CONTENTS

Non-vacuum Preparation of wse₂ Thin Films via the Selenization of Hydrated Tungsten Oxide Prepared using Chemical Solution Methods ................................................................. 3281
Christopher L. Exstrom, Scott A. Darveau,
Megan E. Falconer, Jessica R. Blum,
Whitney M. Colling, and Natale J. Ianno

3D Distributions of Chlorine and Sulphur Impurities in a Thin-film Cadmium Telluride Solar Cell ................................................................. 3287
Thomas A.M. Fiducia, Kexue Li,
Amit H. Munshi, Kurt Barth,
Walajabad S. Sampath,
Chris R.M. Grovenor, and John M. Walls

Low Temperature Photoluminescence Spectroscopy of Defect and Interband Transitions in CdSe₄Te₄ Thin Films ................................................................. 3293
Niraj Shrestha, Corey R. Grice, Ebin Bastola,
Geethika K. Liyanage, Adam B. Phillips,
Michael J. Heben, Yanfa Yan,
and Randy J. Ellingson

Tin Disulfide-oxide (SnS₂₋ₓOₓ) as n-type Heterojunction Layer Processed by Chemical Bath Technique for Cd Free Fabrication of Compound Semiconductor Thin Film Solar Cells ................................................................. 3301
Omar Asif and Alok C. Rastogi

Antimony Sulfide Thin Films Obtained by Chemical Bath Deposition using Tartaric Acid as Complexing Agent ................................................................. 3307
J. Escorcia-García, M. Domínguez-Díaz,
A. Hernández-Granados, and H. Martínez

A First Principles Study on the Electronic, Optical and Hole Effective Mass Properties of Mg-doped CuAlO₂ and AgAlO₂ ................................................................. 3315
James Shook, Pablo D. Borges,
and Luisa Scolfaro

XRPD and Scanning Electron Microscopy of Alloys of the CuAlS₂ – CuFeS₂ System Prepared by Thermobaric Treatment ................................................................. 3323
Barys Korzun and Anatoly Pushkarev
