

Field and Forest. This excellent monthly journal of Natural History continues to be well sustained. Among articles of especial interest to Entomologists we notice papers in the January and March numbers, by W. H. Edwards, of Coalburgh, W. Va., containing descriptions of nine new species of butterflies found in Colorado and Texas.

The Journal of the Cincinnati Society of Natural History; 1ge., 8vo. pp. 52, with two plates. Terms, \$2 per vol.; single numbers, 60 cts. The first number of this new quarterly journal of Natural History is at hand. Besides matters of local interest connected with the Society, the present number contains a paper "On the Tongue of some Hymenoptera," by V. T. Chambers; a catalogue of the Lepidoptera observed in the vicinity of Cincinnati, by Charles Drury, including 475 species; Contributions to Palæontology, by S. A. Miller and C. B. Dyer, and a description of *Pupa Cincinnatiensis*, by C. R. Judge.

Bulletin of the Buffalo Society of Natural Sciences. Part 5 of Vol. 3, the closing number of the volume, is at hand, containing papers by Henry R. Howland, on Recent Archæological Discoveries, illustrated by three photographic plates; D. S. Kellicott, description of a new species of *Argulus*, and a new Check List of North American Sphingidæ, by Aug. R. Grote.

CORRESPONDENCE.

PAPILIO THOAS.

It may be of some interest to the readers of the CANADIAN ENTOMOLOGIST to know that one specimen of *Papilio thoas* was captured in Hamilton last summer, in the south-eastern part of the city, and one specimen on the G. W. R. track near Dundas. Both specimens were badly broken. Mr. D. Little has the one here, and Mr. R. Kyle, of Dundas, has the other.

WILLIAM MURRAY, Hamilton, Ont.

We captured at Center, N. Y., April 24th, *Smerinthus cerisii* in excellent condition. So far as I am aware, it has never been taken in this region before. You see Center still holds her own, and every season yields up new treasures.

JAMES S. BAILEY, Albany, N. Y.
