

THE JOURNAL OF HYGIENE

EDITED BY

GEORGE H. F. NUTTALL, M.D., PH.D., SC.D., F.R.S.

QUICK PROFESSOR OF BIOLOGY IN THE UNIVERSITY OF CAMBRIDGE

IN CONJUNCTION WITH

JOHN S. HALDANE, M.D., LL.D., F.R.S.,
Late Reader in Physiology in the University of Oxford.

ARTHUR NEWSHOLME, C.B., M.D.,
Medical Officer to the Local Government Board.

CHARLES J. MARTIN, M.B., D.Sc., F.R.S.,
Director of the Lister Institute, London.

J. C. G. LEDINGHAM, M.B., D.Sc.,
Bacteriologist-in-Chief, Lister Institute, London.

G. S. GRAHAM-SMITH, M.D.,
University Lecturer in Hygiene, Cambridge.

M. GREENWOOD, JUNR., M.R.C.S.,
Statistician, Lister Institute, London.

THE UNIVERSITY OF CHICAGO SCIENCE SERIES

This series recently established by the Trustees of the University owes its origin to a feeling that there should be a medium of publication occupying a position between the technical journals, with their short articles, and the elaborate treatises which attempt to cover several or all aspects of a wide field. The volumes of the series will differ from the discussions generally appearing in technical journals in that they will present the complete results of an experiment or series of investigations which have previously appeared only in scattered articles, if published at all. On the other hand they will differ from detailed treatises by confining themselves to specific problems of current interest and in presenting the subject in as summary a manner and with as little technical detail as is consistent with sound method. They will be written not only for the specialist but also for the educated layman. The size of the volumes will range from fifty to one hundred and fifty pages.

THE FIRST PUBLISHED VOLUME OF THE SERIES

The Evolution of Sex in Plants. By JOHN MERLE COULTER, Head of the Department of Botany in the University of Chicago. viii + 140 pages, small 12mo, cloth; 4s. net.

In this first volume of the new "University of Chicago Science Series" Professor Coulter, the editor of the *Botanical Gazette* and the author of numerous volumes on botanical science, has given a presentation of the results of research showing that all reproduction is the same in its essential features and all methods of reproduction are natural responses to the varying conditions encountered by plants in their life histories. Sex reproduction, the author says, is simply one kind of response, the sex feature not being essential to reproduction, but securing something in connection with the process. Various phases of the subject discussed include the evolution of sex organs, the alternation of generations, the differentiation of sexual individuals, and parthenogenesis. The last chapter, which offers a theory of sex, reviews the more prominent facts set forth in preceding parts of the volume, and serves both as a summary and a working hypothesis.

OTHER VOLUMES IN PREPARATION FOR EARLY PUBLICATION

The Origin of the Earth. By THOMAS C. CHAMBERLIN, Head of the Department of Geology in the University of Chicago.

The Isolation and Measurement of the Electron. By ROBERT ANDREWS MILLIKAN, Professor of Physics in the University of Chicago.

Finite Collineation Groups. By HANS F. BLICHFELDT, Professor of Mathematics in Leland Stanford Junior University.

OTHER VOLUMES PLANNED AND IN PREPARATION

The Evolution of Reptiles. By SAMUEL WENDELL WILLISTON.

Food Poisoning. By EDWIN OAKES JORDAN.

The Problem of Individuality in Organisms. By CHARLES MANNING CHILD.

The Development of a New System of Organic Chemistry, Based on Dissociation Concepts. By JOHN ULRIC NEF, with the co-operation of J. W. E. GLATTFELD.

The Living Cycads. By CHARLES JOSEPH CHAMBERLAIN.

Mechanics of Delayed Germination in Seeds. By WILLIAM CROCKER.

The Rigidity of the Earth and of Materials. By ALBERT A. MICHELSON.

The Problem of Fertilization. By FRANK R. LILLIE.

Linear Integral Equations in General Analysis. By ELIAKIM HASTINGS MOORE.

