CONTENTS

Laser second-harmonic generation from an overdense plasma slab

Electron acceleration by whistler pulse in high-density plasma

Dissociation and formation of particles produced by laser ablation of
cyclotetramethylene tetranitramine

Numerical modelling of the cluster targets for their optimization in
femtosecond-laser-cluster-driven experiments

Simulation analysis of zinc ablation process and mass by intense pulsed ion
beam irradiation

Simulation of femtosecond laser absorption by metallic targets and their
thermal evolution

Pulse-compression and self-focusing of Gaussian laser pulses in plasma having
relativistic–ponderomotive nonlinearity

Experimental and numerical study of ultra-short laser-produced collimated
Cu K X-ray source

Ultra-bright keV X-ray source generated by relativistic femtosecond laser
pulse interaction with thin foils and its possible application for HEEDS
investigations

Modeling the ultra-high intensity laser pulse – cone target interaction for ion
acceleration at CEDAL facility

Formation of periodic magnetic field structures in overdense plasmas

Near-microwave ultra-MeV electrons generation in laser-driven
self-formed plasma channel

The model of the influence of the electron reflexing on the electron transport
and K emission

The effect of nature and pressure of ambient environment on laser-induced
breakdown spectroscopy and ablation mechanisms of Si

X-ray and ion emission studies from subnanosecond laser-irradiated SiO 2
aerogel foam targets

Departure from MHD prescriptions in shock formation over a guiding
magnetic field

Gyrom scale laser-magnetic resonant acceleration in vacuum

Excitation of terahertz radiation generation by obliquely incident beating lasers
on a hot magnetized plasma with step density profile
Laser and Particle Beams
Pulse Power, High Energy Densities, Hot Dense Matter, and Warm Dense Matter

Editor in Chief:

Laser and Particle Beams is an international journal that covers the generation, and the interaction with matter, of high intensity laser and particle beams. It also covers the physics of systems with high energy densities. Specific fields of interest include nuclear fusion, especially inertial confinement, magnetic confinement, diagnostics, material treatment, laboratory astrophysics, plasmas and spectroscopy at extreme conditions, physical properties of hot dense matter, warm dense matter, and intense particle beams and optical (laser) beams from the microwave to the X-ray region. The exploration of these fields and their new physics, including nonlinear and nonclassical phenomena, should find a forum in this journal.

As well as publishing original articles, the journal also publishes occasional review articles, surveys of research at particular laboratories, and reviews of recent books.

Laser and Particle Beams is indexed in Chemical Abstracts, Computerized Engineering Index, Current Contents, Engineering Index Monthly, Inspec, Mechanical Engineering Abstracts, Referativnyi Zhurnal, Science Citation Index, SCOPUS, Index of Scientific Reviews.

Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of US $20.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 5/0263-0346/15 $20.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104, USA, is authorized to supply single copies of separate articles for private use only.

Subscriptions: Laser and Particle Beams (ISSN 0263-0346) is published in March, June, September, and December by Cambridge University Press, One Liberty Plaza, New York, NY 10006/Cambridge University Press, University Printing House, Shaftesbury Road, Cambridge CB2 8BS, UK. 2017 Annual rates for institutions electronic: US $1511.00 in the USA, Canada, and Mexico; UK £827.00 + VAT elsewhere. Individuals electronic: US $285.00 in the USA, Canada, and Mexico, UK £152.00 + VAT elsewhere.

Orders, which must be accompanied by payment, may be sent to a bookseller, subscription agent, or direct to the publishers Cambridge University Press, Journals Department, One Liberty Plaza, New York, NY 10006, USA; orders outside the US, Canada, or Mexico may be sent to Cambridge University Press, University Printing House, Shaftesbury Road, Cambridge CB2 8BS, UK. Claims for missing issues should be made immediately after receipt of the next issue.
