JOURNAL OF MATERIALS RESEARCH (JMR) is an interdisciplinary journal serving the materials research community through publication of original research articles and invited reviews encompassing the synthesis, processing, characterization, properties, and theoretical description of materials. JMR publishes advances in new materials and novel functionalities and development of performance improvements relative to state of the art. Engineering studies and applications to commercial products are beyond the scope of JMR and should be submitted elsewhere. Manuscripts that report data without giving an analysis, interpretation, or discussion are only acceptable if the data are sufficiently important that publication is expected to lead to significant new studies or advancements in science or technology.

Manuscripts must be submitted to the Journal of Materials Research electronically via ScholarOne manuscripts, at the following website address: http://jmrc.manuscriptcentral.com/jmr. Electronic submission expedits the review process and also allows authors to track the status of their manuscripts at any time. Complete instructions are available on the ScholarOne site and authors will be prompted to provide all necessary information.

Manuscripts must be prepared in English, using a word processing program, formatted to fit 8 1/2 x11 in. paper, and saved as .doc or .pdf files. Separate graphics files (.eps and .tif) must be uploaded for each figure. Authors may also upload .plx or .ppt supplemental files as part of the manuscript submission process. All of these files will be converted to .pdf format. Detailed instructions are available on the submission web site. During submission, authors must enter all coauthor names and e-mail addresses. Manuscripts will not be considered for peer review until this information is provided. Authors must also enter manuscript keywords using the JMR keyword list (located on the submission web site). Authors who are not fluent in English must have their manuscript edited for correct English grammar and sentence structure before submission.

Authors are expected to follow the conventional writing, notation, and illustration style prescribed in Scientific Style and Format: the CSE Manual for Authors, Editors and Publishers, 7th edition, 2006. Authors should also study the form and style of printed material in this journal. SI units should be used. Authors should use an identical format for their names in all publications to facilitate use of citations and author indexes.

Manuscripts are accepted with the understanding that they represent original research, except for review articles, and that they have not been copyrighted, published, or submitted for publication elsewhere. Authors submitting manuscripts to JMR who have related material under consideration or in press elsewhere should send a copy of the related material to JMR at the time of submission. While their manuscripts are under consideration at JMR, authors must disclose any such related material.

To expedite the review process, authors may provide names and contact information for up to four possible reviewers.

Articles are original research reports that include complete, detailed, self-contained descriptions of research efforts. All articles must contain an abstract and section headings.

Commentaries and Reviews: Journal of Materials Research occasionally publishes commentaries on topics of current interest or reviews of the literature in a given area. If an author proposes a review, the title, abstract, and a brief outline should be submitted to the Editorial Office via e-mail for prior consultation on the appropriateness of the topic.

Color policy: It is not necessary for authors to indicate that a figure should be displayed in color online. JMR will assume that any author who submits figures in color wants and agrees to their being produced in color online. Figures may be printed in color at the author’s request for an additional charge. Color figures must be submitted before the paper is accepted for publication, and cannot be received later in the process. Authors cannot submit two versions of the same figure, one for color and one for black and white; only one version can be submitted. Authors need to carefully consider the following when submitting figures in color that will be published in color online only: 1) The colors chosen must reproduce effectively and the colors should be distinguishable when printed in black and white; 2) The descriptions of figures in text and captions must be sufficiently clear for both online and print copy. When submitting figures to be in color online only, authors should include the phrase <<color online>> in the figure captions. This is the author’s responsibility. Authors will see these color figures when viewing their author page proofs on screen. Authors should always print their page proofs in black and white to see how they will appear in print. Authors will NOT be allowed to submit color figures to replace black and white figures in the page proof stage. To maximize the probability that figures will be published in color online and also print as good quality black and white or grayscale graphics, authors are encouraged to follow these figure submission guidelines: 1) Submit a color graphic in Tagged Image File Format (.tif); 2) Submit color graphics with a resolution of at least 300 dpi (600 dpi if there is text or line art in the figure); 3) Submit color graphics in CMYK format; 4) Submit figures sized to fit the actual column or page width of the journal so that reduction or enlargement is not necessary; 5) Submit multipart figures in one single electronic file.

Subscriptions, renewals, address changes, and single-copy orders should be addressed to Subscription Fulfillment, Journal of Materials Research, Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA (for USA, Canada, and Mexico); or Cambridge University Press, University Printing House, Shaftesbury Road, Cambridge, CB2 8BS, England (for UK and elsewhere). Allow at least six weeks advance notice. For address changes, please send both old and new addresses and, if possible, include a mailing label from a recent issue. Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue’s actual date of publication; otherwise, the issue may be purchased at the single-copy price.

Reprints of individual articles in Journal of Materials Research may be ordered. For information on reprints, please contact Cambridge University Press. Reprints of complete back issues older than the prior volume year may be ordered on an individual basis via Cambridge Core. To determine availability, visit the appropriate page for the JMR back issue desired (cambridge.org/jmr).

Individual member subscriptions are for personal use only.
NOVEL SYNTHESIS AND PROCESSING OF MATERIALS

ARTICLES

1763–1776  Nanoscale clusters in secondary hardening ultra-high strength steels with 1 and 3 wt% Mo: An atom probe investigation
R. Veerababu, R. Balamuralikrishnan, S. Karthikeyan

1777–1789  Influence of the deformation rate on phase stability and mechanical properties of a Ti–29Nb–13Ta–4.6Zr–xO alloy analyzed by in situ high-energy X-ray diffraction during compression tests
Murillo R. da Silva, Piter Gargarella, Athos H. Plaine, Rodrigo J. Contieri, Simon Pauly, Uta Kühn, Claudemiro Bolfarini

1790–1802  Study on fracture toughness of 617 Ni-based alloy welded joint under different elevated temperatures
Yuan Gao, Chendong Shao, Haichao Cui, Ninshu Ma, Fenggui Lu

1803–1816  The strain-induced martensitic phase transformation of Fe–C alloys considering C addition: A molecular dynamics study
Ye Jiao, WenJiao Dan, WeiGang Zhang

1817–1824  Microstructure evolution and mechanical properties of the ZM61 alloy sheets under different pre-rolling and high strain rate rolling temperatures
Hongge Yan, Qin Wu, Jihua Chen, Weijun Xia, Min Song, Bin Su, Jiang Wu

1825–1836  Microstructural evolution during high-energy mechanical alloying of immiscible Zr–Cr alloy
J. Arasteh, G.H. Akbari

1837–1845  Atomic-scale insights on the plate-shaped γ′′ phase in Mg–Gd–Y–Ag–Zr alloy
Zhenyang Liu, Zongrui Pei, Bin Chen, X. Q. Zeng

ORGANIC AND HYBRID FUNCTIONAL MATERIALS

1846–1856  Degradation of PGA, prepared by reactive extrusion polymerization, in water, humid, and dry air, and in a vacuum
Shuliang Chen, Xin Zhang, Mingyang He, Jinchun Li

1857–1873  Impact of interfacial properties on the viscoelastic relaxation of hard–soft block copolymers using finite element analysis
Min Zhang, Xiaolin Li, Yixing Wang, Wei Chen, Catherine Brinson

1874–1887  Morphology, rheological, and electrical properties of flexible epoxy/carbon composites cured by UV technique
Pollawat Charoeythornkhajhornchai, Chavakorn Samthong

1888–1897  Numerical analysis of out-of-plane thermal conductivity of C/C composites by flexible oriented 3D weaving process considering voids and fiber volume fractions
Zheng Sun, Zhongde Shan, Tianmin Shao, Qun Zhang
