

**LLOYD'S REGISTER OF SHIPPING
OCEAN ENGINEERING DEPARTMENT**

Applications are invited from Senior or Intermediate aircraft stress men for duties in the Society's rapidly expanding Ocean Engineering Department which is involved in the design appraisal and certification of all types of offshore structures, which are typically space frameworks and shell structures.

These important positions offer candidates the opportunity to employ and develop their professional capabilities to the full and to be part of one of the most advanced international analysis teams in the world.

Applicants should be suitably qualified to graduate or equivalent level, with a minimum of three years experience, and be familiar with detail and overall stress analysis.

Appointments, which are permanent and pensionable, are based at the Society's Headquarters in London. Salaries fall within the general progression £2,450 to £4,400 per annum according to experience, qualifications and service. Further promotional opportunities attract competitive salaries well beyond these figures. Other benefits include free accident insurance on and off duty, London Allowance at the rate of £225 per annum, substantial house purchase assistance and re-location costs where applicable.

Sheer poetry

Truly, aluminium hath a way with it, like its alloys... as versatile as you like it. The lightweight that outclasses trad heavyweights... the great conductor of heat and electricity... the muscle metal that resists corrosion. Economical too. Name your need: Light alloy forgings, extrusions or die-castings. Get the HDA experience and technology behind your product. Write or telephone now - Slough 23901.
