CLASS CONFLICT AND COLLECTIVE ACTION

edited by LOUISE A. TILLY and CHARLES TILLY,
University of Michigan

Published in cooperation with the Social Science History Association

The contributors to **Class Conflict and Collective Action** break with the predominant definition of class conflict as societal tension-release, and instead see social movements as responses to the concerns of everyday life. Studying the effects of European proletarianization and capital concentration between 1750 and 1914, the essays seek to determine at what point class conflict generated a collective action, and how the historical forms of contention changed under the influence of capitalism and nationalization. Edited by noted scholars Louise and Charles Tilly, this book forms a vital contribution to the ultimate goal of a comparative history of the Western industrial working class.

Class Conflict and Collective Action, the first volume in Sage's *New Approaches to Social Science History* series, integrates a body of original and innovative material, using a common intellectual framework, a comprehensive introduction and conclusion, and tight and careful editing throughout. The book will hold great interest for those studying social history, European history, labor history, and research in power structures and the politics of collective action.
