Astrid Hopfenmüller and Josepa Miguel-Florensa

649 Skin in the game: comparing the private and public regulation of isotretinoin
Raymond J. March

673 How does relationship-based governance accommodate new entrants? Evidence from the cycle-rickshaw rental market
Tarun Jain

699 The formation of terrorist groups: an analysis of Irish republican organizations
Antony W. Dines and Graham Brownlow

REVIEW ARTICLE

725 Price theory as prophylactic against popular fallacies
Peter J. Boettke and Rosolino A. Candela
Institutions are the stuff of social and economic life. The importance of understanding the role of institutions in economic growth is now widely appreciated. The Journal of Institutional Economics is devoted to the study of the nature, role and evolution of institutions in the economy, including firms, states, markets, money, households and other vital institutions and organizations. It welcomes contributions by all schools of thought that can contribute to our understanding of the features, development and functions of real world economic institutions and organizations.

The Journal of Institutional Economic is an interdisciplinary journal that will be of interest to all academics working in the social sciences, including in economics, business studies, sociology, politics, geography, anthropology and philosophy. The Journal of Institutional Economics aims to provide all authors with an expert verdict on their articles within 30 days of submission.

Instructions and Forms
All manuscripts must be submitted online via the Journal of Institutional Economics website. Please follow the instructions at the following page.

The front page of the electronic file of the article should include the following information: the title; an abstract of the article up to 150 words; the Journal of Economic Literature classification codes for the article (consisting of a single letter followed by two numeric digits, see www.aeaweb.org/journal/jel_class_system.html); and up to six key words or short phrase.

Footnotes should be kept to a minimum and the Harvard style of punctuation (i.e., punctuation in parentheses) should be used. Submission of a paper will be held to imply that it contains original unpublished work and is not being submitted for publication elsewhere.

The JOIE Editors will preliminarily assess all papers. A paper will be accepted at this first stage if it does not comply with the above guidelines, is evidently of insufficient academic quality or interest, or lies outside the scope of the journal. If a paper passes this preliminary assessment, then it will be sent out to referees. The five Editors will make the final decision, taking account of the referees’ reports.

If the article is accepted, the author will be asked to conform with the format and house style of JOIE, as published in issues of the journal from June 2015.

JOURNAL OF INSTITUTIONAL ECONOMICS
