CONTENTs

EDITORIALS
Special Issue: Psychosis from early intervention to treatment resistance
McDonald, C. & Cotter, D.R. 239
Early intervention services for psychosis in Ireland: are we there yet?
Power, P. 243

ORIGINAL RESEARCH
Retrospective study of first episode psychosis in the Dublin Southwest Mental Health Service: demographics, clinical profile and service evaluation of treatment
Clarke, A.-M., McLaughlin, P., Staunton, J., Kenny, K., Power, B., Kearney, K., McGuinness, M. & Whitty, P. 240

SHORT REPORTS
The impact of switching to clozapine on psychiatric hospital admissions: a mirror image study
Kirwan, P., O’Connor, L., Sharma, K. & McDonald, C. 259
Retrospective study of a first-episode psychosis service embedded within a home-based treatment team
Nuala Murray & Karen O’Connor 265
Early intervention in psychosis in the North Lee Mental Health Services programme: a 5-year review
Lalovic, G., Screven, M. & O’Brien, S. 271

REVIEW ARTICLES
Treatment resistant schizophrenia – review and a call to action
Lally, J. & Gaughran, F. 279
The Cavan-Monaghan First Episode Psychosis Study (CAMFEPS): arbitrary diagnostic boundaries across the gene–environment interface and within evolving models of care
Waddington, J.L. & Russell, V. 293
Cortisol stress response in psychosis from the high-risk to the chronic stage: a systematic review
Dauvermann, M.R. & Donohoe, G. 305

PERSPECTIVE PIECE
Forging successful partnerships in psychosis research: lessons from the Cavan-Monaghan First Episode Psychosis Study

Irish Journal of Psychological Medicine Volume 36   Issue 4   DECEMBER 2019

Special Issue: Psychosis: from early intervention to treatment resistance
Guest Editors: David Cotter and Colm McDonald
The Key Papers are:
Special Issue: Psychosis from early intervention to treatment resistance
C. McDonald & D.R. Cotter
Early intervention services for psychosis in Ireland: are we there yet?
P. Power

John L. Waddington & Vincent Russell
Cortisol stress response in psychosis from the high-risk to the chronic stage: a systematic review
M. R. Dauvermann & G. Donohoe
Aims and Scope: Established in 1982, the Irish Journal of Psychological Medicine is dedicated to acting as an international forum for the publication of research on the science and practice of psychiatry. Its main aim is to disseminate original scientific research to a national and international readership with the objective of improving clinical practice and service development in mental health. The journal advocates for delivering high quality clinical care and improvement in mental health services, and is committed to keeping the field of mental health vibrant and relevant by publishing research on novel topics. Particular strengths and unique features of the Journal include a focus on Clinical Psychiatry, Youth Mental Health and the History of Psychiatry, with regular features and special issues devoted to these topics.

The Irish Journal of Psychological Medicine publishes research papers, short reports, review papers, editorials, case reports, historical papers, perspective pieces and book reviews. There are four editions published per year, for which rapid peer review process and publication is considered a priority. The journal regularly publishes special themed editions guest edited by internationally respected academics in a particular research field. With a progressive focus, the journal provides important reading for clinicians, researchers, policymakers and all professionals with an interest in mental health.
