Notes for Contributors

Policy *Phonology* is concerned with all aspects of phonology and related disciplines. Each volume contains two issues, published in April and October. In general, one issue of each volume is devoted to one or more themes, with the other issue being non-thematic in nature. The editors encourage the submission of papers on proposed themes as well as on other topics relevant to the interests of *Phonology*. In addition, they welcome offers to act as guest editor for particular themes. The normal language of publication is English. Contributors intending to submit a manuscript in another language should first contact the editors.

Future volumes

Volume 6 number 2 (1989): The theme is **The atoms of phonological representation** (Editor: John Anderson).

Volume 7 (1990): The first issue will be non-thematic. Submissions are encouraged on any topic relevant to the interests of the journal; they should reach the editors not later than the beginning of July 1989. The theme for the second issue is **Phonological government** (Guest editor: Jonathan Kaye). This theme is concerned with the emergence in the 1980s of a significant schism concerning the form and content of phonological theory. While many phonologists continue the development of rule-based approaches, following the general programme of *SPE*, others, in contrast, have pursued the possibility of applying the 'principles and parameters' model, taken from syntax, to the study of phonological theory. In following this line of research, various proposals involving the notion of 'government' have been put forward. This issue of *Phonology* will investigate the kinds of explanations available within a model of phonology which dispenses with the more traditional rules and derivations and instead sees government as the 'motor' which drives the phonology. In particular, the central concern of the issue is to show to what extent a variety of phonological events from a variety of languages can be successfully explained on the basis of this theoretical approach, and papers are encouraged which provide evidence both for and against different interpretations of the notion of 'government' in any aspect of phonological theory. Contributions should reach the editors not later than the beginning of December 1989.

Volume 8 (1991): The first issue will be non-thematic. Submissions should reach the editors not later than the beginning of July 1990.

Style A full set of notes for contributors is available from the editors. If possible, this should be obtained before the submission of a manuscript. Details are also given on the inside covers of previous volumes.

Proofs First proofs only will be sent to the (first-named) author, who will be expected to correct them and return them to the editors within three days of receipt.

Offprints 25 offprints will be supplied to each author. Further offprints may be purchased if they are ordered at proof stage.
