INDEX

All entries implicitly refer to the Magellanic Clouds only. For galactic or (other) extragalactic topics see galactic- and extragalactic-.

Abundances
gas 301, 333, 348, 353, 366, 382, 405, 415
radial gradient 361
(for stars and clusters see metallicity...)
Adiabatic expansion 300, 315
AGB 80, 196
AGB stars (see stars...)
Age 72, 99, 101, 103, 383, 391
of universe 12
Associations (OB-) 89, 93, 105, 385, 391
Asymptotic giant branch (see AGB...)

Binaries (see stars...)
Black hole 241, 301, 305
Bridge region 82, 103, 131, 411
Bubbles 89, 302
Carbon burning 367
Carbon production 196
Carbon stars (see stars...)
Carina (η) 245
Cataclismic variables (see stars...)
Centroids (see distribution...)
Cepheids (see stars...)
Chemical composition (see abundances...)
Chemical evolution, history 19, 75, 107, 409
Close encounter LMC-SMC 113, 121, 410

Clusters 1, 7, 13, 25-67, 71, 93, 172, 187
age 9, 29, 31, 43, 45, 47, 55, 64, 81, 189
age-ellipticity relation 5
age-metallicity relation 7, 17, 95
extinction in front of formation 5, 7, 12, 66, 71, 411
hydrogen line strengths 15
integrated colors 1, 53
integrated spectra 13, 31, 53, 55, 57, 410
intermediate age 31, 199
kinematics 10, 107
mass-luminosity ratio 29
metallicity 10, 31, 33, 41, 43, 45, 47, 64
old 47, 75
open 10

419
Clusters (continued)
  photometric classification 13
  RR Lyrae 7, 37, 39
  spatial distribution (see distribution...)
  young 33, 35, 411

CO molecule (see interstellar...)
Collision Galaxy-MCs 103, 133
Core-helium burning 31, 217
Core rotation 206
Corona: There is confusion about the use and meaning of the words halo
  and corona (stars, gas, location, mass; see remark on page 375);
  in this index stars are under halo, gas is under corona.
Corona, galactic (see galactic...)
Corona
  gaseous 375, 407
  massive dark component 111
Cosmic rays 313

Dark clouds 322
De Jager limit 151
Distance
  modulus, scale 192
  from Cepheids 165, 229
  from Novae 211
  from RR Lyrae 210
  from supergiants 145
Distribution of
  gas 115, 125, 137, 319, 375, 395
  globular clusters 112, 128
  Novae 213
  planetary nebulae 113, 129, 231
  RR Lyrae 213
  supergiants 137
30 Doradus 105, 137, 245, 255–261, 263, 286,
  297, 321, 344, 382, 411, 417
Dredge up mechanism 196
Dust (see interstellar...)
Dust shell 198

Electronography 41, 99
Ellipticity 1, 9, 27, 29
Emission nebulae (see HII regions...)
Enrichment of ISM 370
Evolutionary history (see history...)
Evolutionary tracks 68
Extinction (see interstellar...)
Extinction (atmospheric) 414
Extragalactic:
  blue compact galaxies 361
  Draco dwarf 39
Extragalactic (continued)
  IC 1613  
  IZ18, 36  
  irregulars  
  M31  
  M33  
  M83  
  M101  
  NGC 1613  
  3109  
  4027  
  4618/25  
  5128  
  6822  

Fe II emission  
Field stars  
Flattening  of clusters (see ellipticity...)  
of Magellanic systems  

Galactic:  
  chemical evolution  
  corona (see gaseous... or mass...)  
  fountain  
  gaseous corona  
  (globular) clusters  
  halo stars  
  high velocity clouds  
  massive dark component  (see remark with corona)  
  OB supergiants  
  RR Lyrae  

Gas (see interstellar...)  
  dynamics  
  Gas-to-dust ratio  
  Global properties (see large scale...)  
  Graphite  
  Gravitational potential  
  GRISM survey  

Hα flux  
HII regions  

Halo  
  (see remark with corona)  
  population  
  Heating, dynamical  
  Heating-cooling balance
