

GLACIOLOGICAL LITERATURE

THIS selected list of glaciological literature has been prepared by J. W. Glen with the assistance of T. H. Ellison, W. B. Harland, Miss D. M. Johnson, G. T. Warwick and the Staff of the Scott Polar Research Institute. Its field is the scientific study of snow and ice and of their effects on the earth; for the literature on polar expeditions, and also on the "applied" aspects of glaciology, such as snow ploughs, readers should consult the bibliographies in each issue of the *Polar Record*. For Russian material the system of transliteration used is that agreed by the U.S. Board on Geographic Names and the Permanent Committee on Geographical Names for British Official Use in 1947. Readers can greatly assist by sending reprints of their publications to the Society, or by informing Dr. Glen of publications of glaciological interest.

GENERAL GLACIOLOGY

- [INTERNATIONAL GEOPHYSICAL YEAR, 1957-58.] *The United Kingdom contribution to the International Geophysical Year 1957-58*. London, Royal Society, 1957. 72 p. 10s. [Historical background, present programme and station lists. Establishment and programme of Halley Bay base.]
- JONES, Sir H. S. The International Geophysical Year. *Proceedings of the Royal Institution of Great Britain*, Vol. 36, Part 1, No. 162, 1956, p. 172-89. [Full exposition of aims and general plans of International Geophysical Year by General Editor of Publications of the Special Committee of the I.G.Y.]
- LEBEDEV, V. L. *Antarktika [The Antarctic]*. Moscow, Gosudarstvennoye Izdatel'stvo Geograficheskoy Literatury [State Publishing House for Geographical Literature], 1957. 192 p. [Physical geography: land ice, sea ice, climate, flora and fauna, oceanography.]
- TAYLOR, A. *Physical geography of the Queen Elizabeth Islands, Canada*. New York, American Geographical Society, 1956. 12 vols. (Contract No. Nonr-1070 (00).) [Vol. 1: introduction; geology. Vol. 2: glaciology. Vols. 3-10: physiography. Vol. 11: bibliography. Vol. 12: maps.]

GLACIOLOGICAL INSTRUMENTS AND METHODS

- ASHBURN, E. V., and others. Narrow pass band albedometer, by E. V. Ashburn, C. P. Pentoney, Z. W. Hohanshelt and R. G. Weldon. *Review of Scientific Instruments*, Vol. 27, No. 2, 1956, p. 90-91. [Instrument to determine variation of albedo with wavelength.]
- ROBIN, G. de Q. Measurement of ice thickness in polar regions. *Times Science Review*, Spring 1957, p. 13-14. [Technique of refraction and reflection shooting.]
- SKJØLDEBRAND, R. An infrared spectrophotometer and its use for the isotopic analysis of heavy water. *Applied Scientific Research, Sect. B*, Vol. 5, No. 5, 1956, p. 401-08. [Fast and accurate method for determining D₂O concentration in H₂O.]

PHYSICS OF ICE

- ALPERT, L. Crystallization of supercooled water by ultrasonic irradiation. *Journal of Meteorology*, Vol. 13, No. 3, 1956, p. 317-18. [Brief review.]
- BOWDEN, F. P. Adhesion and friction. *Endeavour*, Vol. 16, No. 61, 1957, p. 5-18. [Includes results of experiments on adhesion and friction of ice and snow.]
- BRILL, R., and CAMP, P. Influence of pressure on the dielectric properties of ice. *Nature*, Vol. 179, No. 4560, 1957, p. 623-24. [Experiments show that a small change takes place.]
- CARTE, A. E. The freezing of water droplets. *Proceedings of the Physical Society, Ser. B*, Vol. 69, No. 442B, 1956, p. 1028-37. [Observations of supercooling of small droplets.]
- GREEN, R. E., jr., and MACKINNON, L. Determination of the elastic constants of ice single crystals by an ultrasonic pulse method. *Journal of the Acoustical Society of America*, Vol. 28, No. 6, 1956, p. 1292. [Measurement of c_{33} and c_{44} .]
- JAFFRAY, J., and MONTMORY, R. Congélation orientée de l'eau surfondue sur des surfaces cristallines : cas du mica muscovite. *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences*, Tom. 243, No. 2, 1956, p. 126-29. [Orientation relation between lattices of ice and mica onto which it is frozen.]
- KRÜGER, G. J., and MAGUN, S. "Negative" Schneekristalle. *Photographie und Forschung*, Ht. 8, 1955, 8 p. [Development of "negative" crystals in ice called by Tyndall "Ice flowers" and formerly by Germans "Tyndallsche Schmelzfiguren".]
- LAVROV, V. V. Vyazkost' l'da v zavisimosti ot temperatury [Temperature dependence of ice viscosity]. *Zhurnal Tekhnicheskoy Fiziki [Journal of Technical Physics]*, Tom 17, No. 9, 1947, p. 1027-34. [Laboratory experiments, paying special attention to crystalline structure of ice. English translation: SIPRE Translation No. 5.]
- NISSAN, A. H. Hydrogen-bond strength of ice. *Nature*, Vol. 178, No. 4547, 1956, p. 1411-12. [Probable value of hydrogen bond energy estimated for ice and water.]
- PRUPPACHER, H. R., and SÄNGER, R. Mechanismus der Vereisung untermühlter Wassertropfen durch disperse Keimsubstanzen. *Zeitschrift für Angewandte Mathematik und Physik*, Vol. 6, Fasc. 5, 1955, p. 407-16; Fasc. 6, 1955, p. 485-93. [Experiments on the freezing of droplets in the presence of various nucleating substances and discussion of theory of nucleation. English summaries p. 416, 493.]
- RUNDLE, R. E. The structure of ice. *Journal of Physical Chemistry*, Vol. 59, No. 8, 1955, p. 680-82. [Discussion of the question of whether ice has a polar or non-polar structure.]

