Polar Record (ISSN 0032-2474) is published six times yearly — in January, March, May, July, September, November — the six issues making a volume. First published in January 1931, Polar Record appeared twice yearly until July 1954, three times yearly until September 1967 and four times yearly until 2014. Scholarly contributions are invited on virtually all subjects of polar interest.

Contributions
All authors who would like to submit contributions for publication in Polar Record must send the Editor an electronic copy of the manuscript together with a covering letter. The submission must be saved in .doc or .rtf format, and should be sent via email to polarrecord@cambridge.org.

COVER PHOTO
Farthest North. The attainment of the highest northern latitude (83°24’N), on 12 May 1882 by Lieutenant James Lockwood and Sergeant David Brainard of the U.S. International Polar Year Expedition 1881–1884, as depicted by the American artist Albert Operti (1852–1927). Over the course of his lifetime, Operti devoted himself to painting ‘great’ pictures of noteworthy Arctic events in an historically accurate manner. In his paper, ‘Albert Operti, chronicler of Arctic exploration’ in this issue, Douglas Wamsley describes Operti’s versatile career and his passionate efforts in disseminating through his artwork the accomplishments and failures of 19th century Arctic explorers (illustration courtesy of the Shelburne Museum, Shelburne, VT, USA)
