DORDRECHT-HOLLAND
1968
## CONTENTS

List of participants  
L. Detre  
K. O. Kiepenheuer  
Welcome by the Hungarian Academy of Sciences  
Preface and introduction  

### PART I

**GENERAL DEVELOPMENT OF AN ACTIVE REGION**

V. Bumba, R. Howard, M. J. Martres, and I. Soru-Iscovici  
Patterns of active region magnetic field development  

M. J. Martres  
Origine des régions actives solaires ‘anormales’  

Sara F. Smith and Robert Howard  
Magnetic classification of active regions  

E. Tandberg-Hanssen and C. Porter  
Development of magnetic fields in active regions  

Jan Olof Stenflo  
The balance of magnetic fluxes in active regions  

T. Fortini and M. Torelli  
On the birth of some proton-flare regions  

H. W. Dodson and E. R. Hedeman  
Some patterns in the development of centers of solar activity, 1962–66  

V. Bumba, J. Kleczek, J. Olmr, B. Růžičkova-Topolova, and J. Sýkora  
Last phases of development of active regions  

S. I. Gopasyuk  
On some properties of the velocity field in a developed active region  

L. Dezső, O. Gerlei, and Ágnes Kovács  
The migration of sunspot activity along solar meridians and parallels  

David M. Rust  
Chromospheric explosions and satellite sunspots  

C. J. Macris and T. J. Prokakis  
Study of an active region of the Sun during three rotation periods
PART II
THEORETICAL ASPECTS

H. U. Schmidt
Magnetohydrodynamics of an active region 95

G. W. Simon and G. W. Simon and
N. O. Weiss Concentration of magnetic fields in the deep convection zone 108

R. E. Danielson and R. E. Danielson and
B. D. Savage Oscillatory modes of energy transport in solar magnetic regions 112

F. A. Ermakov, F. A. Ermakov, 
E. I. Mogilevsky, and 
B. D. Shelting On the magnetic structure of an active region 126

S. I. Syrovatsky and S. I. Syrovatsky and
Y. D. Zhugzhda Oscillatory convection in strong magnetic fields and origin of active regions 127

M. Kopecký and M. Kopecký and
G. V. Kuklin Quantitative estimations of the anomalous plasma diffusion in an active region 131

J. Rayrole et M. Semel J. Rayrole et M. Semel
Étude critique d’un champ ‘current-free’ dans l’atmosphère solaire 134

G. F. Anderson and G. F. Anderson and
D. H. Menzel Sunspots and magnetohydrodynamic flows 142

PART III
OPTICAL STRUCTURE OF AN ACTIVE REGION

Z. B. Korobova, Z. B. Korobova,
A. K. Tchandaev, and A. K. Tchandaev, and
G. Y. Vassilyeva On the state of the photosphere before the appearance of sunspots 151

G. A. Chapman and G. A. Chapman and
N. R. Sheeley, Jr. Correlations between brightness fields and magnetic fields on the Sun 161

M. G. Dmitrieva, M. G. Dmitrieva, 
M. Kopecký, and 
G. V. Kuklin The supergranular pattern and the stable stages of sunspot groups 174

J. M. Beckers and J. M. Beckers and
E. H. Schröter The intensity, velocity and magnetic structure in and around a sunspot 178

W. Mattig and W. Mattig and
J. P. Mehltretter Fine structure of brightness, velocity and magnetic field in the penumbra 187
CONTENTS

M. D. Altschuler, Y. Nakagawa, and C. G. Lilliequist
Concerning the development of the Evershed motion in sunspots 193

N. V. Steshenko
The connection of fine-structure photospheric features in active regions with magnetic fields 201

O. Kjeldseth Moe
On the magnetic-field configuration in sunspots 202

G. V. Kuklin
The proper motions of sunspots and the magnetic field of active regions 211

H. Künzel
Fluctuations of the magnetic-field strength of sunspots within one day 214

E. I. Mogilevsky, L. B. Demkina, B. A. Ioshpa, and V. N. Obridko
On the structure of the magnetic field of sunspots 215

F. L. Deubner
Magnetic and Doppler oscillations in active regions 230

A. B. Severny
Preliminary communication on the short-period oscillations of solar magnetic fields 233

G. Y. Vassilyeva and A. K. Tchandaev
Some comments about correlations between magnetic field and velocity, magnetic field and line intensity in the undisturbed photosphere 236

