

Instructions for Contributors

Zygote is an international journal dedicated to the rapid publication of original research in early embryology. It covers interdisciplinary studies on gametogenesis through fertilization to gastrulation in animals and humans. The scope has been expanded to include clinical papers, molecular and developmental genetics. While the editors will favour work describing fundamental processes in the cellular and molecular mechanisms of animal development, and, in particular, the identification of unifying principles in biology, new technologies, review articles, debates and letters will become a prominent feature.

Subjects covered include gametogenesis, sperm–oocyte interaction, gamete and embryo physiology, cell polarity, cell–cell interactions, nuclear transfer, haploidization, molecular and developmental genetics, in-vitro fertilization, stem cell and cryoconservation technologies.

To submit a manuscript, please email a complete copy, including figures and illustrations to:

- Brian Dale, Editor-in-Chief, *Zygote*, Centre for Reproductive Biology, Italy.
Email: brian.dale@virgilio.it or to
- Jacques Cohen, North American Editor, *Zygote*, Tycho-Galileo Research Laboratories, 3 Regent Street, Suite 301, Livingston, NJ 07039, USA
Email: jc@embryos.net or to
- Professor Norio Suzuki, Asian Pacific Editor, *Zygote*, Department of Biological Science, Hokkaido University, Japan.
Email: medaka-s@kdp.biglobe.ne.jp

Submission of a paper will be taken to imply that it is unpublished and it is not being considered for publication elsewhere. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper.

There is no formal restriction on length; however, original articles and reviews of less than 15000 words are likely to appear sooner than longer ones. Short communications should not exceed 1500 words and News and Views Commentaries 500 words.

Preparation of manuscripts

Manuscripts should be organised as follows: Title page (with full names and addresses of all authors, a running headline of up to 35 characters, and a contact address with telephone number and email address), an Abstract of not more than

250 words followed by 5 Keywords, Introduction, Materials and Methods, Results, Discussion (combined Results and Discussion may be used for short papers), Acknowledgements, References, Endnotes, Tables and Figure Legends.

Manuscripts should be prepared using SI units

Figures

Figures should be numbered consecutively as they appear in the text. Any indication of features of special interest should also be included. Figures must be supplied electronically. They must be saved at final publication size and ideally supplied in the following file formats: halftone figures (black & white, and colour) as TIF files at 300 dpi; black & white line figures as TIF or EPS files at 1000 – 1200 dpi. PDF format is also accepted. When relevant, photographs should be submitted with proposed reduction or magnification indicated by a scale line on or beside, the illustration.

The places for insertion into the text should be indicated in the text as ‘Fig. 1’ etc. Legends for all illustrations should be typed together, separately from the main text. A charge of £500 per figure will be made for colour reproduction and printing.

More detailed information is available at:

<http://journals.cambridge.org/artworkguide>

Tables

Tables with concise headings should be placed at the end of the paper. Each table must have a text reference, in the form ‘Table 1’ etc.

References

References should be cited in the text as Conklin (1905) showed or as shown (Conklin, 1905). For papers with three or more authors use et al. A full list of references in alphabetical order should be given at the end of the text: surname of author and initials; year of publication (in parentheses); title of paper; journal or book name (the former being abbreviated in accordance with the World List of Scientific Periodicals); volume number; first and last page of the reference. For books and conference proceedings, place of publication and publisher (and editor(s) if appropriate) should be included.

Proofs

Proofs will be sent to the author for checking. Typographical or factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints

A PDF offprint of each article will be supplied free to each first named author. Paper offprints may be purchased from the publisher if ordered at proof stage.

ZYGOTE

The Biology of Gametes and Early Embryos

CONTENTS

ORIGINAL ARTICLES

Growth factor receptor-bound protein 14: a potential new gene associated with oocyte competence

Rosa, P. R. A., Bohrer, R. C., De Cesaro, M. P., Gutierrez, K., Ferreira, R., Pereira, G. R., Oliveira, J. F. C. & Gonçalves, P. B. D. 103

Participation of IP₃R, RyR and L-type Ca²⁺ channel in the nuclear maturation of *Rhinella arenarum* oocytes

Toranzo, G. S., Bühler, M. C. G. & Bühler, M. I. 110

Crucial surviving aspects for vitrified *in vitro*-produced bovine embryos

Sudano, M. J., Paschoal, D. M., da Silva Rascado, T., Crocorno, L. F., Magalhães, L. C. O., Junior, A. M., Machado, R. & da Cruz Landim-Alvarenga, F. 124

A comprehensive method for the conservation of mouse strains combining natural breeding, sperm cryopreservation and assisted reproductive technology

Li, D.-G., Zhu, Y., Li, H.-P., Chen, X.-J. & Jiang, M.-X. 132

DNA methylation pattern in mouse oocytes and their *in vitro* fertilized early embryos: effect of oocyte vitrification

Liang, Y., Fu, X.-W., Li, J.-J., Yuan, D.-S. & Zhu, S.-E. 138

Forskolin effect on the cryosurvival of *in vitro*-produced bovine embryos in the presence or absence of fetal calf serum

