Public Health Nutrition

Volume 20, 2017 ISSN: 1368-9800
Eighteen issues per year

Public Health Nutrition provides an international forum for the publication and dissemination of research and scholarship in the form of peer-reviewed original papers and reviews, and for discussion in the form of letters, commentary, and correspondence, with a specific focus on nutrition-related public health. The scope of Public Health Nutrition encompasses nutrition and nutrition policy at a population level, including work on assessment, monitoring, and surveillance of nutritional health outcomes, health, and dietary and nutritional factors as determinants of health and disease.

Aims and Scope

• Serve to build capacity for effective public health nutrition action,
• Build intelligence about the development, implementation, and evaluation of interventions at the population level,
• Serve as a forum for discussion and debate on nutrition-related public health policy, and
• Build understanding and analysis of the environmental and social determinants of nutrition-related health outcomes.

Public Health Nutrition is available on the internet at: https://www.cambridge.org/phn

Public Health Nutrition

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on current issues and controversies. It also publishes special issues on major topics of international public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of this journal, and to note and follow the guidelines set out below.

Content:

• Original research findings and scientific reviews are to be full papers usually less than 5000 words,
• Discussion, diseases, debates and influence nutrition-related public policy,
• Address assessment, monitoring, and surveillance of nutritional health outcomes, health, and dietary and nutritional factors as determinants of health and disease.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to http://mc.manuscriptcentral.com/phnutr. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Reference: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editor) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a signed copyright grant of the ‘License to Publish’ (in lieu of copyright transfer), available at https://www.nutritionandsociety.org. It is the author’s responsibility to obtain written permission to reproduce any material (including tables and text) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (http://www.nutritionandsociety.org). Manuscripts should be written in English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. All figures, tables, and material should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-space, with at least 2 cm margins, and page and line numbering. All manuscripts should be submitted to http://mc.manuscriptcentral.com/phnutr. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Notes for Authors

Disclosure of financial support and any competing interests. The submission must include a statement within an Acknowledgements section referring to all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as a part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. Title page should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax number, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter as part of the manuscript, to enable double-blind reviewing.

2. Abstract should be structured, usually following the usual internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.

3. Text should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research that are: concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.

4. Acknowledgements (sources of funding, competing interests declared, etc.) should be provided. Authors should be listed in the order that they contribute to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as a part of the manuscript to allow for double-blind reviewing.

5. References should be in Vancouver style. Please refer to the full Directions to Contributors.

6. Tables should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensive without reference to figures. Long tables should be divided during the submission process, not as part of typeset manuscripts.

7. Footnotes should be limited to abbreviations.

Proofs: Corrections and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF of the proof free of charge, for checking. It is important that proofs be returned promptly. Authors must be charged for any alterations in excess of 10% of original typeset.

Offprints: The corresponding author will receive a PDF of the publisher’s free offprint. All others are available to purchase and must be ordered before publication.
