ginning of the end ed bacteremia.

venous catheters with built-in infection protection.

10 cases would be avoided-and, at the figure of \$6,000 per case for added hospitalization, the added cost for infection would be cut in half, from \$120,000 to \$60,000. At a cost of \$57.75 per ARROWgard™ multi-lumen CVC kit, or \$28,875 for 500 multi-lumen CVCs, you can see that the hospital saves \$31,125. You retain over half the savings

deflects in case of inadvertent contact with the vessel walls to reduce perforation risk.

- Flexible thromboresistant polyurethane material softens in situ for excellent indwelling characteristics.
- The Arrow® Raulerson Introducer Syringe***

guide (.025" and .035" diameters available) aids in accurate and positive catheter placement.

MEDIAL 18GA

PROXIMAL 14

has a hollow plunger/balloon containing a patented valving system. It allows a spring-wire guide to be placed directly into the vessel lumen so there's less trauma, less contamination risk, and virtually no chance for air embolism.

- The Arrow Advancer™ saves you time by helping you to easily straighten the "J"-tip spring-wire guide and insert it with one hand, advancing it to the proper position with your thumb.
- A centimeter-marked spring-wire

Not only does Arrow offer more benefits, but you have a wider choice of kits, sets, and accessories for central venous catheterization from Arrow than from any other source.

Ask for our free infection-control information packet

We have prepared a helpful packet on infection control. It contains many of the articles referenced in this brochure and CVC informational literature. For your free packet, call your Arrow representative, or contact us directly by calling 1 800 233-3187, Ext. 3294, and ask for Joanne.

even after subtracting the catheter cost. Even more important than the economics, potentially, lives may be saved. Further, you must consider the unnecessary expenditure of time and energy on the part of your staff and the trauma and suffering of the patient.

Additional patient and physician benefits.

Select Arrow multi-lumen and single-lumen central venous catheters now carry ARROWgard™ protection. And there are other impressive benefits built into select ARROWgard™ CVC kits and sets. These features add up to better patient care with every use:

- The Arrow Blue FlexTip® is an integral catheter tip which is more pliant than the body. It remains patent yet

Refer to package insert for current warnings, precautions, and instructions for use.

*ARROWgard™ is a joint development of Daltex Medical Sciences, Inc., and Arrow International, Inc., using technology developed by Dr. Shanta Modak and her colleagues, in the Department of Surgery, Columbia University. U.S. Patent Numbers 4,612,337, 4,563,485, 4,581,028, 5,019,096 apply. Other U.S. and foreign patents pending.

**U.S. Patent Number RE-31879. Canadian Patent Number 1,112,533. Foreign patents pending and issued. The Arrow-Howes™ Multi-Lumen Central Venous Catheter is a joint development of Randolph Howes, M.D., Ph.D., and Arrow International, Inc.

***U.S. Patent Number 4,831,938. Other U.S. and foreign patents pending. The Arrow® Raulerson Syringe is a joint development of J. Daniel Raulerson, M.D., and Arrow International, Inc.

ARROW
INTERNATIONAL, INC.

Contact our Customer Relations Department for further information: 3000 Bernville Road, Reading, PA 19605, U.S.A. Distribution worldwide; offices in Canada, Germany, Japan, and The Netherlands.

Due to product availability, catheters initially may be manufactured in a color other than blue.

DO YOU REALLY KNOW WHAT YOU'RE GETTING INTO?

If you work in a high-risk medical area, you know the hazards. So does Ansell. That's why we've introduced our new E.P.[™] Gloves. They provide the extra protection you need because E.P. Gloves are manufactured and tested to even tighter requirements than the current industry standards for surgical gloves. They also provide features for added protection not available with other gloves in the marketplace today.

Ansell E.P. Gloves Provide Extra Protection By:

- Testing to ten times tighter **AQL** than the industry standard for surgical gloves*
- **100%** electronic inspection for pinholes
- No powder added
- **Thicker** latex
- Long, 12" cuff
- Textured wet-grip surface
- Meeting industry guidelines for handling cytotoxic drugs**
- Availability in four sizes, petite, small, medium, and large

So get your hands into Ansell's new E.P. Gloves — before your get into anything else. For more information and a FREE pair of E.P. Gloves, call today.

Twenty-eight years ago
we declared germ warfare.

Cidex*

And today we're still winning the battle.

Johnson & Johnson Medical, Inc. revolutionized the science of disinfection with the introduction of CIDEX® Activated Dialdehyde Solution twenty-eight years ago. While other products have come and gone, CIDEX Solution is still here, with a total system of products to satisfy your disinfecting needs.

The original CIDEX Solution has grown to include a full line of CIDEX Solutions, CIDEX® Solution Test Strips and ENZOL® Enzymatic

Detergent. All have been specially formulated to perform to the high standards of efficacy that you demand.

Depend on Johnson & Johnson Medical to lead the charge in asepsis and infection control. For additional information on the complete family of disinfecting products, call 1-800-433-5009, or contact your Johnson & Johnson Medical sales representative.