Volume XV. 1915—17

Cambridge
at the University Press

1917

CONTENTS

NO. 1 (JULY, 1915).

	PAGE
HEWLETT, R. T. and REVIS, C. On a Complement-stimulating Substance in Cow's Milk	1
BROWNLEE, J. Studies in the Meaning and Relationships of Birth and Death Rates	
II. Density of Population and Death Rate (Farr's Law)	11
III. The Constitution of a Death Rate. (With one Chart)	17
IV. On the Range of Instances in which Geometrical Progressions describe numerically processes of life, i.e. those processes which might be explained by a monomolecular reaction	25
V. On the difficulty that in applying the laws of physical chemistry to life processes, indices occur which suggest the actions of fractions of a molecule	33
RADCLIFFE, J. A. D. Complement Fixation in Pulmonary Tuberculosis	36
MACKINTOSH, J., PENNINGTON, S. and WILLIAMS, R. S. The Supply of Non-tuberculous Dairy Stock	51
HAFFKINE, W. M. Concerning Inoculation against Plague and Pneumonia and the Experimental Study of Curative Methods	64
FLETCHER, W. The Wassermann and Luetin Reactions in Leprosy	102
EWART, R. J. The Influence of Age of the Grandparent at the Birth of the Parent on the Number of Children born and their Sex. (With one Text-figure)	127
TAYLOR, F. E. The Sterilisation of Vaccines; and the Influence of the Various Methods Employed on their Antigenic Properties. (With one Chart)	163

NO. 2 (JANUARY, 1916).

	PAGE
JONA, J. L. A Contribution to the Experimental Study of Fever. (With nine Charts and one Text-figure)	169
GRIFFITH, F. On the Pathology of Bovine Actinomycosis	195
EWART, R. J. The Influence of the Age of the Parent at the Birth of Offspring on the Age at which they are attacked by some of the Zymotic Diseases, with special reference to the Epidemiology of Scarlet Fever. (With two Charts)	208
EASTWOOD, A. and GRIFFITH, F. The Characteristics of Tubercle Bacilli in Human Bone and Joint Tuberculosis	257
EASTWOOD, A and GRIFFITH, F. The types of Tubercle Bacilli occurring in Tuberculosis of the Human Genito-urinary Tract	310

NO. 3 (SEPTEMBER, 1916).

GREEN, A. B. The Australian Epidemic, 1914	315
SAVAGE, WILLIAM G. and READ, W. J. The Significance of Strepto- cocci in Water Supplies	334
TSURUMI, M. A Contribution to the Study of Amboceptors and Receptors. Second Communication on Heterologous Immunity to Malignant Mouse Tumours	352
Third Communication on Heterologous Immunity to Malignant Mouse Tumours	365
DUKE, H. LYNDBURST. Trypanosomiasis in Northern Uganda. (With Map)	372
HOMER, ANNIE. An Improved Method for the Concentration of Anti- toxic Sera	388
HOMER, ANNIE. A Suggestion as to the Cause of the Lessened Produc- tion of Indol in Media Containing Glucose	401
EASTWOOD, A. Bacteriological Aspects of the Meningococcus Carrier Problem	405

Contents

vii

	PAGE
GRIFFITH, FRED. Identification of the Meningococcus in the Nasopharynx with Special Reference to Serological Reactions	446
SCOTT, W. M. A Study of Meningococci occurring in the Spinal Fluid and of Similar Organisms in the Naso-pharynx	464

NO. 4 (FEBRUARY, 1917).

PRIESTLEY, H. The Mechanism of the Agglutination Reaction	485
NICOLL, W. Flies and Typhoid	505
PHILIP, W. M. and HIRST, L. F. A Report on the Outbreak of the Plague in Colombo. 1914—1916. (With five Maps and one Chart)	527
PIRIE, J. H. HARVEY. Observations on East African Bacillary Dysentery	565
HOMER, A. On Factors Limiting the Extent of the Concentration of Antitoxic Sera by the Fractional Precipitation Methods at present employed	580
INDEX OF AUTHORS	591
INDEX OF SUBJECTS	593
