Nutritional status and body composition

Using multiple correspondence analysis to identify behaviour patterns associated with overweight and obesity in Vanuatu adults, A van Roon, CA Wetzel, MW Glucksman, AW Dancerwan, C Are, A Puisar, N Silverman, D Lee, L Dormio, CM Chalm, A Aman, MK Luo and AM Garruto. 1533

Visceral adiposity index is a better predictor of cardiovascular mortality than traditional adiposity measures: results from a population-based study, FG Ferreira, LJ Jian, WM de Souza and DG Longe. 1545

Behavioural nutrition

Frequency of eating alone is associated with adolescent dietary intake, perceived food-related parenting practices and weight status, cross-sectional family (FlA), Activity, Sun, Health, and Eating (FLASeH) Study results, M Neckle, C Straw, AM Anderson, J Rivera, M OsIPLEy, C Groule, O Amos, R Richards, C Jopson and DJ West. 1555

Early educators’ practices and opinions is related to pre-schoolers’ dietary intake at pre-school, J M Lob, C Kim, H Yopu and F Nwosu. 1567

Nutritional epidemiology

Discretionary intake among Australian adults: prevalence of intake, top food groups, time of consumption and its association with sociodemographics, lifestyle and adiposity measures, F Fayet-Moore, A McConnell, F Fayet-Moore, A McConnell, F Fayet-Moore, A McConnell. 1576

Eating habits in the population of the Italian elderly: an observational study, PI Spies, M Soncini, A Gaglisoni, M Cotzenes, S DiAloco, E Scilla, C Cerasoli, M Fucito, F Tarrabina and RM Mozzoni. 1590

Moderately elevated preconception fasting plasma total homocysteine is a risk factor for psychological problems in childbearing, J Roy, C Kandala, M Murphy, J Ferreira, B Rivier and J Garza. 1615

Variation in the food environment of small and non-traditional stores across racial segregation and corporate status, N Wolff, MM Cook, CL Cao, DT Erickson, L Verhoeckx and ZZ London. 1624

Association of abdominal scans, electrolyte levels with hypertension in a population with high salt intake, D. Le, J Chan, H Qiao and T Sal. 1635

Community nutrition

Neighbour home gardening predicts dietary diversity among rural Tanzanian women, BB Bukasi, AL Belo, O, Mokua, CM Coumou, K. Mwaluko, J. Mwita, MG Kivu, M Zanzula and M Mwana. 1646

A comparative analysis of the restaurant consumer food environment in Rochester (NY, USA) and London (ON, Canada): assessing children’s menus by neighborhood socio-economic characteristics, CM Doiron, RC Toole, C Arku, J Scudder and T Veldman. 1654

Sociodemographic predictors of inclusive branding among low-income women attending a Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) programme, JH Reddy, S Gallo, A Hadley, J Brady and D Gortmaker. 1667

Interventions

The short- and long-term impact of an incentive intervention on healthier eating: a quasi-experiment in primary and secondary school cafeterias in Brazil, BO Ferreira, R Gustafsson and LN Borradale. 1675

Public policy

How can diet in food industry self-substitution of food–health relationships underpinning health claims on food labels in Australia? C Jolliffe-Cole, HW Watson, G Hughes and A Chapman. 1886

Objective assessment of compliance with a state-wide school food-service policy via menu audits, O Myers, S Szauc, A Ferguson and S Pettigrew. 1896

Community nutrition

A systematic review of food garden-based interventions in the USA, A Fay, Rhoic, J Liu, Q. Chen, L Loomis and M McCaffrey. 1704

Interventions

Ingredient bundles and recipe labeling: in food pantries: a pilot study to increase the selection of healthy foods, C. Zhou, A Cutler-Shearer, M. McCale, M. White and W. Schwartz. 1717

Corrigendum

Ingredient bundles and recipe labeling: in food pantries: a pilot study to increase the selection of healthy foods – CORRIGENDUM, C. Zhou, A Cutler-Shearer, M. McCale, M. White and W. Schwartz. 1723

PhN PUBLIC HEALTH NUTRITION

Volume 22 - Number 9
June 2019

Available online at cambridge.org/phn
Aims and Scope

- build intelligence about the development, implementation, and evaluation of interventions and community nutrition programs and policies
- describe, discuss, and influence nutrition-related public health policy
- serve to build capacity for effective public health nutrition action, including workplace development and educational issues
- develop perspectives and models to study diet and nutrition as related to the environment and sustainability

We welcome papers that are innovative and contribute new knowledge to the literature. Papers should be succinct (i.e., usually under 5000 words not including the abstract, references, tables, figures and acknowledgements). Short communications (<2000 words) are welcome. We publish research, scholarship, and discussions that take a population and preventive approach. In addition to original contributions, ideas and suggestions for topics are also welcome. We publish special issues.

