Public Health Nutrition
Volume 24, 2021 ISSN: 1368-9800
Eighteen issues per year

Public Health Nutrition provides an international forum for the publication and dissemination of research and scholarship in the form of peer-reviewed original papers and reviews, and for discussion in the form of editorials, commentaries, and correspondence, with a specific focus on nutrition-related public health.

The scope of Public Health Nutrition encompasses nutrition and nutrition policy at a population level, including work on assessment of nutritional status and nutritional environments, communication of nutrition-related research, implementation of programs and interventions, and sustainability of dietary patterns, food systems and supplies. We welcome papers that:

- Address assessment, monitoring, and surveillance of nutritional status or the quality of nutritional environments.
- Describe the development and evaluation of methodology for nutritional assessment, and policies and politics of population-based research.
- Identify and analyse behavioural, social, cultural, environmental, economic, and political determinants of nutrition-related public health, and dietary and nutritional factors as determinants of health outcomes.

International Editorial Board

Dr. Theo Bedford-Richards, Dublin University
Dr. Jennifer Brown, Dublin University, Australia
Dr. Gabriela Buyanovac, Well School of Public Health, Melb., Australia
Dr. Joan Regino Ribeiro de Castro, Jose de R Ribeiro University, Brazil
Dr. Alexandra Costa, The University of British Columbia, Canada
Prof. Anna-Dorota Czernichow, University of Paris, France

Dr. Carolina Bejar, University of Porto, Portugal
Dr. Katharina Livengston, Dublin University, Australia

Aims and Scope

- Build intelligence about the development, implementation, and evaluation of interventional and community nutrition programs and policies.
- Discuss, debate, and influence nutrition-related public policies.
- Build capacity for evidence-based public health nutrition action, including workforce development and educational issues.
- Develop perspectives and insights on trial data and nutrition as related to the environment and sustainability.
- We prefer papers that are innovative and contribute new knowledge to the literature. Papers should be concise (i.e., usually well under 5000 words not including the abstract, references, tables, figures and acknowledgments). Short communications (<2000 words) are welcome. We publish research, scholarship, and discussions that are new, important, and potentially useful to decision makers, and ideas for topics for future publications are always welcome. We publish special issues.

Public Health Nutrition is available on the Internet at: journals.cambridge.org/phn

The Nutrition Society

The society has as its objectives the advancement of the scientific study of nutrition and its application to the maintenance of human and animal health.

Particulars of The Nutrition Society and applications for membership are available from the Honorary Secretary, The Nutrition Society, 50 Camberwell Road, London SE5 7UQ, UK. Telephone: +44 (0)20 7602 0228, Fax: +44 (0)20 7602 1756.

Public Health Nutrition Notes for Authors

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews, of key topics, and for discussion of and debate on current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Disclaimer of financial support and any competing interests. The submission must include a statement within an Acknowledgments section reporting competing interests (financial and non-financial), all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and it should not be included as part of the manuscript to allow double-blind reviewing.

Arrangement of papers

1. Title page should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover sheet, not as part of the manuscript, to enable double-blind reviewing.

2. Abstract should be structured, usually following the following internal headings: Objective; Design, Setting, Subjects; Results; Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.

3. Text should be divided under headings (typically to include Introduction, Methods, Results, Discussion, and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasizing that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee. Authors should indicate in the Declarations section if the manuscript should be provided during the submission process, not as part of the manuscript.

4. Acknowledgements (sources of funding, competing interests declaration) should be included. Authors are encouraged to list individuals who should be provided during the submission process, not as part of the manuscript.

5. References should be in Vancouver style. Please refer to the full Directions to Contributors.

6. Tables should be provided in the complete form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.

7. Figures should be numbered, and legends should be provided. Each figure, with its legend, should be accompanied by a concise, free-standing caption that is intelligible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that this proof be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a set of offprints with a personal acknowledgement. The offprints will be provided free of charge. Offprints are available to purchase and must be ordered before publication.
