Epidemiology and Infection

Editor-in-Chief

Norman Noah, London School of Hygiene and Tropical Medicine, UK

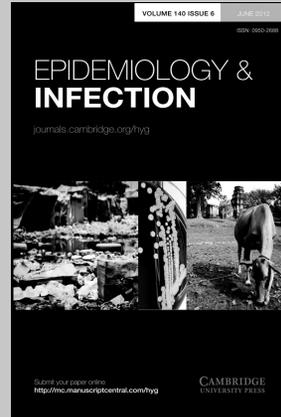

Epidemiology and Infection publishes original reports and reviews on all aspects of infection in humans and animals. Particular emphasis is given to the epidemiology, prevention and control of infectious diseases. The field covered is broad and includes the zoonoses, tropical infections, food hygiene, vaccine studies, statistics and the clinical, social and public health aspects of infectious disease. Papers covering microbiology and immunology, which have an epidemiological relevance, are part of this broad field. Papers come from medical and veterinary scientists worldwide. It has become the key periodical in which to find the latest reports on recently discovered infections and new technology. For those concerned with policy and planning for the control of infections, the papers on mathematical modelling of epidemics caused by historical, current and emergent infections, will be of particular value.

Journal of Biosocial Science

Editor

C. G. N. Mascie-Taylor, University of Cambridge, UK

Journal of Biosocial Science is a leading journal in the field of biosocial science, the common ground between biology and sociology. It is an essential reference guide for all biological and social scientists working in such areas as reproduction and its control, gerontology, ecology, genetics, applied psychology, sociology, education, criminology, demography, health and epidemiology. Publishing original research papers, short reports, reviews, lectures and book reviews, the journal also includes a Debate section which encourages comments on specific articles, with subsequent response from the original author.

NETWORK SCIENCE

Volume 2

Number 3

CONTENTS

Articles

- Supple networks: Preferential attachment by diversity in nascent social graphs
JAMESON K. M. WATTS AND KENNETH W. KOPUT 303
- The evolution and structure of social networks
WHITMAN RICHARDS AND NICHOLAS WORMALD 326
- Data-driven traffic and diffusion modeling in peer-to-peer networks: A real case study
ROMAIN HOLLANDERS, DANIEL F. BERNARDES, BIVAS MITRA, RAPHAËL M. JUNGERS, JEAN-CHARLES DELVENNE AND FABIEN TARISSAN 341
- The network structure of mathematical knowledge according to the Wikipedia, MathWorld, and DLMF online libraries
FLAVIO B. GONZAGA, VALMIR C. BARBOSA AND GERALDO B. XEXÉO 367
- Mid size cliques are more common in real world networks than triangles
NOA SLATER, ROYI ITZCHACK AND YORAM LOUZOUN 387
- Algorithms for generating large-scale clustered random graphs
CHENG WANG, OMAR LIZARDO AND DAVID HACHEN 403
- End Note**
- Smallest graphs with distinct singleton centers
ULRIK BRANDES AND JAN HILDENBRAND 416

Manuscript Submission Guidelines

Manuscripts for consideration for *Network Science* should be submitted electronically, using the Manuscript Central System at <http://journals.cambridge.org/NWS>. This system will allow authors to benefit from faster review and earlier, online publication. Authors who are unable to submit online should contact the NWS Editorial Office (at networkscience@cambridge.org) for assistance.

For more detailed instructions for contributors please go to <http://journals.cambridge.org/NWS/contributors>.

EDITORS

Lada Adamic, Information Science, University of Michigan, USA

Ulrik Brandes, Computer Science and Mathematics, University of Konstanz, Germany

Noshir Contractor, Communication, Engineering, and Management, Northwestern University, USA

