CONTENTS

Stopping power of a helium plasma under LTE or NLTE conditions

Effects of wiggler error in a free-electron laser oscillator with two electron beams

Using polarization control plate to suppress transverse stimulated Raman scattering in large-aperture KDP crystal

Three criteria for particle acceleration in collisionless shocks

Beam wave cyclotron heating of rippled density plasma

High-intensity pulsed ion beam focusing by its own space charge

Development of a new high-current triode extraction system for helicon ion source: design and simulation

Nuclear diagnosis of the fuel areal density for direct-drive deuterium fuel implosion at the Shenguang-III Upgrade laser facility

MeV bremsstrahlung X rays from intense laser interaction with solid foils

Laser-driven acceleration of heavy ions at ultra-relativistic laser intensity

Effects of wiggler error in a free-electron laser oscillator with two electron beams—ERRATUM

Wavelength dependence of laser plasma interaction related to shock ignition approach—CORRIGENDUM
