Aims and Scope: The Journal of the International Neuropsychological Society welcomes original, creative, high-quality research papers covering all areas of neuropsychology. The Journal is strongly committed to the promotion and development of clinical contributions that will broadly advance the field of neuropsychology, including but not limited to the development of cognitive-behavioral treatments, adult neuropsychology, child neuropsychology, developmental neuropsychology, disorders of speech and language, and the interfaces of neuropsychology with related areas such as behavioral neurology, neuropsychiatry, neuroimaging, and electrophysiology. Both Reviews and Articles will also be published.
