The *Lichenologist* is an international journal and welcomes papers and short communications from contributors anywhere in the world on any aspect of lichenology.

Manuscripts must be original, clearly and precisely presented in English and electronic versions submitted to *The Lichenologist* ScholarOne website <http://mc.manuscriptcentral.com/lich> following the on-screen instructions. Please note that submission must be done from *The Lichenologist* ScholarOne account belonging to the Corresponding Author. Authors submitting a manuscript do so on the understanding that, if it is accepted, copyright of the paper will be assigned exclusively to the publisher (see Copyright below).

Key words. Supply 3–6 key words or phrases in addition to those in the title.

Text. This must be word processed on A4 (210×297 mm) or letter (8.5×11 inch) in double spacing with 2.5 cm margins all round. On all points of style concerning text and tables consult recent copies of the journal. Words to be italicized should be either underlined or typed in italics but not both. Complete scientific names (genus, species and authority) must be cited at first mention. Thereafter the generic name may be abbreviated to the initial except at the beginning of a sentence or where the abbreviation might result in confusion with other genera. Recent issues should be consulted for layout of new species, new combinations, synonymy and lists of specimens examined. Examples of style are given below. All nomenclatural novelties must be deposited in MycoBank <http://www.mycobank.org> and the MycoBank number included after the taxon name; this is intended to minimize future confusion and make taxonomic data more widely available. The spelling of locality names in the British Isles and abroad must follow the most recent editions of maps published by the Ordnance Survey and *The Times Atlas of the World*, respectively.

Examples of style employed in

(a) description of new species:

**Ramalina jamesii** Krog sp. nov.

MycoBank MB128348

Thallus saxicola, ascendens vel plus minusve inclinatus . . . etc.

Typus: Portugal, Madeira, Porto Santo, Pico do Facho, 33°05′N, 16°19′W, on acidic rock, 350 m alt., 7 April 1988, H. Krog & E. Timdal 6163 (O—holoty whole, BM, UPS—lectoty whole).

(b) citation of described species or new combinations:

**Pyrenopezis furfuracea** (Nyl.) Th. Fr.

_Bot. Notiser_ 58 (1866): 58 (1866); type: Scotland, Ben Lawers, 1864, Jones (H—NYL 42916—lectotype; BM—isolectotype).

(c) citation of specimens examined:

Long lists of citations are discouraged. Data should be reproduced as either maps or lists containing only data essential for locating specimens. Complete lists, with the above format, can be deposited with *The Lichenologist* and other appropriate Institutions, and their location noted in the text.

Tables. These must be self-explanatory and each presented on separate pages outside the main text. A short title should be provided with any additional information contained in footnotes. Vertical columns should be separated by spacing; vertical lines must be avoided.

Figures. Refer to all _drawings_, _diagrams_, _graphs_ and _photographs_ as figures. These should be of the highest quality and suitable for direct reproduction after reduction where appropriate. Each figure should be presented as a separate file. Plan figures to appear within a single column (67 mm) or for reproduction across two columns (139 mm).

**Drawings**, **diagrams** and **graphs**. Preferred symbols for graphs are ▪, ○, ■, □, △, ▴; keys to symbols, etc, should be given in figure legends. Tick marks should be placed inside the axes of graphs and half tones should be avoided.

**Photographs** (colour or black and white: note that there is a page charge for colour—see Charges below) should be submitted at the size they will appear.

Subdivisions of figures should be labelled with capital letters, e.g. A, B, C, etc. All _legends_ for figures should be provided on a separate page to be included with the text of the paper after the references.

Format for supplying electronic artwork.

To ensure that your figures are reproduced to the highest possible standards and your article is published as quickly and efficiently as possible, we recommend the following formats and resolutions for supplying electronic figures.

Please ensure that your figures are saved at final publication size and are in our recommended file formats.

**Line artwork** (e.g. graphs, drawings histograms, diagrams)

Format: tif or eps

Colour mode: black and white (also known as 1-bit)
Resolution: 1200 dpi  
Size: please size to final publication size

**Combination artwork (line/tone)**  
Format: tif or eps  
Colour mode: grayscale (also known as 8-bit)  
Resolution: 800 dpi  
Size: please size to final publication size

**Black and white halftone artwork** (e.g. photographs)  
Format: tif  
Colour mode: grayscale (also known as 8-bit)  
Resolution: 300 dpi  
Size: please size to final publication size

**Colour halftone artwork** (e.g. photographs)  
Format: tif  
Colour mode: CMYK colour  
Resolution: 300 dpi  
Size: please size to final publication size

**References.** Citations in the text should take the form: Green & White (2004) or (Brown 1999a, b, 2001; Smith & Jones 1999). Multiple citations should be ordered chronologically. When papers are by three or more authors, give only the name of the first author followed by *et al.* (e.g. Halonen *et al.* 1998) throughout the text.  
At the end of the text, list the references alphabetically using the following standard forms:

References should be listed in alphabetic sequence with: single authors, by date; two authors, alphabetically, then by date; three or more authors by date only. When papers are by more than ten authors, give the names of only the first ten followed by “*et al.*”.

**Abbreviations, etc.** For guidance on units, symbols, chemical nomenclature and abbreviations consult author guideline for the *The New Phytologist*.

