# ROBOTICA

An IFAC-Affiliated Journal, and an  
Official Journal of the IFR.

International Journal of Information, Education and Research  
in Robotics and Artificial Intelligence

---

## EDITORS

Professor Jian S. Dai, *Centre for Robotics Research, King's College London, United Kingdom*

*E-mail: jian.dai@kcl.ac.uk*

Professor Giuseppe Carbone, *Department of Mechanical, Energy and Management Engineering, University of Calabria, Rende, Italy*

*E-mail: giuseppe.carbone@unical.it*

## EDITORIAL BOARD

See the following link for up to date editorial board details: <https://www.cambridge.org/core/journals/robotica/information/about-this-journal/editorial-board>

*Robotica* aims to be an outlet for publication of original papers of the highest quality in the field of Robotics and closely related areas. This includes: novel robotic mechanism and actuator design; robot kinematics, dynamics and control; computer vision; sensor fusion; teleoperation and haptic interfaces; robot motion planning; and artificial intelligence. In addition, papers that apply techniques from Robotics to other fields are also welcome. Examples include dynamics and control models applied to biological systems, the description of implementations of robots in factories, service and agricultural settings, and general mechatronic design. Works may be theoretical, computational or experimental, or some combination. Both short papers (rapid communications), and longer archival papers are welcome. Proposals for special issues on topics of current interest are welcome, and can be submitted via email to the editor.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.
