Journal of MATERIALS RESEARCH

JOURNAL OF MATERIALS RESEARCH (JMR) is an interdisciplinary journal serving the materials research community through publication of original research articles and invited reviews encompassing the synthesis, processing, characterization, properties, and theoretical description of materials.

JMR publishes new research that demonstrates a significant impact or advance of scientific understanding of interest to the materials research community. Engineering studies and applications to commercial products are beyond the scope of JMR and should be submitted elsewhere. Manuscripts that report data without giving an analysis, interpretation, or discussion are only acceptable if the data are sufficiently important that publication is expected to lead to significant new studies or advances in science or technology.

Manuscripts must be submitted to the Journal of Materials Research electronically via ScholarOne manuscripts, at the following website address: http://mc.manuscriptcentral.com/jmr. Electronic submission expedites the review process and also allows authors to track the status of their manuscripts at any time. Complete instructions are available on the ScholarOne site and authors will be prompted to provide all necessary information.

Manuscripts must be prepared in English, using a word processing program, formatted to fit 8½ × 11 in. paper, and saved as .doc or .pdf files. Separate graphics files (.eps and .tif) must be uploaded for each figure. Authors may also upload .xls or .ppt supplemental files as part of the manuscript submission process. All of these files will be converted to .pdf format. Detailed instructions are available on the submission web site.

Manuscripts are accepted with the understanding that they represent original research, except for review articles, and that they have not been copyrighted, published, or submitted for publication elsewhere. Authors submitting manuscripts to JMR who have related material under consideration or in press elsewhere should send a copy of the related material to JMR at the time of submission. While their manuscripts are under consideration at JMR, authors must disclose any such related material. To expedite the review process, authors may provide names and contact information for up to four possible reviewers.

Articles are original research reports that include complete, detailed, self-contained descriptions of research efforts. All articles must contain an abstract and section headings.

Commentaries and Reviews: Journal of Materials Research occasionally publishes commentaries on topics of current interest or reviews of the literature in a given area. If an author proposes a review, the title, abstract, and a brief outline should be submitted to the Editorial Office via e-mail for prior consultation on the appropriateness of the topic.

Color policy: It is not necessary for authors to indicate that a figure should be displayed in color online. JMR will assume that any author who submits figures in color wants and agrees to their being produced in color online. Figures may be printed in color at the author’s request for an additional charge. Color figures must be submitted before the paper is accepted for publication, and cannot be received later in the process. Authors cannot submit two versions of the same figure, one for color and one for black and white; only one version can be submitted. Authors need to carefully consider the following when submitting figures in color that will be published in color online only: 1) The colors chosen must reproduce effectively and the colors should be distinguishable when printed in black and white; 2) The descriptions of figures in text and captions must be sufficiently clear for both online and print copy. When submitting figures to be in color online only, authors should include the phrase <<color online>> in the figure captions. This is the author’s responsibility. Authors will see these color figures when viewing their author page proofs on screen. Authors should always print their page proofs in black and white to see how they will appear in print. Authors will NOT be allowed to submit color figures to replace black and white figures in the page proof stage. To maximize the probability that figures will be published in color online and also print as good quality black and white or grayscale graphics, authors are encouraged to follow these figure submission guidelines: 1) Submit a color graphic in Tagged Image File Format (.tif); 2) Submit color graphics with a resolution of at least 300 dpi (600 dpi if there is text or line art in the figure); 3) Submit color graphics in CMYK format; 4) Submit figures sized to fit the actual column or page width of the journal so that reduction or enlargement is not necessary; 5) Submit multipart figures in one single electronic file.

POSTMASTER: Send address changes to Journal of Materials Research, c/o Journals Dept., Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA.

Subscriptions, renewals, address changes, and single-copy orders should be addressed to Subscription Fulfillment, Journal of Materials Research, Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA (for USA, Canada, and Mexico); or Cambridge University Press, University Printing House, Shaftesbury Road, Cambridge, CB2 8BS, England (for UK and elsewhere). Allow at least six weeks advance notice. For address changes, please send both old and new addresses and, if possible, include a mailing label from a recent issue. Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue’s actual date of publication; otherwise, the issue may be purchased at the single-copy price.

Reprints of individual articles in Journal of Materials Research may be ordered. For information on reprints, please contact Cambridge University Press. Reprints of complete back issues older than the prior volume year may be ordered on an individual basis via Cambridge Core. To determine availability, visit the appropriate page for the JMR back issue desired (cambridge.org/jmr).

Individual member subscriptions are for personal use only.
Journal of

MATERIALS RESEARCH

Editor-in-Chief: Gary L. Messing, Ceramic materials, The Pennsylvania State University, USA
Associate Editor: Susmita Bose, Biomaterials, Washington State University, USA
Associate Editor: Jürgen Eckert, Metallic materials, Montanuniversität Leoben, Austria
Associate Editor: Linda S. Schadler, Polymeric materials, Rensselaer Polytechnic Institute, USA

Guest Editors for Focus Issue: Stabilization of Organic Electronic Materials and Devices
Christoph Brabec, Friedrich-Alexander University Erlangen-Nuremberg, Germany
Hans-Joachim Egelhaaf, Bavarian Center for Applied Energy Research, Germany
Michael Salvador, KAUST Solar Center, Saudi Arabia

