track the status of their manuscripts at any time. Complete instructions are available on the ScholarOne site and authors will be prompted to provide all necessary information.

Manuscripts must be prepared in English, using a word processing program, formatted to fit 6¾ × 9 in paper, and saved as .doc, .pdf, .rtf, or .ps files. Separate graphics files (.eps and .tif) must be uploaded for each figure. Authors may also upload .xls or .ppt supplemental files as part of the manuscript submission process. All of these files will be converted to pdf format. Detailed instructions are available on the submission web site. During submission, authors must enter all coauthor names and e-mail addresses. Manuscripts will not be considered for peer review until this information is provided. Authors must also enter manuscript keywords using the JMR keyword list (located on the submission web site). Authors who are not fluent in English must have their manuscript edited for correct English grammar and sentence structure before submission.

Authors are expected to follow the conventional writing, notation, and illustration style prescribed in Scientific Style and Format: the CSE Manual for Authors, Editors and Publishers, 7th edition, 2006. Authors should also study the form and style of printed material in this journal. SI units should be used. Authors should use an identical format for their names in all publications to facilitate use of citations and author indexes.

Manuscripts are accepted with the understanding that they represent original research, except for review articles, and that they have not been copyrighted, published, or submitted for publication elsewhere. Authors submitting manuscripts to JMR who have related material under consideration or in press elsewhere should send a copy of the related material to JMR at the time of submission. While their manuscripts are under consideration at JMR, authors must disclose any such related material. To expedite the review process, authors may provide names and contact information for up to four possible reviewers.

Articles are original research reports that include complete, detailed, self-contained descriptions of research efforts. All articles must contain an abstract and section headings.

Commentaries and Reviews: Journal of Materials Research occasionally publishes commentaries on topics of current interest or reviews of the literature in a given area. If an author proposes a review, the title, abstract, and a brief outline should be submitted to the Editorial Office via e-mail for prior consultation on the appropriateness of the topic.

Color policy: It is not necessary for authors to indicate that a figure should be displayed in color online. JMR will assume that any author who submits figures in color wants and agrees to their being produced in color online. Figures may be printed in color at the author's request for an additional charge. Color figures must be submitted before the paper is accepted for publication, and cannot be received later in the process. Authors cannot submit two versions of the same figure, one for color and one for black and white; only one version can be submitted. Authors need to carefully consider the following when submitting figures in color that will be published in color online only: 1) The colors chosen must reproduce effectively and the colors should be distinguishable when printed in black and white; 2) The descriptions of figures in text and captions must be sufficiently clear for both online and print copy. When submitting figures to be in color online only, authors should include the phrase <<color online>> in the figure captions. This is the author's responsibility. Authors will see these color figures when viewing their author page proofs on screen. Authors should always print their page proofs in black and white to see how they will appear in print. Authors will NOT be allowed to submit color figures to replace black and white figures in the page proof stage. To maximize the probability that figures will be published in color online and also print as good quality black and white or grayscale graphics, authors are encouraged to follow these figure submission guidelines: 1) Submit a color graphic in Tagged Image File Format (.tif); 2) Submit color graphics with a resolution of at least 300 dpi (600 dpi if there is text or line art in the figure); 3) Submit color graphics in CMYK format; 4) Submit figures sized to fit the actual column or page width of the journal so that reduction or enlargement is not necessary; 5) Submit multipart figures in one single electronic file.

Cover: FIG. 7(c). SEM image of the ZnO nanorods grown on an Ag buffer layer (60 nm in thickness and at a height of 5 mm) annealed at 500 °C. [B-j. Li, L-j. Huang, M. Zhou, and N-f. Ren: Effects of position, thickness and annealing temperature of Ag buffer layer on shape of ZnO nanocrystals grown by a simple hydrothermal process. p. 3384]
ARTICLES

3311–3321 Multidimensional SPM applied for nanoscale conductance mapping
James L. Bosse, Ilja Grishin, Oleg V. Kolosov, Bryan D. Huey

3322–3331 Caloric effects and phase transitions in ferromagnetic–ferroelectric composites \( xLa_{0.7}Pb_{0.3}MnO_3-(1-x)PbTiO_3 \)
Ekaterina Mikhailova, Igor Flerov, Andrey Kartashev, Mikhail Gorev, Alexander Cherepakhin, Klara Sablina, Nataly Mikhashenok, Nikita Volkov, Alexander Shabanov

3332–3338 Reversible formation of stacking faults in a nickel-based single crystal TMS-82 superalloy
Xianzi Lv, Jianxin Zhang, Hiroshi Harada

3339–3346 Atomistic simulation of the strain-hardening behavior of bicrystal Cu nanowires
Lin Yuan, Debin Shan, Zhenhai Xu, Luming Wang, Bin Guo

3347–3354 Phase selection of undercooled solidification of Ni–4.5 wt% B alloy
Junfeng Xu, Feng Liu, Di Zhang

3355–3366 Influence of silicon content on the volume deficit characteristic of cast Al–Si alloys
Samavedam Santhi, S.B. Sakri, Dharwada Hanumantha Rao, Srinivasan Sundarraj

3367–3373 Barrierless Cu–Ni–Nb thin films on silicon with high thermal stability and low electrical resistivity
Xiao Na Li, Li Rong Zhao, Zhen Li, Li Jun Liu, Cui Min Bao, Jinn P. Chu, Chuang Dong

3374–3383 Silver-decorated ZnO hexagonal nanoplate arrays as SERS-active substrates: An experimental and simulation study
Kun Liu, Dawei Li, Rui Li, Qiao Wang, Shi Pan, Wei Peng, Maodu Chen

3384–3393 Effects of position, thickness, and annealing temperature of Ag buffer layer on the shape of ZnO nanocrystals grown by a simple hydrothermal process
Baojia Li, Lijing Huang, Ming Zhou, Naifei Ren

3394–3400 Microstructure and thermoelectric properties of InSb compound with nonsoluble NiSb in situ precipitates
Guangyu Jiang, Yi Chen, Tiejun Zhu, Xiaohua Liu, Xinning Zhao

3401–3407 Surface-enhanced Raman scattering from rhodamine 6G on gold-coated self-organized silicon nanopymidal array
Rui Li, Hong Li, Shi Pan, Kun Liu, Shanshan Hu, Lujun Pan, Yingnan Guo, Shifa Wu, Xufeng Li, Jun Liu

3408–3416 Hydrothermal synthesis and properties of BiVO₄ photocatalysts
Wei Wei, Xuejie Yue, Henglv Cui, Xiaomeng Lü, Jimin Xie