Yngve Öhman
On some spectrographic observations related to the structure with height of active regions and particularly solar flares 240

M. K. V. Bappu and K. R. Sivaraman
Chromospheric heights in active regions 247

E. Dubov
The structure of the lower solar chromosphere in undisturbed and active regions 255

Eberhard Wiehr
Problems in the interpretation of polarization measurements in active regions 259

B. A. Ioshpa
On the magnetic-field structure around filaments 261

Sara F. Smith
The formation, structure and changes in filaments in active regions 267

J. Kleczek
Prominences in active regions 280

Boris Valníček
The 'detwisted' prominence of September 12, 1966 282

CONTENTS

B. Bednářová-Nováková and J. Halenka
New aspects of the role of development and structure of solar active regions in the arrangements of the corona based on its geomagnetic displays 389

J. M. Wilcox, N. F. Ness, and K. H. Schatten
Active regions and the interplanetary magnetic field 390

W. M. Burton
Extreme ultraviolet observations of active regions in the solar corona 395

C. Y. Fan, M. Pick, R. Ryle, J. A. Simpson, and D. R. Smith
Protons associated with centres of solar activity and their propagation in interplanetary magnetic-field regions co-rotating with the Sun 403

Werner M. Neupert
The solar corona above active regions: a comparison of extreme ultraviolet line emission with radio emission 404

R. Tousey, G. D. Sandlin, and J. D. Purcell
On some aspects of XUV spectroheliograms 411

R. Michard and Mme E. Ribes
La composante lentement variable des rayons X solaires en relation avec la structure des centres d’activité 420

K. A. Pounds, K. Evans and P. C. Russell
X-radiation studies of the corona 431

L. W. Acton and Philip C. Fisher
Observations of energetic X-rays from quiescent solar active regions 432

G. Elwert
X-ray picture of the Sun taken with Fresnel zone plates 439

G. Elwert
The significance of the polarization of solar short-wavelength X-rays 444

PART VI
TRANSIENT PHENOMENA

R. Falciani, M. Landini, A. Righini, and M. Rigutti
Analysis of some solar flares from optical, X-ray, and radio observations 451

L. Krivský
Interaction of magnetic fields and the origin of proton flares 465
CONTENTS

P. A. Sturrock
A model of solar flares 471

C. de Jager
The high-energy flare plasma 480

J. Houtgast
The occurrence and possible meaning of the 'nimbus' 483

Friedrich Meyer
Flare-produced coronal waves 485

R. L. Arnoldy, S. R. Kane, and J. R. Winckler
The observation of 10–50 KeV solar flare X-rays by the OGO satellites and their correlation with solar radio and energetic particle emission 490

PART VII

PROTON FLARE PROJECT (PFP)

Z. Švestka
Introduction and summary 513

J. H. Kinsey and F. B. McDonald
Observations of the solar proton event of August 28, 1966 536

Constance Sawyer
Sunspot changes following proton flares 543

PART VIII

RADIO STRUCTURE OF AN ACTIVE REGION

A. D. Fokker
Homology of solar radio events 553

B. Clavelier
Some results on solar activity at 408 MHz 556

A. Boischot and B. Clavelier
Conditions of acceleration of solar electrons, and determination of the magnetic field in the high corona from the characteristics of a type-IV burst 565

A. Böhme
Tendencies to repeating of type-IVm bursts and their relations to the stage of development of the sunspot group 570

V. G. Nagnibeda
Properties of sources of the slowly varying component of 2 cm solar radio emission 575

G. Swarup, M. R. Kundu, V. K. Kapahi, and J. D. Isloor
Some properties of the sources of slowly varying component and of bursts at 612 Mc/s 581
