Keywords: Refugees; active labor market programs; evaluation; inverse probability weighting; corrigendum

The authors apologise to the readers for having to update some of the values for the labor earnings in the paper, due to a minor error in the code of the data preparation. Corrected results are rather similar to the original results presented and the paper's conclusions remain unchanged.

The correction led to a slight increase in the descriptive mean values of monthly labor earnings for all groups in the raw sample after 33 months in section B of Table 1 (please see below the corrected values in red). Moreover, the correction led to larger estimates of effects on real monthly labor income (see Figure 2), especially for in-firm training (IFT) and further vocational training (FVT). The new effect estimates on real monthly income for all programs are shown in Figure 2 below. After 33 months the effects for IFT participants amounted to 480 Euros per month (old: 360 Euros). After 33 months the effects for FVT participants

Table 1. Selected descriptive statistics

	Schemes by providers		In-firm training		Further voc. Training		One-Euro-Jobs	
	Non-Part.	Part.	Non-Part.	Part.	Non-Part.	Part.	Non-Part.	
B. Outcomes after 33 months								
Share in regular employment	0.33	0.29***	0.55	0.29***	0.50	0.29***	0.28	0.30
Mean monthly labor earnings	632	558***	1212	561***	1644	559***	525	568
Number of obs.	6,118	27,135	747	28,942	424	29,903	465	29,805

Note: Statistically significant differences at the 10/5/1% level between participants and non-participants are indicated by */**/** on the respective value among the non-participants.

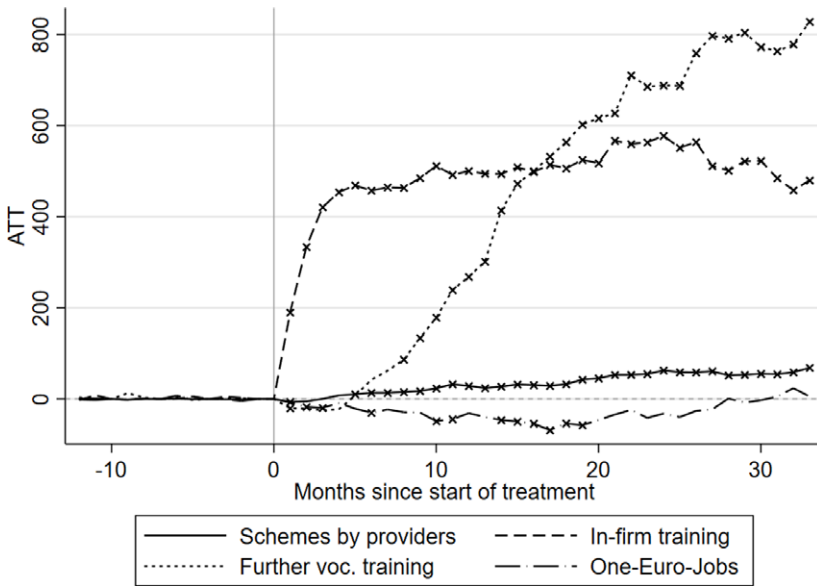

Figure 2. Effects on real monthly labor income in Euro.

amounted to 830 Euros per month (old: 710 Euros). For participants in Schemes by providers monthly earnings also increased, albeit with a smaller magnitude: after 33 months the participation effect in the program amounted to 68 Euros (old: 65 Euros). The effects for participation in One-Euro-Jobs (OEJs) did not change after the correction.
