

Proceedings of the
CAMBRIDGE PHILOSOPHICAL
SOCIETY

VOLUME 52

CAMBRIDGE
AT THE UNIVERSITY PRESS
1956

*Printed in Great Britain at the University Press, Cambridge
(Brooke Crutchley, University Printer)
and published by the Cambridge University Press*

*London: Bentley House, N.W. 1
American Branch: New York*

Agents for Canada, India, and Pakistan: Macmillan

CONTENTS

	PAGE
Abbott, M. R. A theory of the propagation of bores in channels and rivers	344
Afriat, S. N. Simultaneous linear differential equations with constant coefficients	209
Afriat, S. N. The approach to scalar growth of a vector transformed by an increasing power of a matrix	213
Alguneid, A. R. Analytical degeneration of complete twisted cubics	202
Ballinger, R. A. and March, N. H. Angular terms in the electron density for the phosphine molecule	703
Banyard, K. E. and March, N. H. Molecules with tetrahedral and octahedral symmetry. V. The electron distribution in CCl_4	280
Bassali, W. A. Bending of an elastically restrained circular plate under a linearly varying load over an eccentric circle	734
Bassali, W. A. Transverse bending of a thin circular plate loaded normally over an eccentric circle	742
Bassali, W. A. and Dawoud, R. H. Bending of a circular plate with an eccentric circular patch symmetrically loaded with respect to its centre	584
Besicovitch, A. S. On the definition of tangents to sets of infinite linear measure	20
Bethe, H. A. (<i>Joint author</i>). A singular integral equation in the theory of meson-nucleon scattering	251
Bolton, H. S. and Scoins, H. I. Eigenvalues of differential equations by finite-difference methods	215
Born, M. and Hooton, D. J. Statistical dynamics of multiply-periodic systems	287
Broadbent, S. R. A measure of dispersion applied to cosmic-ray and other problems	499
Cassels, J. W. S. Bounds for the least solutions of homogeneous quadratic equations. (<i>Addendum</i>)	604
Chambers, R. G. The penetration depth in impure super conducting tin	363
Corinaldesi, E. and Zienau, S. On an inequality for the momentum derivative of the scattering phase. (<i>Research note</i>)	599
Coulson, C. A. and March, N. H. Molecules with tetrahedral and octahedral symmetry. IV. A modified Thomas-Fermi scheme for molecules with heavy atoms in the outer positions	114
Dalitz, R. H., Sundaresen, M. K. and Bethe, H. A. A singular integral equation in the theory of meson-nucleon scattering	251
Das, S. C. The numerical evaluation of a class of integrals. II	442
Davies, Roy O. A property of Hausdorff measure	30
Davies, Roy O. A note on linear derivates of measurable functions. (<i>Research note</i>)	153
Davies, Roy O. Non σ -finite closed subsets of analytic sets	174
Dawoud, R. H. (<i>Joint author</i>). Bending of a circular plate with an eccentric circular patch symmetrically loaded with respect to its centre	584
De, S. C. Kinematic wave theory of bottlenecks of varying capacity	564
Dean, P. The spectral distribution of a Jacobian matrix. (<i>Research note</i>)	752
Domb, C. and Fisher, M. E. On iterative processes and functional equations	652

	PAGE
Douglas, A. S. On the Sturm–Liouville equation with two-point boundary conditions	636
Douglas, A. S. A method for improving energy-level calculations for ‘series’ electrons	687
Duguid, A. M. and McLain, D. H. FC-nilpotent and FC-soluble groups	391
Fisher, M. E. (<i>Joint author</i>). On iterative processes and functional equations	652
Garstang, R. H. The effect of configuration interaction on forbidden line strengths	107
Gravett, K. A. H. A characterization of frontier. (<i>Research note</i>)	152
Gravett, K. A. H. Note on a result of Krull. (<i>Research note</i>)	379
Grimshaw, M. E. On Taylor’s theorem. (<i>Research note</i>)	376
Grundy, P. M. and Smith, C. A. B. Disjunctive games with the last player losing	527
Guy, Richard K. and Smith, Cedric A. B. The G -values of various games	514
Hajnal, J. The ergodic properties of non-homogeneous finite Markov chains	67
Hall, P. Finite-by-nilpotent groups	611
Hamilton, J. Centre-of-mass state vectors	97
Hammersley, J. M. The area enclosed by Pólya’s walk	78
Hammersley, J. M. and Mauldon, J. G. General principles of antithetic variates	476
Hammersley, J. M. and Morton, K. W. A new Monte Carlo technique: antithetic variates	449
Hannan, E. J. Exact tests for serial correlation in vector processes	482
Head, J. W. Approximation to transients by means of Laguerre series	640
Heine, V. The thermodynamics of bodies in static electromagnetic fields	546
Higman, Graham. On a conjecture of Nagata	1
Higman, Graham. On finite groups of exponent five	381
Hilton, P. J. Note on the higher Hopf invariants. (<i>Research note</i>)	750
Hooton, D. J. (<i>Joint author</i>). Statistical dynamics of multiply-periodic systems	287
Jeffreys, Bertha. The use of the Airy functions in a potential barrier problem	273
Jeffreys, Harold. On the use of asymptotic approximations of Green’s type when the coefficient has zeros	61
Jones, C. W. Elements of an improved linear perturbation theory of steady supersonic flow with axial symmetry	336
Lighthill, M. J. The image system of a vortex element in a rigid sphere	317
Linden, C. N. Functions regular in the unit circle	49
Littlewood, D. E. The behaviour of the universe	88
Longman, I. M. Note on a method for computing infinite integrals of oscillatory functions. (<i>Research note</i>)	764
Longuet-Higgins, M. S. Statistical properties of a moving wave-form	234
Mack, C. On clumps formed when convex laminae or bodies are placed at random in two or three dimensions	246
Mahler, K. On the Taylor coefficients of rational functions	39
March, N. H. (<i>Joint author</i>). Molecules with tetrahedral and octahedral symmetry. IV. A modified Thomas–Fermi scheme for molecules with heavy atoms in the outer positions	114

