In my article "Analysis of Longitudinal Twin Data: Basic Model and Applications to Physical Growth Measures" in Volume 28:93–105 (1979) the footnote to Table 5 on page 100 should read $\sigma^2 = \sigma^2 / \rho$.

Also, in the equation at the top of page 102, the two separate terms in the denominator should each be multiplied by $(q-1)$, i.e.,

$$\sqrt{\frac{1}{(pMZ^{-2})(q-1)}} + \frac{1}{(pDZ^{-2})(q-1)}$$