**Copyright.** Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the British Lichen Society. The Copyright Transfer Agreement, a copy of which is sent with the proofs or can be found on the journal home page listed on the back cover, should be signed by the appropriate person(s) and should accompany the original submission of a manuscript to this journal. The transfer of copyright does not take effect until the manuscript is accepted for publication. Copyright in the paper for the United States of America shall be assigned to the Society. It is the policy of the publisher that authors need not obtain permission in the following cases only: (1) to use their original figures or tables in their future works; (2) to make copies of their papers for use in their classroom teaching; and (3) to include their papers as part of their dissertations.

**Offprints.** In consideration for the assignment of copyright, the Society will supply 25 offprints and a pdf file of each paper or Short Communication but not of Book Reviews. Further reprints can be ordered at extra cost directly from Cambridge University Press when the author returns the proofs of their article.

**Charges.** Page charges are not levied. Authors are responsible for the cost of coloured illustrations and should consult the Senior Editor regarding current charges.

**Book Reviews.** Books dealing with any aspect of lichenology will be reviewed. Publishers wishing to have works reviewed in *The Lichenologist* should send them to Dr A. Fletcher, 117 Sycamore Way, Littlethorpe, Leicester LE19 2HW, UK (a.fletcherfletcher@btinternet.com), in the first instance.

**Notice:** While the Senior Editor and Editors endeavour to check the accuracy of statements in contributions in as far as they are able, it should be emphasized that views expressed in papers in *The Lichenologist* are those of their authors and do not necessarily represent those of the British Lichen Society, Cambridge University Press, the Senior Editor, or the members of the Editorial Board.

Senior Editors
Julian Wiseman, University of Nottingham, UK
Animal papers
Robert E. L. Naylor, University of Aberdeen, UK
Crop & Soil papers

The Journal of Agricultural Science publishes papers concerned with the advance of agriculture and the use of land resources throughout the world. It publishes original scientific work related to strategic and applied studies in all aspects of agricultural science and exploited species, as well as reviews of scientific topics of current agricultural relevance.

GENETICS RESEARCH

Formerly published as Genetical Research

Senior Executive Editor
T. F. C. Mackay, North Carolina State University, USA

Executive Editors
D. J. Finnegan, University of Edinburgh, UK
W. G. Hill, University of Edinburgh, UK
Shizhong Xu, University of California, USA

Genetics Research is a key forum for original research on all aspects of genetics. Building on the success and history of its previous incarnation, Genetical Research, the journal has a publishing remit that provides comprehensive coverage of subjects vital to the field.

The breadth and quality of papers, reviews and book reviews make the journal invaluable to geneticists, evolutionary biologists, plant and animal breeders and molecular biologists.

Articles

LAUNDON, J. R.  
Levana antiqua, a new saxicolous species from Great Britain, and the nomenclature and authorship of L. albens, L. conferta and L. muralis 651

PRIETO, M., ARAGÓN, G. and MARTÍNEZ, J.  
The genus Catapyrenium s. lat. (Fissurariaceae) in the Iberian Peninsula and the Balearic Islands 657

VONDRAK, J., SOHN, J., SOGAARD, M. Z., SOCHTING, U. and ARUP, U.  
Caloplaca phlegina, a lichen with two facies; an example of infraspecific variability resulting in the description of a redundant species 685

GIRALT, M., van den BOOM, P. P. G., TØNSBERG, T and ELIX, J. A.  
A first modern contribution to Caloplaca biodiversity in South Korea: two new species and some new country records 715

JOHNGENSEN, P. M. and SCHUMM, F.  
Parmelia borbonica, a new lichen species from Réunion 697

DUBE, A. and MAHIJA, U.  
Occurrence of four additional non-hairy species of Leptogium from Maharashtra, India 701

DUBEY, U., UPRETI, D. K. and NAYAKA, S.  
A new species of Leisorrumus Eschw. from India 711

JOHNSON, Y. WANG, X. Y., YAMAMOTO, Y., KOH, Y. J. and HUR, J.-S.  
Determination of usnic and perlatolic acids and identification of olivetoric acids in Northern reindeer lichen (Cladonia stellaris) extracts 727

GIRALT, M. and ELIX, J. A.  
Additions to the Placopsis mycoflora (Tscopeae, Ascomycota) of southern South America, with notes on new records (including Aspiciliopsis macrophthalma), and a revised regional key to the species 751

ETAYO, J., GIRAULT, M. and ELIX, J. A.  
Buellia rhizosoraria, a new corticolous species from Mexico 725

GALLOWAY, D. J.  
Population genetics in the homothallic lichen-forming ascomycete Xanthoria parietina 751

SMEDS, A. I. and KYTÖVIITA, M.-M.  
Determinant of usnic and perlatolic acids and identification of olivetoric acids in Northern reindeer lichen (Cladonia stellaris) extracts 759

ITTEN, B. and HONEGGER, R.  
The genus Catapyrenium s. lat. (Fissurariaceae) in the Iberian Peninsula and the Balearic Islands 657

Short Communication

GIRALT, M. and ELIX, J. A.  
New morphological and chemical data for Buellia imshaugii 763

Book Reviews

GIRALT, M. and ELIX, J. A.  
New morphological and chemical data for Buellia imshaugii 767
