

CONTENTS OF No. 336, DECEMBER 1981

	<i>page</i>
S. H. U. BOWIE and J. WATSON: Uranium Mineralogy and the Geochemistry of Radioelements in Crystalline Rocks: Preface	369
K. BELL: A review of the geochronology of the Precambrian of Saskatchewan—some clues to uranium mineralization	371
P. BOWDEN, J. N. BENNETT, J. A. KINNAIRD, J. E. WHITLEY, S. I. ABAA, P. K. HADZIGEORGIU-STAVRAKIS: Uranium in the Niger-Nigeria Younger Granite Province	379
J. CASSIDY: Techniques of field gamma-ray spectrometry	389
H. CLEMMY: Some aspects of the genesis of heavy mineral assemblages in Lower Proterozoic uranium-gold conglomerates	399
J. L. CONSTABLE and F. H. HUBBARD: U, Th and K distribution in a differentiated charnockite-granite intrusion and associated rocks from SW Sweden	409
M. CATHELINÉAU and J. LEROY: Reactions between uranium veins and their host rocks in Vendée and Limousin (France)	417
A. G. DARNLEY: The relationship between uranium distribution and some major crustal features in Canada	425
A. N. HALLIDAY: On the sources of uranium in some Scottish Caledonian granites	437
M. B. FOWLER: Uranium content, distribution and migration in the Glendessarry syenite, Inverness-shire	443
J. HENNESSY: A classification of British Caledonian granites based on uranium and thorium contents	449
R. J. HOWARTH, G. S. KOCH, Jr., J. A. PLANT, R. K. LOWRY: Identification of uraniferous granitoids in the U.S.A. using stream sediment geochemical data	455
L. KISH and M. CUNNEY: Uraninite-albite veins from the Mistamisk Valley of the Labrador Trough, Quebec	471
P. J. O'CONNOR: Radioelement geochemistry of Irish granites	485
Alphabetical Index	497

UNIVERSITY PRESS, OXFORD, ENGLAND