2018 Principal Editors:

Amit Bandyopadhyay, Hard biomaterials, Additive manufacturing, Washington State University, USA
Jinju Chen, Soft materials/thin films, Nanoindentation, Newcastle University, United Kingdom
Xiaobo Chen, Photocatalysis and batteries, University of Missouri-Kansas City, USA
Yang-T. Cheng, Mechanical behavior, Electrochemical energy storage, University of Kentucky, USA
Sung-Yoon Chung, Energy, Electron microscopy, Interface science, KAIST, Korea
Paolo Colombo, Preceramic polymers, Porous ceramics, University of Padova, Italy; The Pennsylvania State University, USA
Franz Faupel, Functional nanomaterials, VPD, Metallic glasses, University of Kiel, Germany
Mathias Göken, Superalloys, Nanomaterials, Nanomechanics, Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany
Amit Goyal, Superconductors, Photovoltaics, 2D materials, Self-assembly, State University of New York at Buffalo, USA
Erik G. Herbert, Nanoindentation, Small-scale mechanical behavior Michigan Technological University, USA
Himanshu Jain, Inorganic glass, Optical, Electrical properties, Lehigh University, USA
C. Robert Kao, Metallic materials, Diffusion and joining, National Taiwan University, Taiwan
Edson Roberto Leite, Materials chemistry, Nanocrystals, Synthesis, Universidade Federal de São Carlos, Brazil
Jörg Löffler, Metallic materials/synthesis and properties, ETH Zurich, Switzerland
Michele Manuel, Phase transformations, Materials design, University of Florida, USA
Michael E. McHenry, Magnetic materials, Carnegie Mellon University, USA
Scott T. Mixture, In-situ diffraction, Electrochemically active ceramics, Alfred University, USA
Sarah E. Morgan, Polymer surfaces and interfaces, The University of Southern Mississippi, USA
Paul Muralt, Thin films, Piezoelectric and ferroelectric materials, Ecole Polytechnique Federale de Lausanne, Switzerland
Lakshmi S. Nair, Biomaterials, Tissue regeneration, Drug delivery, University of Connecticut, USA
Akira Nakajima, Photocatalysis, Surface wettability, Ceramic processing, Tokyo Institute of Technology, Japan
Cewen Nan, Ferroelectric, Multiferroic materials, Tsinghua University, China
George M. Pharr, Mechanical behavior, Nanoindentation, Texas A&M University, USA
Ian M. Reaney, Electroceramics, TEM, Thin films, The University of Sheffield, United Kingdom
Edward M. Sabolsky, Electroceramics, Electrochemistry, Processing, West Virginia University, USA
Winston Schoenfeld, Optical materials, University of Central Florida, USA
Don W. Shaw, Epitaxy, Vapor deposition, Semiconductors, The University of Texas at Dallas, USA
Susan B. Sinnott, Computational materials science, The Pennsylvania State University, USA
Terry M. Tritt, Thermoelectrics, Clemson University, USA
Chongmin Wang, Energy storage, Microscopy, In-situ/operando technique, Pacific Northwest National Laboratory, USA
William J. Weber, Radiation effects, Nuclear ceramics, University of Tennessee; Oak Ridge National Laboratory, USA
Sam Zhang, Thin films/coatings, Nanyang Technological University, Singapore
Yanchun Zhou, Structural ceramics, Electronic structure, Aerospace Research Institute of Materials and Processing Technology, China

Editorial Office: Ellen W. Kracht, Publications Manager, Materials Research Society, Warrendale, PA
Linda A. Baker, JMR Editorial Assistant, Materials Research Society, Warrendale, PA
Kirby L. Morris, JMR Production Assistant, Materials Research Society, Warrendale, PA
Eileen M. Kiley, Director of Communications, Materials Research Society, Warrendale, PA
STABILIZATION OF ORGANIC ELECTRONIC MATERIALS AND DEVICES
1839–1840 The path to ubiquitous organic electronics hinges on its stability
Christoph Brabec,
Hans-Joachim Egelhaaf,
Michael Salvador

INVITED ARTICLES
1841–1852 Methodology of the first combined in-flight and ex situ stability
assessment of organic-based solar cells for space applications
Dieter Schreurs, Steven Nagels,
Ilaria Cardinaletti, Tim Vangerven,
Rob Cornelissen, Jelle Vodnik,
Jaroslav Hruby, Wim Deferme,
Jean V. Manca

1853–1859 Degradation kinetics in different polymer–fullerene blends
investigated by electron spin resonance
Marek Havlicek,
Niyazi Serdar Sarıcilkti,
Markus C. Scharber

1860–1867 High-temperature stable single carrier hole only device based on
conjugated polymers
Shahidul Alam, Peter Fischer,
Christian Kästner, Chetan R. Singh,
Ulrich S. Schubert, Harald Hoppe

1868–1878 New insights into polymer solar cells stability: The crucial role of
PCBM oxidation
Anthony Perthue, Thérèse Gorisse,
Hugo Santos Silva,
Christian Lombard, Didier Bégué,
Pierrick Hudhomme, Brigitte Pépin-Donat,
Agnès Rivaton, Guillaume Wantz

1879–1890 Photocrosslinking of low band-gap conjugated polymers using
alkyl chloride sidechains: Toward high-efficiency, thermally
stable polymer solar cells
Chi Zhang, Steven Holdcroft

1891–1901 PMMA as an effective protection layer against the oxidation of
P3HT and MDMO-PPV by ozone
Andreas Früh,
Hans-Joachim Egelhaaf,
Holger Hintz, Dustin Quinones,
Christoph J. Brabec, Heiko Peisert,
Thomas Chassé

1902–1908 Stability study of thermal cycling on organic solar cells
Harrison Ka Hin Lee,
James R. Durrant, Zhe Li,
Wing Chung Tsoi

(Continued)
Stability of organic solar cells with PCDTBT donor polymer: An interlaboratory study

Encapsulation requirements to enable stable organic ultra-thin and stretchable devices

Vera Steinmann, Lorenza Moro
