Index

2+1 gravity, 230

Abelian group of loops, see group of loops, Abelian
acceleration terms, 203, 204
ADM, 164
aether, 240
Alexander, 245, 262
algebraic constraint, 31, 37, 262, 286
ambient isotopy, 240
annihilation operator, 94, 99
anomaly, 298
area
  derivative, 2
  operator, 225
Arf invariant, 262
Ashtekar variables, see new variables

Bargmann quantization
  harmonic oscillator, 103
  Maxwell theory, 105
Bianchi identities, 13
biology, 248
Borromean rings, 239
bracket polynomial, 247
braid group, 243
  intersecting braids, 251
  representations, 249
Brillouin zone, 158

Casson, 262
Cauchy
  completion, 78
  surface, 165
characteristic function, 197
Chen integral, 5
Chern–Simons, 185, 254, 292
cluster approximation, 150
coherent states, 95
confinement, 124
connection derivative, see derivative, connection
connection representation, 179
constraint algebra, 177
Conway, 245, 262
covariant lattice theory, 133
creation operator, 94, 99
cylindrical measure, 79

deficit angle, 232
degeneracy problem, 185
derivative
  connection, 17
  contact, 21
  loop, 8
DeSitter, 186
diffeomorphism, 22, 46, 47, 79, 169
differential constraint, 31
Dirac
  quantization, 61
  theory, 54
disorder parameter, 126

Einstein equations, 164
Einstein–Maxwell theory, 215
extended loop representation
  Maxwell, 109
  quantum gravity, 275
  constraints, 280
  physical states, 289
  regularization, 291
  wavefunctions, 277

extended loops
  generators, 36
  group of, 32
  holonomy, 68
  loop coordinates, 38
  special extended group, 33
  extrinsic curvature, 166

factor ordering, 180
fermion doubling, 158
Fierz identity, 257
Fock representation, 92
gauge theories
  lattice $SU(2)$, 144
  lattice $Z(2)$, 133
  Maxwell, 88
  Yang–Mills, 58, 113
gauge transformations, 26, 60
  large, 58
Gauss
  law, 60, 91, 216
  linking number, 49, 128, 239, 248, 272
general relativity
  Lagrangian formulation, 164
group of loops, 2
  Abelian, 89
  infinitesimal generators, 7
  representations, 25
Hamiltonian constraint, 169, 176, 179
  action on Wilson loop, 182
  extended representation, 282
  loop representation, 190, 195, 197
Hamiltonian lattice gauge theory, 138
Hamiltonian, Yang–Mills theory, 59, 119
Higgs, 126
Hilbert space, 57
holomorphic, 103
holonomy, 1, 6
HOMFLY polynomial, 247
homotopy group, 233
hoops, 6
  inequalities, 86
  intersecting loops, 117, 183
  isotopy, 240
Jones polynomial, 246, 254, 263, 265
Kalb–Ramond fields, 218
Kauffman bracket, 247, 264
knot, 47
  class, 196
  intersecting, 251
  polynomials, 242
  theory, 239
lattice, 131
loop
  average in QCD, see Makeenko–Migdal equation
definition, 2
  transform, 74, 76
loop representation, 72
  $SU(2)$ Yang–Mills theory, 118
  $SU(N)$ Yang–Mills theory, 121
  Maxwell theory, 96
  quantum gravity, 188
  quantum gravity constraints, 189, 192
  wavefunctions, 84
