810 East 10th St.
Lawrence, KS 66044-8897

Although published by the Paleontological Society, a subscription to PALEOBIOLOGY is in addition to the society dues. There are five groups of subscribers. For 1995, subscriptions are:

- (1) \$35.00 for regular subscribers.
- (2) \$33.00 for members of the Paleontological Society or the Palaeontological Association.
- (3) \$23.00 for student subscribers.
- (4) \$20.00 for student members of the Paleontological Society or the Palaeontological Association.
- (5) \$65.00 for institutions.

Back volume: \$8.00 for *all* individuals and institutions.

PALEOBIOLOGY (ISSN 0094-8373) is published quarterly by the Paleontological Society, 810 East 10th St., Lawrence, KS 66044, USA. Price for institutional subscriptions, \$65; individual subscriptions, \$35. Second-class postage paid at Lawrence, KS. POSTMASTER: Send address changes to PALEOBIOLOGY, P.O. Box 1897, 810 East 10th St., Lawrence, KS 66044-8897, USA.

PALEOBIOLOGY is printed offset by Allen Press, Inc., Lawrence, KS 66044.

The Paleontological Society acknowledges, with special thanks, Patrons and Institutional Supporters of *Paleobiology* for 1995.

The purpose of establishing the Patrons Fund is to broaden the basis of financial support for *Paleobiology*, and thus to encourage paleontological publication.

\$50.00 to \$100.00,

IN MEMORIAM

PETER G. WILLIAMSON

the Diversity of Life

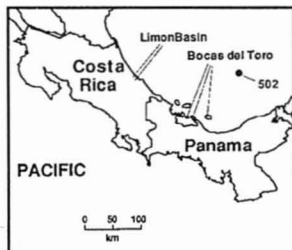

Evolutionary Paleobiology

Edited by David Jablonski, Douglas H. Erwin,
and Jere H. Lipps

Evolutionary Paleobiology presents a broad range of original research and novel theoretical approaches unified by their focus on the study of life on earth and their debt to the work of James W. Valentine, one of the founders of modern evolutionary paleobiology.

"This volume is a first-rate summary of the state of the discipline of evolutionary paleobiology, and one of the finest of its genre in years."
—Warren Allmon, Paleontological Research Institution

*Paper \$29.95 492 pages
103 line drawings, 23 tables

Evolution and Environment in Tropical America

Edited by Jeremy B. C. Jackson, Ann F. Budd,
and Anthony G. Coates

"This volume clarifies for the first time the sequence of events that led to the formation of the Central American isthmus and to the myriad resulting changes in oceanic circulation patterns, global climate, and the evolution of the marine biota of the Caribbean and the Pacific. No comparable study of such a significant biogeographic event exists. . . . Truly a landmark compilation."—Richard Bambach, Virginia Polytechnic Institute

*Paper \$27.50 440 pages 35 halftones, 31 tables

Life's Splendid Drama

Evolutionary Biology and the Reconstruction of Life's Ancestry, 1860–1940

Peter J. Bowler

"Bowler's book explores the unique contributions of morphology and paleontology to the enrichment of evolutionary theory from 1860 to 1940. This is the first treatment of a critical field of evolutionary biology. Bowler shows how new fossil discoveries, and new interpretations of the evolutionary meanings of the anatomy of vertebrates and arthropods, shaped the modern view of the evolution of life."—Michael J. Benton, University of Bristol

Cloth \$37.95 540 pages 4 halftones, 42 line drawings
Science and Its Conceptual Foundations series
