RILM Abstracts is the world’s most complete continuously updated bibliography of music literature. Through its printed, CD-ROM, and online formats, RILM provides general readers and scholars with easy access to all significant music literature—a service supplied nowhere else. RILM Abstracts is more than a mere index: it provides detailed summaries of many references, and every RILM entry itself is indexed in detail.

Anyone who needs quick access to recent music literature, from reviews of blues recordings to the origins of Byzantine church music will find it in RILM. Students, performers, and music historians in all areas benefit from RILM’s in-depth coverage.

Using information compiled in its member countries, RILM’s staff of professional editors, musicologists, and indexers produces three major research tools:

RILM Abstracts: A cornerstone of every music reference collection. Each volume of this fully annotated bibliography contains references to virtually all serious writing on music within a given year. Its references form the most complete guide available to current publications worldwide, and its abstracts provide summaries of the most significant books and articles of the year.

RILM Cumulative Index: Three separate index volumes, each covering a full five years of the RILM Abstracts annual volumes.

RILM Music Thesauruses: A standard vocabulary for music terminology and place names. The RILM Thesaurus enables the serious researcher to use the indexes most thoroughly and efficiently.