LAND ICE. GLACIERS. ICE SHELVES

- ABEL, G. Salisburgo, il paese delle grotte di ghiaccio. *Atti del VII Congresso Nazionale di Speleologia, Sardegna, 3-8 Ottobre 1955.* [Como, 1956], p. 256-62. [Short account of ice-caves in the Salzburg District, Austria.]
- AVSYUK, G. A. Temperatura l'da v lednikakh [Temperature of ice in glaciers]. *Trudy Instituta Geografi [Transactions of the Institute of Geography]*, Vypusk 67, 1956, p. 63-141. [Author distinguishes five types of glacier by temperature regime; expanded version of his paper in *Izvestiya Akademii Nauk SSSR. Seriya Geograficheskaya*, 1955, No. 1, p. 14-31.]
- BROCKAMP, B. Seismische Beobachtungen des grönlandischen Inlandeises. *Berichte des Meteorologisch-Geophysikalischen Institutes zu Frankfurt a.M. und seines Taunus-Observatoriums*, No. 6, 1956, p. 18-24. [Discussion of the importance of seismic techniques in solving various problems of ice cover.]
- BUGAYEV, V. A. Na lednike Fedchenko [On the Fedchenko glacier]. Leningrad, Gidrometeorologicheskoye Izdatel'stvo [Hydrological and Meteorological Publishing House], 1948. 48 p. [Investigation of this glacier in Pamirs since its discovery, with special reference to author's expedition of 1946.]
- [CANADA: GLACIOLOGY.] Glaciological research in western Canada in 1956. *Canadian Alpine Journal*, Vol. 40, 1957, p. 96-98. [On British Columbian glaciers; some results of depth and flow measurements given.]
- COOK, J. C. Some observations in a northwest Greenland crevasse. *Transactions. American Geophysical Union*, Vol. 37, No. 6, 1956, p. 715-18. [Results of 1955 studies.]
- HUBLEY, R. C. An analysis of surface energy during the ablation season on Lemon Creek Glacier, Alaska. *Transactions. American Geophysical Union*, Vol. 38, No. 1, 1957, p. 68-85. [Results of studies 1953-54. Turbulent transfer of energy the most important factor in causing ablation.]
- HUBLEY, R. C. Glacier studies during the International Geophysical Year, 1957-58. *American Alpine Journal*, Vol. 10, No. 2, 1957, p. 97-101. [Importance of data to be collected on glacier fluctuation, meteorology, etc.]
- LIESTOL, O. Glacier dammed lakes in Norway. *Norsk Geografisk Tidsskrift*, Bd. 15, Ht. 3-4, 1955-56, p. 122-49. [Regime and development of Mjølkedalsvatn, Demmvatn, Skadevatn, Brimkjelen, Kollevatn, Blomster-skardvatnet, and lakes at Østerdalsisen and Strupskardet.]
- LLIBOUTRY, L. La mécanique des glaciers en particulier au voisinage de leur front. *Annales de Géophysique*, Tom. 12, Fasc. 4, 1956, p. 245-76. [Theory of glacier flow in particular near the snout; includes criticisms of Nye's theories on flow and crevasse formation.]
- MAGNANI, M. Glacialismo, depósitos glaciares y fenómenos periglaciales en la región de Santa Cruz: observaciones 1947-1955-(1). *Revista de la Facultad de Ciencias Exactas Físicas y Naturales*, Año 17, Nos. 3-4, 1955, 11 p. [Present glacier cover, glacial deposits and periglacial features in the Santa Cruz territory of Argentina.]
- MANLEY, G. Glaciers and the changing climate. *New Scientist*, No. 17, 1957, p. 33-35. [Climatic change as shown by behaviour of glaciers; the International Geophysical Year and its plans in this connexion.]