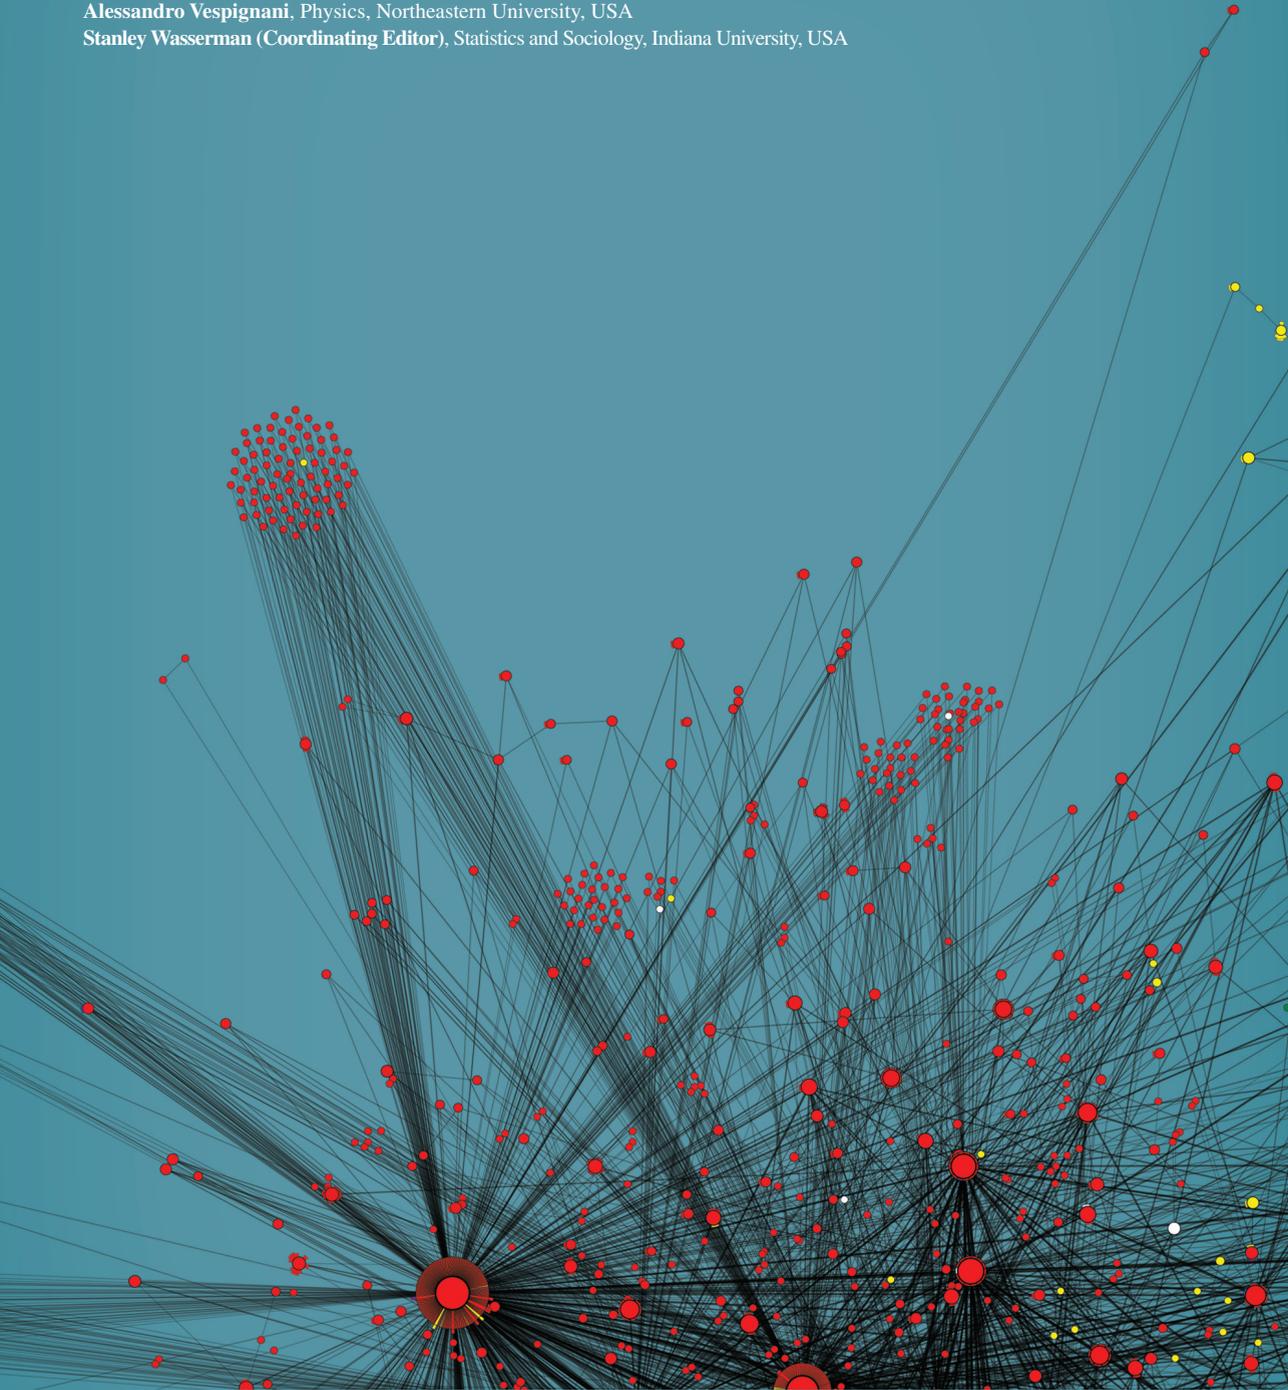

Sanjeev Goyal, Economics, University of Cambridge, UK

Garry Robins, Psychology and Political Science, University of Melbourne, Australia

Thomas Valente, Public Health and Medicine, University of Southern California, USA
