The Cambridge Medicine programme focuses its book publishing in a defined set of core clinical areas with our great strength in the clinical brain sciences. Other specialties of significant focus include reproductive medicine/obstetrics and gynaecology, anaesthesia and critical care, emergency medicine and pathology.

Our journals programme covers a broad spectrum of medical disciplines including emergency and disaster medicine, epidemiology and infectious diseases, biomedical science, genetics, nutrition, mental health and psychiatry, and neuroscience.

We partner with many learned societies including The Society for Healthcare Epidemiology of America, and the Neuroscience Education Institute, and the Royal College of Obstetricians and Gynaecologists.

This journal is the official journal of the International Society for Twin Studies and the Human Genetics Society of Australasia.

Twin Research and Human Genetics is the official journal of the International Society for Twin Studies and the Human Genetics Society of Australasia.

Instructions to Authors

Scope

Twin Research and Human Genetics is the official journal of the International Society for Twin Studies and the Human Genetics Society of Australasia. It publishes original research and reviews concerning the genetic aspects of human traits and diseases. Twin Research and Human Genetics communicates the results of original research, reviews the current state of knowledge, and provides emphasis on multiple birth research. It also provides timely overviews of the state of research in all aspects of human genetics and twin studies. Topics covered include: genetic epidemiology, behavioral genetics, complex diseases, endocrinology, fetal pathology, medical genetics, obstetrics, pediatrics, psychiatric genetics and other areas of human genetics, with an emphasis on twin studies.

Editorial policy

All contributions and general correspondence regarding editorial matters should be addressed to the Editor and sent to the Editorial Office. Manuscripts should be written in clear and concise prose. Authors should submit their most recent reports of original research. Manuscripts will be sent for anonymous review either by members of the editorial board, or by individuals of similar standing in the field. Authors are advised to take a critical view of all reviewer’s comments. In the event of a negative decision, authors will be notified of acceptance/rejection or the need for revision within 6 weeks. When a manuscript is returned to the corresponding author for revision, it should be returned to the Editors within 2 months, otherwise it may be considered withdrawn. Authors will be informed of acceptance when the manuscript appears in the journal within 3 months, whenever possible.

Preparation of the manuscripts

All manuscripts should be in English presented electronically in Word or WordPerfect. All sections of the manuscript should be double-spaced with a one-inch margin on all four sides. Please subdivide sections into the following sequence of sections: Title page, Abstract, Introduction, Materials and methods, Results, Discussion, Acknowledgments, References, Tables, Figure legends. Number each page (title page is page 1) and number all tables and figures. Include a running title and figure/table in the text using the words “Figure X about here”. Figures can be supplied and printed in either black and white or full colour – please choose the option you prefer. Figures need to be saved as PDFs.

References

References should follow the general format advocated by the Publication Manual of the American Psychological Association (6th ed.). However, in the text, ‘et al.’ should be used for references with more than four authors, as follows. One author: (Jones, 1981). Two authors: (Jones & Smith, 1981). Three or more authors: (Jones et al., 1981). At the end of the manuscript references should be listed (double-spaced) in alphabetical order. If an article has more than seven authors, list the names of the first six authors followed by ‘et al.’ then the last author’s name in the reference entry. Full periodical titles should be used and last page numbers for each reference should be provided. Abstracts and letters must be identified as such.

Abbreviations

These should be defined in parentheses after their first mention in the text, except for the use of accepted abbreviations, such as SI symbols, which need not be defined. Use generic names when referring to drugs, trade names may be given in parentheses at first mention.

Tables

These should be submitted in Word format, numbered consecutively with Arabic numerals, and placed after the references. Tables should be self-explanatory and include a brief descriptive title. Footnotes to tables indicated by lower case letters (a, b, c, etc.) are acceptable, but they should not include extensive experimental details. Please indicate in the manuscript the most appropriate position for each table using the words “Table X about here.”

Figures

Illustrations, figures, photographs and mathematics:

Electronic submission of artwork

1. Photographs, graphs and figures should be inserted electronically in Word or WordPerfect. All sections of the manuscript should be double-spaced with a one-inch margin on all four sides. Please subdivide sections into the following sequence of sections: Title page, Abstract, Introduction, Materials and methods, Results, Discussion, Acknowledgments, References, Tables, Figure legends. Number each page (title page is page 1) and number all tables and figures. Include a running title and figure/table in the text using the words “Figure X about here”. Figures can be supplied and printed in either black and white or full colour – please choose the option you prefer. Figures need to be saved as PDFs.

Electronic submission of artwork

1. Photographs, graphs and figures should be prepared to the correct size (max. width 80 mm single column or up to 160 mm double column) and submitted electronically in Word or WordPerfect. All sections of the manuscript should be double-spaced with a one-inch margin on all four sides. Please subdivide sections into the following sequence of sections: Title page, Abstract, Introduction, Materials and methods, Results, Discussion, Acknowledgments, References, Tables, Figure legends. Number each page (title page is page 1) and number all tables and figures. Include a running title and figure/table in the text using the words “Figure X about here”. Figures can be supplied and printed in either black and white or full colour – please note that colour printing incurs an additional charge of $100 per page.

– Figures created in Microsoft Word, Excel or PowerPoint need to be saved as EPS (encapsulated postscript) files.

– Figures created in Photoshop or other photographic software should be saved with a minimum resolution of 600 dpi and in TIF format. Minimum resolution for scanned graphs is 300 dpi for halftone work (e.g., photographs) and 600 dpi for line art, and these should also be in TIF format.

2. Manuscripts that contain equations created with LaTeX or similar specialist software need to be supplied as a PDF file as well as a Microsoft Word document.

3. To send in original artwork, the separate files of figures, graphs, illustrations and so on should be sent to the Editor, to be returned to the corresponding author for review.

Preferred method of submission: email as attachments to TIST@qimr.edu.au.

If your artwork does not meet these guidelines, it may be returned to you.

References

Reviews

Scholarly reviews of topics within the scope of Twin Research and Human Genetics will be considered for publication after paper review. Please send a one-page letter of inquiry to the Editor before preparing your manuscript to make sure that a similar review is not in press.

Proofs

Proofs will be scheduled for publication upon receipt of proofs. Extensive changes to the proofs will not be accepted. It is not possible to correct for any new information that has become available between acceptance of the manuscript and receipt of proofs. The proofs should be checked immediately for typographical errors and returned to the publisher within 24 hours of receipt. Author proof will be sent to the corresponding author for approval before publication.