	PAGE
March, N. H. (<i>Joint author</i>). Molecules with tetrahedral and octahedral symmetry. V. The electron distribution in CCl_4	280
March, N. H. (<i>Joint author</i>). Angular terms in the electron density for the phosphine molecule	703
Mauldon, J. G. (<i>Joint author</i>). General principles of antithetic variates	476
McLain, D. H. On locally nilpotent groups	5
McLain, D. H. (<i>Joint author</i>). FC-nilpotent and FC-soluble groups	391
Moffat, John. Generalized Riemann spaces	623
Monk, D. Jacobians of linear systems on an algebraic variety	198
Moran, P. A. P. The numerical evaluation of a class of integrals	230
Morton, K. W. (<i>Joint author</i>). A new Monte Carlo technique: antithetic variates	449
Northcott, D. G. Abstract dilations and infinitely near points	178
Palmer, D. S. Properties of random functions	672
Papadopoulos, V. M. Scattering by a semi-infinite resistive strip of dominant-mode propagation in an infinite rectangular wave-guide	553
Penrose, R. On best approximate solutions of linear matrix equations	17
Phillips, O. M. The final period of decay of non-homogeneous turbulence	135
Rado, R. Note on generalized inverses of matrices. (<i>Research note</i>)	600
Rees, D. A basis theorem for polynomial modules	12
Rees, D. Two classical theorems of ideal theory. (<i>Research note</i>)	155
Rees, D. A theorem of homological algebra	605
Rhodes, F. A generalization of isometries to uniform spaces	399
Ridley, E. Cicely. Approximate self-consistent fields for In^{3+} and Sb^{3+}	698
Robertson, H. H. Phase calculations for nuclear scattering on the Pilot ACE	538
Rogers, K. Complex homogeneous linear forms	35
Roth, L. Irregular threefolds which possess anticanonical systems	617
Routledge, N. A. Logic on electronic computers: a practical method for reducing expressions to conjunctive normal form	161
Sawyer, D. B. A remark on translated sets. (<i>Research note</i>)	157
Scoins, H. I. (<i>Joint author</i>). Eigenvalues of differential equations by finite-difference methods	215
Shercliff, J. A. Entry of conducting and non-conducting fluids in pipes	573
Singh, V. N. A note on the partial sums of certain basic bilateral hypergeometric series. (<i>Research note</i>)	756
Slater, L. J. The real zeros of the confluent hypergeometric function	626
Smith, C. A. B. (<i>Joint author</i>). The G -values of various games	514
Smith, C. A. B. (<i>Joint author</i>). Disjunctive games with the last player losing	527
Smith, D. Hammond. A note on complete hyperspaces. (<i>Research note</i>)	602
Steel, W. H. and Ward, Joan Y. Incomplete Bessel and Struve functions	431
Stewartson, K. Motion of a sphere through a conducting fluid in the presence of a strong magnetic field	301

