Editor
Rainer Kulms, Max Planck Institute, Hamburg, Germany

The European Business Organization Law Review (EBOR) is a leading European publication addressing all legal aspects of business organization. The journal is a platform for articles, case-notes and book reviews to stimulate scholarly debate and to reflect the speed of how developments in the field translate into substantive law. Relying on scholars, business people, lawyers, economists and other disciplines, and with an international editorial board, the journal looks at the whole range of problems relevant to business activities and the corresponding national, European Community and international legal rules.

“In one short year, the EPSR has established itself as one of the best outlets for innovative political research anywhere – not just in Europe, and not just about Europe. Its mixture of thoughtful essays and original research reports makes it a pleasure to read and learn from.”

SIDNEY TARROW, CORNELL UNIVERSITY

Are you up to date with the original, wide-ranging and broad-minded articles published by EPSR?

If your library doesn’t already have a subscription, you should encourage your librarian to subscribe so you, your colleagues and your students will all have access to this indispensable and stimulating source of new scholarship in all areas of political science.

Further information and an online library recommendation form can be found at the EPSR homepage: journals.cambridge.org/epsr
Utilitas is one of the leading international journals in ethics, offering high quality research in all aspects of the development of utilitarian thought and in all areas in which utilitarianism has made a contribution. As a pioneering, interdisciplinary journal, Utilitas will be of interest not only to moral philosophers but also to economists, political theorists, intellectual historians and legal theorists.

Utilitas is available online at: http://journals.cambridge.org/uti

institutions and organizations.

Institutions are the stuff of social and economic life. The Journal of Institutional Economics is an interdisciplinary journal that will be of interest to all academics working in the social sciences, including in economics, business studies, sociology, politics, geography, anthropology and philosophy. The Journal of Institutional Economics aims to provide all authors with an expert verdict on their articles within 90 days of submission.

The Editor will acknowledge receipt of the manuscript. A manuscript reference number and author name will be assigned to it. The reference number of the manuscript should be quoted in all correspondence with the JOIE Office and Publisher.

ARTICLE

There must be no indication of the personal identity or institutional affiliation of any author of the article within the article itself, or in the 'properties' of the electronic file. Normally, articles (including footnotes and references) must be no longer than 9,000 words. In special cases, such as extended review or survey articles, this limit may be extended to 12,000 words. A declaration of the total word count (including footnotes and references) must accompany the article.

Papers with some formal content will be considered if it is fully explained for a general readership, the mathematics is constrained as much as possible to appendices, the assumptions have sufficient grounding in reality, and the paper enhances our understanding of past, present, or feasible socio-economic institutions. Ideas from many disciplines, cultures, routines, and habits.

"The Journal of Institutional Economics is dedicated to the development of cutting edge research within this broad conception of institutional economics. It encompasses research in both the original and new traditions of institutional economics, from Gustav Schmoller, Thorstein Veblen, John R. Commons, Wally Mitchell and Gordon Tullock to Ronald Coase, Oliver Williamson, Douglass North and many others."

"The Journal of Institutional Economics is committed to publishing theoretical and empirical research that enhances our understanding of the nature, origin, role and evolution of socio-economic institutions. Ideas from many disciplines, such as anthropology, biology, geog- raphy, history, politics, psychology, sociology, social theory and sociology, as well as economic theory itself, are important for this endeavor."
