

SUBSCRIPTION RATES

Subscription rates (post free) for Volume 34 (2002) of *Advances in Applied Probability* are as follows:

US\$238.50; \$A376.35; £145.50 for libraries and institutions;

US\$79.50; \$A125.45; £48.50 for individuals belonging to a recognised scientific society.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency or by VISA or Mastercard (phone: +44 114 222 3922; fax: +44 114 272 9782).

NOTES FOR CONTRIBUTORS

Contributors in *Advances* may be of six kinds:

(1) *review papers*; (2) *longer research papers* in applied probability, which may include expository material; (3) *expository papers* on branches of mathematics of interests to probabilists; (4) *papers outlining areas in the biological, physical, social and technological sciences* in which probability models can usefully be developed; (5) *papers in applied probability* presented at conferences which do not publish their proceedings; (6) *letters to the editor* on any appropriate topic in applied probability. In addition, the SGSA section includes contributions relating to stochastic geometry and statistical applications. Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to be published in that journal.

Shorter research papers and *short communications* are published in the *Journal of Applied Probability*. The editors may publish accepted papers in either journal, however, according to the space available, in order to meet publication deadlines.

Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purposes of computerised information retrieval; (3) primary and secondary classifications according to the 2000 Mathematics Subject Classification.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office. An updated version of the guide, with LATEX style files, can be obtained in electronic form on <http://www.appliedprobability.org> or on PC-compatible disk from the Applied Probability Office. For instructions on how papers may be submitted electronically, please consult the notes for contributors at the above URL.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,
University of Sheffield, Sheffield S3 7RH, UK.**

COPYRIGHT

The copyright of all published papers is vested in the Trust. When a paper is accepted for publication, the Trust asks the author(s) to assign copyright to the Trust by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Centre (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus 0.20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0001-8678/02 \$00.70 + 020.

Stochastic Geometry and Statistical Applications

- 1 MARTIN J. B. APPEL, CHRISTOPHER A. NAJIM AND RALPH P. RUSSO. Limit laws for the diameter of a random point set
- 11 WILFRIED GILLE. The set covariance of a dead leaves model
- 21 DANIEL HUG, GÜNTER LAST AND WOLFGANG WEIL. Generalized contact distributions of inhomogeneous Boolean models
- 48 RAHUL ROY AND HIDEKI TANEMURA. Critical intensities of Boolean models with different underlying convex shapes

General Applied Probability

- 58 KAVITA RAMANAN, ANIRVAN SENGUPTA, ILZE ZIEDINS AND PARTHA MITRA. Markov random field models of multicasting in tree networks
- 85 VINCENT DUMAS, FABRICE GUILLEMIN AND PHILIPPE ROBERT. A Markovian analysis of additive-increase multiplicative-decrease algorithms
- 112 HENRIK FAGERHOLM AND GÖRAN HÖGNÄS. Stability classification of a Ricker model with two random parameters
- 128 ANANDA P. N. WEERASINGHE. Stationary stochastic control for Itô processes
- 141 PAUL DUPUIS AND HUI WANG. Optimal stopping with random intervention times
- 158 TAKIS KONSTANTOPOULOS AND GREGORY S. RICHARDSON. Conditional limit theorems for spectrally positive Lévy processes
- 179 ALWIN STEGEMAN. Extremal behavior of heavy-tailed ON-periods in a superposition of ON/OFF processes
- 205 P. BRÉMAUD AND L. MASSOULIÉ. Power spectra of general shot noises and Hawkes point processes with a random excitation
- 223 A. D. BARBOUR, S. Y. NOVAK AND A. XIA. Compound Poisson approximation for the distribution of extremes
- 241 FÉLIX BELZUNCE, EVA-MARÍA ORTEGA AND JOSÉ M. RUIZ. On ageing properties of first-passage times of increasing Markov processes
