*Now Ready. PART I. THE ARGASIDAE. With 116 text  
Figures and 3 Plates. Royal 8vo. 5s. net*

This book will deal with the Classification, Structure and Biology of Ticks, the study of the group having occupied the authors for several years. Practically all that has been published on the subject has received adequate consideration.

The book will be issued in about four parts, which will be complete in themselves but are designed to form a volume of about 500 pages when all the parts have been published. Each part will be issued in a stiff paper cover and will include a bibliography printed on one side of thin paper so that the references can be conveniently cut out and gummed on index cards. A complete bibliography, including all the publications cited in each part, will conclude the volume.