	PAGE
Stone, A. P. Some properties of Wigner coefficients and hyperspherical harmonics	424
Sundaresen, M. K. (<i>Joint author</i>). A singular integral equation in the theory of meson-nucleon scattering	251
Takács, L. On a probability problem arising in the theory of counters	488
Taylor, J. C. Renormalization in meson theories	534
Taylor, J. C. The electron-phonon interaction according to the adiabatic approximation	693
Taylor, J. G. Classical electrodynamics as a distribution theory	119
Taylor, J. G. Quantum electrodynamics and Hilbert space theory	719
Temperley, H. N. V. A study of the 'irreversibility paradox' for a simple statistical assembly	712
Ward, Joan Y. (<i>Joint author</i>). Incomplete Bessel and Struve functions	431
Wilkes, M. V. Solution of linear algebraic and differential equations by the long-division algorithm. (<i>Research note</i>)	758
Williams, W. E. Diffraction by a cylinder of finite length	322
Woods, A. C. The anomaly of convex bodies	406
Wynn, P. On a Procrustean technique for the transformation of slowly convergent sequences and series	663
Zienau, S. (<i>Joint author</i>). On an inequality for the momentum derivative of the scattering phase	599
<i>Proceedings</i>	769
<i>Statement of Accounts</i>	773

The following papers have been accepted for publication and will appear shortly:

- BOLTON, H. C. and SCOINS, H. I. Eigenvalue problems treated by finite difference methods. II.
- BLACKBURN, N. On prime-power groups in which the derived group has two generators.
- LEVINE, H. The torque on an infinite strip exposed to plane sound waves.
- CLENSHAW, C. W. The numerical solution of differential equations in Chebyshev series.
- FROESE, CHARLOTTE. The self-consistent field with exchange for some ten and twelve electron systems.
- BUCKINGHAM, A. D. and POPE, J. A. The polarization of a hydrogen atom in combined electric and magnetic fields.
- NORTHCOTT, D. G. The notion of a first neighbourhood ring with an application to the $AF + B\Phi$ theorem.
- POLKINGHORNE, J. C. Causal products in quantum field theory.
- LONGUET-HIGGINS, M. S. On the transformation of a continuous spectrum by refraction.
- URSELL, F. On the short-wave asymptotic theory of the wave equation $(\nabla^2 + k^2)\phi = 0$.
- MARDER, L. On uniform acceleration in special and general relativity.
- FISHER, M. E. On the continuous solution of integral equations by an electron analogue.
- COLLINGWOOD, E. F. and LOHWATER, A. J. Applications of the theory of cluster sets to a class of meromorphic functions.
- KARP, SAMUEL N. An application of Sturm-Liouville theory to a class of two-part boundary-value problems.
- BELLMAN, RICHARD. On a generalization of the fundamental identity of Wald.
- BASSALI, W. A. Transverse bending of infinite and semi-infinite thin elastic plates. I.
- ZEEMAN, E. C. A proof of the comparison theorem for spectral sequences.
- BIRCH, B. J. A grid with no split parallelepiped.
- GARSTANG, R. H. The computation of quadrupole line strengths.
- CLEMMOW, P. C. and WILLSON, A. J. A relativistic form of Boltzmann's transport equation in the absence of collisions.
- REES, D. The grade of an ideal or module.
- BESICOVITCH, A. S. Analysis of tangential properties of curves of infinite length.
- MUNN, W. D. Matrix representations of semigroups.
- MUNN, W. D. The characters of the partial symmetric semigroup.
- LEHRER, Y. Note on simultaneous linear differential equations with constant coefficients.
- JASWON, M. A. Limiting properties of Mathieu functions.
- BESICOVITCH, A. S. On families of domains.
- RAVETZ, J. R. Distributions defined as limits. I.
- LONGUET-HIGGINS, M. S. On the velocities of the maxima in a moving wave-form.
- GODWIN, H. J. On totally complex quartic fields with small discriminants.
- JUNCOSA, M. L. and YOUNG, DAVID. On the Crank-Nicholson procedure for solving partial differential equations.
- DAVIES, H. Summation over Feynman histories: the free particle and the harmonic oscillator.
- STRACHAN, CHARLES. Formation of an alpha-group in the shell-model of a heavy nucleus.
- JAMES, I. M. Commutative products on spheres.
- CARLITZ, L. Some arithmetic properties of the Legendre symbol.
- NANDA, V. S. Bipartite partitions.
- BIRCH, B. J. Another transference theorem in the geometry of numbers.
- RIDLEY, E. CICELY. A numerical method for solving second order linear differential equations with two-point boundary conditions.

CONTENTS OF BIOLOGICAL REVIEWS

Vol. 31, Part 4. November 1956

- BENJAMIN LOWENHAUPT. The transport of calcium and other cations in submerged aquatic plants.
- FRANCIS G. W. KNOWLES and DAVID B. CARLISLE. Endocrine control in the Crustacea.
- JULIAN HUXLEY. Cancer biology: comparative and genetic.
