

Instructions for Authors

Editorial policy The journal welcomes submissions in any of the areas of plasma physics. Its scope includes experimental and theoretical work on basic plasma physics, the plasma physics of magnetic and inertial fusion, laser–plasma interactions, industrial plasmas, plasma devices and plasmas in space and astrophysics. This list is, of course, merely illustrative of the wide range of topics on which papers are invited, and is not intended to exclude any aspect of plasma physics that is not explicitly mentioned.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers. Manuscripts must be written in English. *Journal of Plasma Physics* employs a rigorous peer-review process whereby all submitted manuscripts are sent to recognized experts in their subjects for evaluation. The Editors' decision on the suitability of a manuscript for publication is final.

Submission of manuscripts Papers may be submitted to the Editor or any of the Associate Editors, preferably by email in pdf format. When a paper is accepted, the authors will be asked to supply source files in LaTeX or Word. Instructions for the preparation of these files and LaTeX style files are given in the Instructions for Contributors link at journals.cambridge.org/pla.

Incremental publishing and DOIs In order to make articles which have been accepted for publication in *Journal of Plasma Physics* available as quickly as possible, they are now published incrementally online (at Cambridge Journals Online; journals.cambridge.org) The online version is available as soon as author corrections have been completed and before the article appears in a printed issue. A reference is added to the first page of the article in the journal catchline. This is the DOI – Digital Object Identifier. This is a global publishers' standard. A unique DOI number is created for each published item. It can be used for citation purposes instead of volume, issue and page numbers. It therefore suits the early citation of articles which are published on the web before they have appeared in a printed issue. See journals.cambridge.org/pla.

Proof reading Only typographical or factual errors may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints Corresponding authors will receive a PDF of their article upon publication. Print offprints may be purchased from the publisher if ordered at first proof stage.

Copying This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/2010 \$16.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF PLASMA PHYSICS

VOLUME 76 • PART 1 • FEBRUARY 2010

Letters to the Editor

- Proton-temperature-anisotropy-driven magnetic fields in plasmas with cold and relativistically hot electrons
Nitin Shukla and P. K. Shukla 1
- Dispersion properties of electrostatic oscillations in quantum plasmas
Bengt Eliasson and Padma Kant Shukla 7
- Magnetization of Rydberg plasmas by electromagnetic waves
J. T. Mendonça, Nitin Shukla and P. K. Shukla 19

Main Articles

- Generation of magnetic fields by the ponderomotive force of electromagnetic waves in dense plasmas
P. K. Shukla, Nitin Shukla and L. Stenflo 25
- Effects of a non-monotonic safety factor on the particle transport and diffusion in the case of a reversed magnetic shear
M. Ghabbouri, D. Saifaoui, A. Boulezhar, A. Dezairi and M. El Mouden 29
- Radial characterization of wave magnetic field components during helicon discharge in a small aspect ratio torus
Manash Kumar Paul and Dhiraj Bora 39
- Resonant Weibel instability in counterstreaming plasmas with temperature anisotropies
M. Lazar, M. E. Dieckmann and S. Poedts 49
- Effective interaction potential of dust particles in a plasma from experimental pair correlation functions
T. S. Ramazanov, K. N. Dzhumagulova, T. T. Daniyarov, Yu. A. Omarbakiyeva, S. K. Kodanova and M. K. Dosbolayev 57
- Analytical and experimental approaches in plasma displacement measurement in IR-T1 tokamak
M. Emami, M. Ghoranneviss, A. Salar Elahi and A. Rahimi Rad 67
- Suppression of runaway electrons during electron cyclotron resonance heating on HL-2A tokamak
Jin-Wei Yang, Yi-Po Zhang, Xu Li, Xian-Ying Song, Guo-Liang Yuan, Min Liao, Li-Qun Hu, Shi-Yao Lin and Qing-Wei Yang 75
- Surface waves in magnetized quantum electron-positron plasmas
A. P. Misra, N. K. Ghosh and P. K. Shukla 87
- Magnetic fluctuation level in disruption plasmas in the TEXTOR tokamak
X. Yang, J. Liu, T. Gao, M. Li, Y. J. Shi, H. F. Liang, W. D. Cai and Z. Y. Chen 101
- Self-organization in a driven dissipative plasma system
Dastgeer Shaikh, B. Dasgupta, Q. Hu and G. P. Zank 107
- Cascades in decaying three-dimensional electron magnetohydrodynamic turbulence
Christopher J. Wareing and Rainer Hollerbach 117
