Molecular Nutrition
Linoleic acid, α-linolenic acid and enterolactone affect lipid oxidation and expression of lipid metabolism and antioxidant-related genes in hepatic tissue of dairy cows
É. Fortin, R. Blouin, J. Lapointe, H. V. Petit & M.-F. Palin 1199-1211

Expression profiling indicating low selenium-sensitive microRNA levels linked to cell cycle and cell stress response pathways in the CaCo-2 cell line
M. J. McCann, K. Rotjanapun, J. E. Hesketh & N. C. Roy 1212-1221

Dietary leucine supplementation alters energy metabolism and induces slow-to-fast transitions in longitudinal shortness of meat ingsergits

Metabolism and Metabolic Studies
Radial dogs are capable of regulating calcium balance, with no adverse effects on markers when fed a high-calcium diet

Heat-stabilised rice bran consumption by colorectal cancer survivors modulates stool metabolite profiles and metabolic networks in an uncontrolled clinical trial
D. G. Brown, E. C. Borresen, R. J. Brown & E. P. Ryan 1244-1256

Human and Clinical Nutrition
Blood fatty acid changes in healthy young Americans in response to a 10-week diet that increased n-3 and reduced n-6 fatty acid consumption: a randomised controlled trial

The effect of increased fruit and vegetable consumption on selected macronutrient and micronutrient intakes in four randomised-controlled trials

Vitamin D status in renal transplant recipients living in a low-latitude city: association with body fat, cardiovascular risk factors, estimated glomerular filtration rate and proteinuria

High-quality fish oil has a more favourable effect than oxidised fish oil on intermediate-density lipoprotein and LDL subclasses: a randomised controlled trial
A. Rundblad, K. B. Holven, I. Ottestad, M. C. Myhrstad & S. M. Ulven 1291-1298

Waist circumference as a predictor of mortality in overweight postmenopausal diabetic patients: A follow-up study of 48 months
K. C. M. Cotton, K. F. Panossian, T. H. Marks, L. Caparos & N. A. Rawnsley 1299-1303

Selenium, selenoproteins and selenometabolites in women and men at the time of birth

Editor-in-Chief

G C Bride, University of Exeter, UK

Deputy Editors

J B Ambrosini, University of North Carolina, USA
L A Atkinson, University of Western Australia, Australia
D Birt, University of Sydney, Australia
R B J DiPrinzio, University of Eastern Finland, Finland
S J de Boer, University of New South Wales, Australia
J H de Vries, Wageningen University, The Netherlands
K Deighton, Deakin University, Australia
E Combet-Aspray, Deakin University, Australia
K A Cockell, Deakin University, Australia
J T Brenna, University of California: Davis, USA
F Bravi, Università degli Studi di Milano, Italy
S Barton, Taipei Veterans General Hospital, Taiwan
M Cockeran, Auckland University of Technology, New Zealand
A E Buyken, Deakin University, Australia
S J Whiting, Baptist Health South Florida, USA
B Muhlhausler, University of South Australia, Australia
A M Minihane, University College Cork, Ireland
C Yuan, Zhejiang University, China
A Sneddon, University of Western Australia, Australia
R Siddiqui, University of North Carolina, USA
U Schwab, Texas A&M University, USA
D Robertson, University of Auckland, New Zealand
S Sahni, Deakin University, Australia
I Saunders, Deakin University, Australia
D Li, University of Chinese Medicine, China

Reviews Editors

D H Neale, University of Minnesota, USA
E J Sherman, Food and Nutrition Program, USDA, USA
C Ritz, University of Copenhagen, Denmark
D L Topping, New Zealand Institute for Plant & Food Research, New Zealand
A L Heaton, University of Reading, UK
D Li, University of Chinese Medicine, China
S Sahni, University of North Carolina, USA
J Dorn, Deakin University, Australia
L Lutter, USDA, USA
J Dorn, Deakin University, Australia

Reviews and Horizons Editor

J M Pearson, University of Southampton, UK

Editorial Board

The Nutrition Society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of health and animal health. Application of membership is invited from anyone whose work has contributed to the scientific knowledge of nutrition, whether such work has been in the laboratory, the field, or the clinic, and whether experimental, clinical, agricultural or industrial in its nature. There is also a student membership scheme with reduced subscriptions.