Paschoal, D. M., Sudano, M. J., Guastali, M. D., Maziero, R. R. D., Crocorno, L. F., Magalhães, L. C. O., da Silva Rascado, T., Martins Jr., A. & da Cruz Landim-Alvarenga, F. 146

Cryoprotective effects of low-density lipoproteins, trehalose and soybean lecithin on murine spermatogonial stem cells

Wang, P., Li, Y., Hu, X.-c., Cai, X.-L., Hou, L.-P., Wang, Y.-F., Hu, J.-H., Li, Q.-W., Suo, L.-J., Fan, Z.-G. & Zhang, B. 158

CORRIGENDUM

Cryoprotective effects of low-density lipoproteins, trehalose and soybean lecithin on murine spermatogonial stem cells – CORRIGENDUM

Wang, P., Li, Y., Hu, X.-c., Cai, X.-L., Hou, L.-P., Wang, Y.-F., Hu, J.-H., Li, Q.-W., Suo, L.-J., Fan, Z.-G. & Zhang, B. 164

Developmental competence of ovine oocyte following vitrification: effect of oocyte developmental stage, cumulus cells, cytoskeleton stabiliser, FBS concentration, and equilibration time

Shirazi, A., Taheri, F., Nazari, H., Norbakhsh-nia, M., Ahmadi, E. & Heidari, B. 165

CORRIGENDUM

Developmental competence of ovine oocyte following vitrification: effect of oocyte developmental stage, cumulus cells, cytoskeleton stabiliser, FBS concentration, and equilibration time – CORRIGENDUM

Shirazi, A., Taheri, F., Nazari, H., Norbakhsh-nia, M., Ahmadi, E. & Heidari, B. 174

Effects of low-density lipoproteins extracted from different avian yolks on boar spermatozoa quality following freezing–thawing

Wang, P., Wang, Y.-F., Wang, C.-W., Bu, S.-H., Hu, J.-H., Li, Q.-W., Pang, W.-J. & Yang, G.-S. 175

Differences in chimera formation and germline transmission between E14 and C2J embryonic stem cells in mice

Zhu, Y., Li, D.-G., Sun, Z.-G., Chen, X.-J. & Jiang, M.-X. 182

Observation of fresh *Bos indicus* embryos comparing stereoscopic and phase contrast microscopy

Gutiérrez, M. E., Galina, C. S., Moreno-Mendoza, N., Alarcón, M. A., Godínez, B. & Lammoglia, M. A. 187

DNA fragmentation, transgene expression and embryo development after intracytoplasmic injection of DNA–liposome complexes in IVF bovine zygotes

Vichera, G., Moro, L. N., Buemo, C. & Salamone, D. 195

Porcine oocyte vitrification in optimized low toxicity solution with open pulled straws

Marco-Jiménez, F., Casares-Crespo, L. & Vicente, J. S. 204

Effect of melatonin treatment on developmental potential of somatic cell nuclear-transferred mouse oocytes *in vitro*

Salehi, M., Kato, Y. & Tsunoda, Y. 213

Biphasic assembly of the contractile apparatus during the first two cell division cycles in zebrafish embryos

Webb, S. E., Goulet, C., Chan, C. M., Yuen, M. Y. F. & Miller, A. L. 218

Structural analysis of toad oviductal mucosa in relation to jelly components secretion throughout the reproductive cycle

Crespo, C. A., Ramos, I., Medina, M. F., Cisint, S. B., Villagra, A. L. I. & Fernández, S. N. 229

HSP90 expression correlation with the freezing resistance of bull sperm

Wang, P., Wang, Y.-F., Wang, H., Wang, C.-W., Zan, L.-S., Hu, J.-H., Li, Q.-W., Jia, Y.-H. & Ma, G.-J. 239

Spontaneous generation of reactive oxygen species and effect on motility and fertilizability of sea urchin spermatozoa

Kazama, M., Sato, T. & Hino, A. 246

Distribution of tubulointerstitial nephritis antigen-like 1 and structural matrix proteins in mouse embryos during preimplantation development *in vivo* and *in vitro*

Sakurai, M., Sato, Y., Mukai, K., Suematsu, M., Fukui, E., Yoshizawa, M., Tanemura, K., Hoshino, Y., Matsumoto, H. & Sato, E. 259

Possible regulation of Oct60 transcription by a positive feedback loop in *Xenopus* oocytes

Morichika, K., Sugimoto, M., Yasuda, K. & Kinoshita, T. 266

Characterization of the effects of metformin on porcine oocyte meiosis and on AMP-activated protein kinase activation in oocytes and cumulus cells

Bilodeau-Goeseels, S., Magyara, N. & Collignon, C. 275

SHORT COMMUNICATION

Replacement of glutamine with the dipeptide derivative alanyl-glutamine enhances *in vitro* maturation of porcine oocytes and development of embryos

Kim, S. J., Koo, O. J., Kwon, D. K., Kang, J. T., Park, S. J., Gomez, M. N., Atikuzzaman, M., Jang, G. & Lee, B.-C. 286