Public Health Nutrition is available on the Internet at https://journal.cambridge.org/phn

Editor-in-Chief
Dr. Mariza Hinde, Cancer Epidemiology Division, Cancer Council, Victoria, Australia and Dr. Vivienne Lowthian, School of Public Health, University of New South Wales, Australia

Deputy Editors
Dr. Kokabe Suga, Kobe Medical University, Kobe, Japan
Professor Sanjay Gupta, Department of Global Health, The George Washington University, Washington D.C., USA
Prof. Henrik Mortensen, Department of Public Health and Environment, Aalborg University, Denmark
Dr. Robert Vickers, University of North Carolina at Chapel Hill, USA

Senior Editors
Dr. Andrew M. Collett, Department of Public Health and Policy, Brown University, USA
Dr. Paul Sihvo, Centre for Epidemiology and Biostatistics, University of Liverpool, UK
Dr. Peter Christian, University of Pittsburgh, USA

Founding Editors
Dr. Cecilia Torriani, University of Buenos Aires, Argentina

Founding Honorary Editors
Professor Dr. Alida Melse, Dalhousie University, Canada
Dr. Joreintje Mackenbach, AMC, University of Amsterdam, The Netherlands
Dr. Carla Lopes, University of Porto, Portugal

Founding Consulting Editors
Dr. Nasrin Omidvar, University of Medical Sciences, Iran
Dr. Lea Minaker, University of Agder, Norway

Founding Editors Emeriti
Professor Dr. Alida Melse, Dalhousie University, Canada
Dr. Joreintje Mackenbach, AMC, University of Amsterdam, The Netherlands
Dr. Carla Lopes, University of Porto, Portugal

Founding Consulting Editors Emeriti
Dr. Nasrin Omidvar, University of Medical Sciences, Iran
Dr. Lea Minaker, University of Agder, Norway

International Editorial Board
Dr. Mercedes Beites, Double University, Argentina
Dr. Yousif Abou-Saad, University of Manchester, UK
Dr. Susan Gabriele, University of Dundee, UK
Dr. Ronnie Charlton, University of Melbourne, Australia
Dr. Mike Coppley, The University of Newcastle, UK
Dr. Anna de Villiers, South African Medical Research Council, South Africa
Professor Hilmar Dekker, University of Montreal, Canada
Dr. Collin Droit, St. Andrews University, UK
Dr. Minnah Doreen, Aga Khan School of Public Health, Karachi, Pakistan
Dr. Zachi Evenor, Ben-Gurion University of the Negev, Beer-Sheva, Israel
Dr. David Unwin, University of Otago, New Zealand

Professor Isabel Drake, Dalhousie University, Canada
Professor Professor Hélène Delisle, University of Montreal, Canada
Professor Dr. Katherine Livingstone, Deakin University, Australia
Professor Ass. Natasha Tasevska, University of California, USA
Dr. Alexis Hure, East Carolina University, USA
Dr. Dr. Aida Turini, Università degli Studi di Milano, Italy
Dr. Joreintje Mackenbach, AMC, University of Amsterdam, The Netherlands
Professor Dr. Víctor Dávila, Estadísticas de la Universidad de São Paulo, Brazil
Professor Ass. Natasha Tasevska, University of California, USA
Professor Maria Valente, University of Wollongong, Australia
Dr. Dr. Asko Tunturi, Finnish Institute of Occupational Health, Finland
Dr. Mathilde Carayon, Catholic University of Korea, Seoul, South Korea
Assoc. Prof. Nathalee Tatsuki, Arizona State University, USA
Dr. Diya Turan, Australian防 Cancer Council, Australia
Dr. Renee Sondi, Catholic University of Korea, Seoul, South Korea
Dr. Assaf Peretz, Tel Aviv University, Israel

Public Health Nutrition Notes for Authors

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

Original research findings and scientific reviews are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.

Editorials express the opinion of the journal, as represented by its editorial board. They appear on topics judged to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.

Position papers, including declarations and other statements of policy, may be invited or unsolicited.

Invited commentaries and book reviews are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.

Letters to the Editors are usually in response to material published in PHN. Submissions are sent to the author for comment and, when possible, published together with the author’s reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to http://mc.manuscriptcentral.com/phn. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to give referees names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, and book reviews) are reviewed by members of the Editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a complete copy of the “License to Publish” (in lieu of copyright transfer agreement), available at http://www.nutritionsummaries.org. It is the author’s responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (http://www.nutritionsummaries.org). Manuscripts should be in clear and concise English, and are comprehensible without reference to the text. Longer tables should be reduced to the simplest form and should not exceed 250 words.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting. Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Aims and Scope

Public Health Nutrition provides an international forum for the publication and dissemination of research and scholarship in the fields of nutrition and their impact on health, and for the discussion in the form of editorials, comments, and correspondence, with a specific focus on nutrition-related public health.

The scope of Public Health Nutrition encompasses nutrition and nutrition policy at a population level, including work on assessment of nutritional status and nutritional environments, communication of nutrition-related information, implementation of programs and interventions, and surveillance of dietary patterns, food systems and supplies. We welcome papers that:

- Analyse the determinants of nutrition status and surveillance of nutritional status or the quality of nutritional environments.
- Describe the development and evaluation of methodology for assessing, monitoring, and surveillance in population-based samples.
- Identify and analyze the social, cultural, psychological, economic, and political determinants of nutrition-related public health, and dietary and nutritional factors as determinants of health outcomes.

Public Health Nutrition provides an international forum for the publication and dissemination of research and scholarship in the fields of nutrition and their impact on health, and for the discussion in the form of editorials, comments, and correspondence, with a specific focus on nutrition-related public health.
