The Geological Magazine was originally established in 1864 and has been published continuously ever since. It covers the whole field of earth sciences, has a worldwide readership and has particular strength in providing a niche for interdisciplinary communications, discussions of papers which have already appeared, and book reviews. The editor welcomes papers of any length, including review articles, rapid communications, discussions of papers which have already appeared in the Magazine, book reviews and a list of new publications. There are no page charges for papers published in the Magazine.
